Armed Forces And Political Power In Eastern Europe The Soviet Communist Control System:

Armed Forces and Political Power in Eastern Europe Bradley R. Gitz, 1992-01-22 This timely study analyzes the inner workings of the political and military control system used by the USSR and former communist regimes in Eastern Europe to rule the region until recent times It then shows how these controls collapsed and were swept away by the revolutions in 1989 This up to date work describes current problems in East European security and points to future needs This appraisal of the use of military and political power in the area is written for political scientists military historians and analysts for students and experts in East European studies and in international organization Certain coercive and socializing mechanisms define the Soviet Communist control system which was the key to the effectiveness of the Warsaw Treaty Organization and to the reliability of East European armed forces The history covers the period from the end of World War II to the present The work describes the disintegration of the system of controls during the 1980s and its collapse and the end of the WTO and previous military arrangements in 1989 The study analyzes the 1989 revolutions and points to new problems and uncertainties facing East European states as they depoliticize their armed forces and renationalize their foreign security policies

The Rise and Fall of the Brezhnev Doctrine in Soviet Foreign Policy Matthew J. Ouimet, 2003-01-01 Ouimet argues that the now famous reforms of Soviet bloc policy of the mid 1980s were not the instigation but rather the climax of a fundamental transformation in Soviet policy toward Eastern Europe that had its origins in the Brezhnev era

Military Review, 1992-07 Ibss: Political Science: 1992 British Library of Political and Economic Science, 1993 The IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge of the social sciences *Anatomy of Post-Communist European Defense Institutions* Thomas-Durell Young, 2017-06-29 Although the West won the Cold War the continuation of the status

quo is not a foregone conclusion The former Soviet aligned regions outside of Russia Ukraine Poland Czech Republic and others sit atop decaying armed forces while Russian behavior has grown more and more aggressive as evidenced by its intervention in Ukraine in recent years Thomas Young delves into the state of these defense institutions in Central and Eastern Europe whose resources have declined at a faster rate than their Western neighbors due to social and fiscal circumstances at home and shifting attitudes in the wider international community With rigorous attention to the nuances of each region s politics and policies he documents the status of reform of these armed forces and the role that Western nations have played since the Cold War as well as identifying barriers to success and which management practices have been most effective in both Western and Eastern capitals This is essential reading for undergraduates and graduates studying the recent history of Europe in the post Soviet era as well as those professionally involved in defense governance in the region

Producing Security Stephen G.

Brooks,2011-10-16 Scholars and statesmen have debated the influence of international commerce on war and peace for

thousands of years Over the centuries analysts have generally treated the questions Does international commerce influence

security and Do trade flows influence security as synonymous In Producing Security Stephen Brooks maintains that such an overarching focus on the security implications of trade once made sense but no longer does Trade is no longer the primary means of organizing international economic transactions rather where and how multinational corporations MNCs organize their international production activities is now the key integrating force of global commerce MNC strategies have changed in a variety of fundamental ways over the past three decades Brooks argues resulting in an increased geographic dispersion of production across borders The author shows that the globalization of production has led to a series of shifts in the global security environment It has a differential effect on security relations in part because it does not encompass all countries and industries to the same extent The book s findings indicate that the geographic dispersion of MNC production acts as a significant force for peace among the great powers The author concludes that there is no basis for optimism that the globalization of production will promote peace elsewhere in the world Indeed he finds that it has a net negative influence on security relations among developing countries
