European Conference on Security and Detection - ECOS97, Incorporating the One Day Symposium on Technology Used for Combating Fraud ,1997 Proceedings of the 9th National Conference on Wind Engineering

Sabareesh Geetha Rajasekharan, Srinivasan Arunachalam, Pabbisetty Harikrishna, 2023-08-22 The book presents the select proceedings of 9th National Conference on Wind Engineering It covers the latest technology and research in the areas of wind engineering and wind energy technologies Various topics covered in this book are wind resistant design of structures climate modeling applications of artificial intelligence and machine learning in fluid mechanics novel ways to increase the efficiency of wind energy harnessing characterization of airfoils modern wind turbine designs and computational wind engineering studies This book is useful for researchers and professionals in the areas of structural design wind energy wind engineering renewable energy and fluid mechanics **Trusted Information** Michel Dupuy, Pierre Paradinas, 2008-11-16

Since the early eighties IFIP Sec has been an important rendezvous for Information Technology researchers and specialists involved in all aspects of IT security The explosive growth of the Web is now faced with the formidable challenge of providing trusted information IFIP Sec 01 is the first of this decade and century and it will be devoted to Trusted Information the New Decade Challenge This proceedings are divided in eleven parts related to the conference program Session are dedicated to technologies Security Protocols Smart Card Network Security and Intrusion Detection Trusted Platforms Others sessions are devoted to application like eSociety TTP Management and PKI Secure Workflow Environment Secure Group Communications and on the deployment of applications Risk Management Security Policies and Trusted System Design and Management The year 2001 is a double anniversary First fifteen years ago the first IFIP Sec was held in France IFIP Sec 86 Monte Carlo and 2001 is also the anniversary of smart card technology Smart cards emerged some twenty years ago as an innovation and have now become pervasive information devices used for highly distributed secure applications These cards let millions of people carry a highly secure device that can represent them on a variety of networks To conclude we hope that the rich menu of conference papers for this IFIP Sec conference will provide valuable insights and encourage specialists to pursue their work in trusted information

Artificial Intelligence for Smart Cities and Villages: Advanced Technologies, Development, and Challenges Megha Bhushan, Sailesh Iyer, Ashok Kumar, Tanupriya Choudhury, Arun Negi, 2022-08-15 Smart cities and villages have enhanced the quality of lives of residents Various computer assisted technologies have been harnessed for the development of smart cities and villages in order to provide solutions for common and niche urban problems The development of smart environments has been possible due on advances in computing power and artificial intelligence AI that have allowed the deployment of scalable technologies Artificial Intelligence for Smart Cities and Smart Villages Advanced Technologies Development and Challenges summarizes the role of AI in planning and designing smart solutions for urban and rural environments This book is divided into three sections to impart a better understanding of the topics to readers

These sections are 1 Demystifying smart cities and villages A traditional perspective 2 Smart innovations for rural lifestyle management solutions and 3 Case studies Through this book readers will be able to understand various advanced technologies that are vital to the development of smart cities and villages The book presents 15 chapters that present effective solutions to urban and rural challenges Concepts highlighted in chapters include smart farms indoor object classification systems smart transportation blockchains for medical information humanoid robots for rural education IoT devices for farming and much more This book is intended for undergraduate and graduate engineering students across all disciplines security providers in the IT and related fields and trainees working for infrastructure management companies Researchers and consultants at all levels working in the areas of artificial intelligence machine learning IoT blockchain network security and cloud computing will also find the contents beneficial in planning projects involving smart environments

Machine Learning and Autonomous Systems Joy Long-Zong Chen, Haoxiang Wang, Ke-Lin Du, V. Suma, 2022-02-10 This book involves a collection of selected papers presented at International Conference on Machine Learning and Autonomous Systems ICMLAS 2021 held in Tamil Nadu India during 24-25 September 2021 It includes novel and innovative work from experts practitioners scientists and decision makers from academia and industry It covers selected papers in the area of emerging modern mobile robotic systems and intelligent information systems and autonomous systems in agriculture health care education military and industries

Security Solutions for Hyperconnectivity and the Internet of Things Dawson, Maurice, Eltayeb, Mohamed, Omar, Marwan, 2016-08-30 The Internet of Things describes a world in which smart technologies enable objects with a network to communicate with each other and interface with humans effortlessly This connected world of convenience and technology does not come without its drawbacks as interconnectivity implies hackability Security Solutions for Hyperconnectivity and the Internet of Things offers insights from cutting edge research about the strategies and techniques that can be implemented to protect against cyber attacks Calling for revolutionary protection strategies to reassess security this book is an essential resource for programmers engineers business professionals researchers and advanced students in relevant fields

Advances in Broadband Communication and Networks Johnson I. Agbinya, Oya Sevimli, Sam Reisenfeld, 2022-09-01 Broadband communications has become the major focus for industry for offering rich multimedia IP services in next generation networks This book deals with the state of the art and the underlying principles of key technologies which facilitate broadband telecommunications including millimetre wave gigabit Ethernet terahertz communication multiple input multiple output MIMO technology orthogonal frequency division multiplex OFDM ultra wideband UWB and the fourth generation 4G network technologies The book illustrates the use of these technologies including high resolution three dimensional millimetre wave radar imaging and terahertz imaging techniques Within the next few years advances in graphic rendering and the application of millimetre wave radar technology will enable high resolution radar surveillance and operators of industrial processes to control their machines and to navigate

remotely even in poor visibility environments The principles and performance of terahertz imaging are also demonstrated in this important book The performance and success of emerging all IP networks depend largely on the efficiency of broadband technologies and this book provides the basis for 4G networks and explores key performance measures such as quality of service and handover between distributed networks mobile and fixed The book also demonstrates the medical and biomedical applications of broadband wireless communications

The Singularity Uziel Awret,2016-11-23 This volume represents the combination of two special issues of the Journal of Consciousness Studies on the topic of the technological singularity Could artificial intelligence really out think us and what would be the likely repercussions if it could Leading authors contribute to the debate which takes the form of a target chapter by philosopher David Chalmers plus commentaries from the likes of Daniel Dennett Nick Bostrom Ray Kurzweil Ben Goertzel Frank Tipler among many others Chalmers then responds to the commentators to round off the discussion
