this volume shows are barely mirrored in the legal enforcement policy and institutional approaches in the EU and beyond where the silo approach continues to prevail The ideas that Majcher puts forward for a more synergetic integration of data protection and competition law are anchored in the concept of sectional coherence This new coherence centred paradigm reimagines the interpretation and enforcement of data protection and competition law as mutually cognizant and reciprocal allowing readers to explore in an innovative way the interface between these legal fields and identify positive interactions instead of merely addressing inconsistencies and tensions This book reflects on the conceptual practical institutional and constitutional implications of the transition towards coherence and the relevance of its findings for other jurisdictions
