Davis,2007-01-11 The master ship builders of seventeenth century Venice formed part of what was arguably the greatest manufacturing complex in early modern Europe As many as three thousand masters apprentices and laborers regularly worked in the city s enormous shipyards This is the social history of the men and women who helped maintain not only the city s dominion over the sea but

also its stability and peace Drawing on a variety of documents that include nearly a thousand petitions from the shipbuilders to the Venetian governments as well as on parish records inventories and wills Robert C Davis offers a vivid and compelling account of these early modern workers He explores their mentality and describes their private and public worlds which in some ways he argues prefigured the factories and company towns of a later era He uncovers the far reaching social and cultural role played by women in this industrial community He shows how the Venetian government formed its shipbuilders into a militia to maintain public order And he describes the often colorful ways in which Venetians dealt with the tensions that role provoked including officially sanctioned community fistfights on the city s bridges The recent decision by the Italian government to return the Venetian Arsenal to civilian control has sparked renewed interest in the subject among historians Shipbuilders of the Venetian Arsenal offers new evidence on the ways in which large state run manufacturing operations furthered the industrialization process as well as on the extent of workers influence on the social dynamics of the early modern European city

Ecosystems of Disturbed Ground L.R. Walker,1999-12-17 As the human population inexorably grows its cumulative impact on the Earth s resources is hard to ignore The ability of the Earth to support more humans is dependent on the ability of humans to manage natural resources wisely Because disturbance alters resource levels effective management requires understanding of the ecology of disturbance This book is the first to take a global approach to the description of both natural and anthropogenic disturbance regimes that physically impact the ground Natural disturbances such as erosion volcanoes wind herbivory flooding and drought plus anthropogenic disturbances such as forestry grazing mining urbanization and military actions are considered Both disturbance impacts and the biotic recovery are addressed as well as the interactions of different types of disturbance Other chapters cover processes that are important to the understanding of disturbance of all types including soil processes nutrient cycles primary productivity succession animal behaviour and competition Humans react to disturbances by avoiding exacerbating or restoring them or by passing environmental legislation All of these issues are covered in this book Managers need better predictive models and robust data collections that help determine both site specific and generalized responses to disturbance Multiple disturbances have a complex effect on both physical and biotic processes as they interact This book provides a wealth of detail about the process of disturbance and recovery as well as a synthesis of the current state of knowledge about disturbance theory with extensive documentation

Environmental Health Perspectives ,2004 *Friends Journal* ,2002 *Antelopes* Rod East,1988 **Sacred Landscapes in Antiquity** Ralph Haussler,Gian Franco Chiaia,2020-07-31 From generation to generation people experience their landscapes differently Humans depend on their natural environment it shapes their behavior while it is often felt that deities responsible for both natural benefits and natural calamities such as droughts famines floods and landslides need to be appeased We presume that in many societies lakes rivers rocks mountains caves and groves were considered sacred Individual sites and entire landscapes are often associated with divine actions mythical heroes and etiological myths Throughout human history people have also felt the need to monumentalize their sacred landscape But this is where the similarities end as different societies had very different understandings believes and practices The aim of this new thematic appraisal is to scrutinize carefully our evidence and rethink our methodologies in a multi disciplinary approach More than 30 papers investigate diverse sacred landscapes from the Iberian peninsula and Britain in the west to China in the east They discuss how to interpret the intricate web of ciphers and symbols in the landscape and how people might have experienced it We see the role of performance ritual orality textuality and memory in people s sacred landscapes A diachronic view allows us to study how landscapes were rewritten adapted and redefined in the course of time to suit new cultural political and religious understandings not to mention the impact of urbanism on people s understandings A key question is how was the landscape manipulated transformed and monumentalized especially the colossal investments in monumental architecture we see in certain socio historic contexts or the creation of an alternative humanmade seemingly non natural landscape with perfectly astronomically aligned buildings that define a cosmological order Sacred Landscapes therefore aims to analyze the complex links between landscape religiosity and society developing a dialectic framework that explores sacred landscapes across the ancient world in a dynamic holistic contextual and historical perspective
