statutory protection has not been sufficiently substantiated Nevertheless although the committee opposes the creation of any strong new protective measures it recognizes that some additional limits against wholesale misappropriation of databases may be necessary In particular a new properly scoped and focused U S statute might provide a reasonable alternative to the European Union s highly protectionistic database directive Such legislation could then serve as a legal model for an international treaty in this area The book recommends a number of guiding principles for such possible legislation as well as related policy actions for the administration      Library Times International ,1996
