Practical Orthopaedic Sports Medicine and Arthroscopy Donald Hugh Johnson, Robert A. Pedowitz, 2007 Written by noted experts in orthopaedic sports medicine this book is a comprehensive practical guide to diagnosis and treatment of sports related injuries It covers all the material

required for the American Board of Orthopaedic Surgery's new Subspecialty Certificate in Sports Medicine examination. Emphasis is on detailed step by step descriptions of surgical techniques for treating sports related injuries including the latest arthroscopic procedures. These techniques are illustrated with over 800 full color original drawings and photographs. The authors describe their preferred methods for treating each injury. Bulleted key points appear at the beginning of each chapter.

Medicolegal Reporting in Orthopaedic Trauma Michael A. Foy, Phillip S. Fagg, 2011-12-05 This book now a classic was developed to facilitate the preparation of medicolegal reports following musculoskeletal injuries. It collates data from the world literature in one source together with review articles on related topics such as Repetitive Strain Injury. As a result it saves readers from the time consuming task of researching multiple references. A comprehensive guide to the preparation of medicolegal reports in the field of personal injury litigation following musculoskeletal trauma. It provides prognostic information following musculoskeletal injuries and assists the clinician acting as an expert medical witness prepare the report. Each of the chapters is devoted to different areas of injury and takes the reader through the full range of treatments, results and complications and how these impact on prognosis. Collates data on treatment results, complications from the relevant medical literature and review articles and saves the orthopaedic surgeon acting as an expert witness a lot of hours of unnecessary research.

Controversies in Hip Surgery Robert B. Bourne, 2003 The purposes of this book is to give an overview of controversies that orthopaedic surgeons might have to consider when carrying out all levels of hip surgery. Contributions cover such important paediatric problems such as developmental dysplasia of the hip, Perthes disease, slipped capital femoral epiphysis and hip problems associated with neurological diseases. Traumatic conditions of the hip including acetabular fractures and femoral neck fractures are covered in detail. Considerable emphasis is given to the field of both primary and revision total hip replacement with special emphasis on the difference which occur in Europe and North America. Like every other aspect of hip disease the field of total hip arthroplasty is continuously changing to improve both the quality and durability of the clinical result. Finally post operative complications and their avoidance are covered particularly in the fields of deep vein thrombosis prophylaxis and management of the infected total hip arthroplasty. The contributions in this volume are from an international array of experts in the field of hip surgery.

Rehabilitation of Sports Injuries Walter R. Frontera, 2008-04-15 Rehabilitation is by definition the restoration of optimal form and function for an athlete. In this edition in the Encyclopedia series the editor and contributors advocate that rehabilitation should begin as soon as possible after the injury occurs alongside therapeutic measures such as anti inflammatory and other pain killing agents. This might also begin before or immediately after surgery. The rehabilitative process is therefore managed by a multi disciplinary team including physicians, physiotherapists, psychologists, nutritionists and athletic trainers amongst others. This book considers the three phases of rehabilitation: pain relief, protection of the affected area and limitation of tissue damage, limitation of impairment and recovery of flexibility, strength, endurance, balance and co ordination and finally the start of

conditioning to return to training and competition
