Centuries of Great European Painting Hiltgart Leu Keller, Bodo Cichy, 1957 Introduction This collection does not aim to be a complete academic course in the history of art its purpose is rather to introduce the reader to the language of painting by means of European masterpieces of two thousand years and to demonstrate the developments and changes **Fifteenth- to Eighteenth-century European Paintings** Metropolitan Museum of Art. Robert Lehman Collection, 1998 European Art of the Eighteenth Century Daniela Tarabra, 2008 The Art Through the Centuries series introduces readers to important visual vocabulary of Western art Back cover **European Art of the Sixteenth Century** Stefano Zuffi, 2006 In the sixteenth century the humanist values and admiration for classical antiquity that marked the early Renaissance spread from Italy throughout the rest of the continent Part of the Art through the Centuries series this volume is divided into three sections that discuss the important people concepts and artistic centres of this period European Art of the Fifteenth Century Stefano Zuffi, 2005 Influenced by a revival of interest in Greco Roman ideals and sponsored by a newly prosperous merchant class fifteenth century artists produced works of astonishingly innovative content and technique The International Gothic style of painting still popular at the beginning of the century was giving way to the influence of Early Netherlandish Flemish masters such as Jan van Eyck who emphasized narrative and the complex use of light for symbolic meaning Patrons favored paintings in oil and on wooden panels for works ranging from large hinged altarpieces to small increasingly lifelike portraits In the Italian city states of Florence Venice and Mantua artists and architects alike perfected existing techniques and developed new ones The painter Masaccio mastered linear perspective the sculptor Donatello produced anatomically correct but idealized figures such as his bronze nude of David and the brilliant architect and engineer Brunelleschi integrated Gothic and Renaissance elements to build the self supporting dome of the Florence Cathedral This beautifully illustrated guide analyzes the most important people places and concepts of this early Renaissance period whose explosion of creativity was to spread throughout Europe in the sixteenth century European Art of the Fourteenth Century Sandra Baragli, 2007 Fourteenth century Europe was ravaged by famine war and most devastatingly the Black Plague These widespread crises inspired a mystical religiosity which emphasized both ecstatic joy and extreme suffering producing emotionally charged and often graphic depictions of the Crucifixion and the martyrdoms of the saints This third volume in the Art through the Centuries series highlights the most noteworthy concepts geographic centers and artists of this turbulent century Important facts about the subjects under discussion are summarized in the margins of each entry and salient features of the illustrated art works are identified and discussed European Art of the Seventeenth Century Rosa Giorgi, 2008 This volume presents the most noteworthy concepts artists and cultural centers of the seventeenth century through a close examination of many of its greatest paintings sculptures and buildings The Baroque rooted in classicism but with a new emphasis on emotionalism

and naturalism was the leading style of the seventeenth century. The movement exhibited both stylistic complexity and great diversity in its subject matter from large religious works and history paintings to portraits, landscapes and scenes of everyday life. Masters of the era included Caravaggio whose innovations in the dramatic uses of light and shadow influenced many of the century's artists, notably Rembrandt, the sculptor, painter and architect Bernini with his combination of technical brilliance and expressiveness and other familiar names such as Rubens, Poussin, Velázquez and Vermeer. This was the era of absolute monarchs including Spain's Habsburgs and Louis XIII and XIV of France whose artistic patronage helped furnish their opulent palaces. But a new era of commercialism in which artists increasingly catered to affluent collectors of the professional and merchant classes also flourished.
