Nontaxation and Representation

Kevin M. Morrison, 2015 Does oil make countries autocratic Can foreign aid make countries democratic Does taxation lead to representation In this book Kevin M Morrison develops a novel argument about how government revenues of all kinds affect political regimes and their leaders Contrary to conventional wisdom Morrison illustrates that taxation leads to instability not representation With this insight he extends his award winning work on nontax revenues to encompass foreign aid oil revenue and intergovernmental grants and shows that they lead to decreased taxation increased government spending and increased political stability Looking at the stability of democracies and dictatorships as well as leadership transitions within those regimes Morrison incorporates cross national statistical methods formal modeling a quasi experiment and case studies of Brazil Kenya and Mexico to build his case This book upends many common hypotheses and policy recommendations providing the most comprehensive treatment of revenue and political stability to date

Phelps, Hans-Werner Sinn, 2011-05-27 Leading economists consider the apparent underperformance of the European economy testing various explanations against data Economists disagree on what ails the economies of continental western Europe which are widely perceived to be underperforming in terms of productivity and other metrics Is it some deficiency in their economic system in economic institutions or cultural attitudes Is it some effect of their welfare systems of social insurance and assistance Or are these systems healthy enough but weighed down by adverse market conditions In this volume leading economists test the various explanations for Europe's economic underperformance against real world data The chapters written from widely varying perspectives demonstrate the shortcomings and strengths of some methods of economics as much as they do the shortcomings and strengths of some economies of western continental Europe Some contributors address only income per head or per worker others look at efficiency and distortions of national choices such as that between labor and leisure still others look at job satisfaction fulfillment and rates of indigenous innovation Many offer policy recommendations which range from developing institutions that promote entrepreneurship to using early education to increase human capital **The JSE Handbook**, 2000 **Vision for a Canada Strong and Free** Mike Harris, Preston Manning, 2007
