Arming Against Hitler France And The Limits Of Military Planning:

Arming Against Hitler Eugenia C. Kiesling,1996 In May June 1940 the Germans demolished the French Army inflicting more than 300 000 French casualties including more than 120 000 dead While many historians have focused on Frances failure to avoid this catastrophe Eugenia Kiesling is the first to show why the French had good reason to trust that their prewar defense policies military doctrine and combat forces would preserve the nation *The Dynamics of Military Revolution, 1300-2050* MacGregor Knox,Williamson Murray,2001-08-27 The Dynamics of Military Revolution aims to bridge a major gap in the emerging literature on revolutions in military affairs suggesting that there have been two very different phenomena at work over the past centuries military revolutions which are driven by vast social and political changes and revolutions in military affairs which military institutions have directed although usually with great difficulty and ambiguous results By providing both a conceptual framework and a historical context for thinking about revolutionary changes in military affairs the work establishes a baseline for understanding the patterns of change innovation and adaptation that have marked war in the Western World since the thirteenth century beginning with Edward III s revolutionary changes in medieval warfare through the development of modern Western military institutions in seventeenth century France to the cataclysmic changes of the First World War and the German Blitzkrieg victories of 1940 This history provides a guide for thinking about military revolutions in the coming century which are as inevitable as they are difficult to predict Marko Djuranovic,2008-10-01 How much influence does the regime type of a country have on its ability to win an international war Upon closer inspection very little A careful study of the process by which peaceful citizens are converted into instruments of state sponsored destruction shows that countries with democratic systems of government perform no better in international wars than their non democratic counterparts Instead it is the size of the population asset that the states leadership can gather leverage and deploy in combat that has historically mattered most for victory in war Population sizes of countries in the international system are so varied that it is virtually impossible for a small nation to withstand the military onslaught of a more populous foe a finding that reintroduces some basic tenets of realism to modern foreign policy discussions The importance of the size and quality of a countrys population is demonstrated via statistical analysis on a novel dataset of international wars since 1816 as well as detailed case studies of the Arab Israeli Wars and German invasion of France in 1940 *Special Bibliography Series* ,1957 *Special Bibliography Series* United States Air Force Academy. Gray,2001 *Military Review* ,1998 Vital Crossroads Reynolds Mathewson Salerno,2002 Most international historians present the outbreak of World War II as the result of an irreconcilable conflict between Great Britain and Germany This ubiquitous Anglo German perspective fails to recognize complex causes and repercussions of international events misappropriates historical responsibilities and overlooks many global and imperial factors of the war s origins Reynolds M Salerno shows that the situation in the Mediterranean played a decisive role in the European drama of the late 1930s and profoundly influenced the manner in which the Second World War unfolded Vital Crossroads is the result of the author s remarkable access to and extensive research in twenty eight archives in five different countries Concentrating on the period from the Mediterranean crisis of 1935 to Italy s

declaration of war in June 1940 Salerno demonstrates that the international politics of pre World War II Europe particularly in the Mediterranean can only be understood as the multilateral interaction of British French German and Italian foreign and defense policies Control of the Mediterranean he asserts was a central concern for the European powers in 1935 40 and a fundamental reason why Europe went to war and why the conflict unfolded as it did As a result France and Italy influenced and often determined the nature and direction of Allied and Axis policy to an extent disproportionate to their nations military and economic strength Salerno contends that the Allies reluctance to take decisive action against Fascist Italy in 1939 40 contributed to the fall of France in 1940 Britain s desperate situation in 1940 41 and the post war collapse of Britain as a world power At a time when the Allied powers dreaded the ability of the German military to march across the European continent they also feared that the Italian armed forces would strive to fulfill Mussolini s grand imperial ambitions in the Mediterranean

Air University Library Index to Military Periodicals ,1998 *The Triumph of the Dark* Zara S. Steiner,Zara Steiner,2011-03-31 Following on her acclaimed study of the collapse of international security during the early 1930s Zara Steiner gives a dramatic and authoritative account of the coming catastrophe She shows that the era of Hitler s rise to power an ascent bent on war was founded on ideologies which the democratic perception could neither penetrate nor arrest Like few others this survey takes both European and East Asian conflicts into interlocking accounts In the light of new material she refutes attempts to whitewash Mussolini argues that Anglo French military response in 1938 had realistic prospects traces the global ramifications of Sino Japanese wars and evaluates Moscow s diplomatic options Zara Steiner shows that only Hitler regarded the Jewish question as of primary importance Lucid formidably documented this profoundly original work will alter our perceptions of the tragic decisive epoch from which our present world map has emerged

The Fall of France Julian Jackson,2004-04-22 On 16 May 1940 an emergency meeting of the French High Command was called at

the Quai d'Orsay in Paris The German army had broken through the French lines on the River Meuse at Sedan and elsewhere only five days after launching their attack Churchill who had been telephoned by Prime Minister Reynaud the previous evening to be told that the French were beaten rushed to Paris to meet the French leaders The mood in the meeting was one of panic and despair there was talk of evacuating Paris Churchill asked Gamelin the French Commander in Chief Where is the strategic reserve There is none replied Gamelin This exciting book by Julian Jackson a leading historian of twentieth century France charts the breathtakingly rapid events that led to the defeat and surrender of one of the greatest bastions of the Western Allies and thus to a dramatic new phase of the Second World War The search for scapegoats for the most humiliating military disaster in French history began almost at once were miscalculations by military leaders to blame or was this an indictment of an entire nation Using eyewitness accounts memoirs and diaries Julian Jackson recreates in gripping detail the intense atmosphere and dramatic events of these six weeks in 1940 unravelling the historical evidence to produce a fresh answer to the perennial question of whether the fall of France was inevitable The Soviets, the Munich Crisis, and the Coming of World War II Hugh Ragsdale, 2004-01-22 The Munich crisis is everywhere acknowledged as the prelude to World War II If Hitler had been stopped at Munich then World War II as we know it could not have happened The subject has been thoroughly studied in British French and German documents and consequently we know that the weakness in the Western position at Munich consisted in the Anglo French opinion that the Soviet commitment to its allies France and Czechoslovakia was utterly unreliable What has never been seriously studied in the Western literature is the whole spectrum of East European documentation This book targets precisely this dimension of the problem The Romanians were at one time prepared to admit the transfer of the Red Army across their territory The Red Army mobilised on a massive scale was informed that its destination was Czechoslovakia The Polish consul in Lodavia reported the entrance of the Red Army into the country In the meantime Moscow focused especially on the Polish rail network All of these findings are new and they contribute to a considerable shift in the conventional wisdom on the subject **The German Way of War** Robert Michael Citino, 2005 For Frederick the Great the prescription for warfare was simple kurz und vives short and lively wars that relied upon swift powerful and decisive military operations Robert Citino takes us on a dramatic march through Prussian and German military history to show how that primal theme played out time and time again Citino focuses on operational warfare to demonstrate continuity in German military campaigns from the time of Elector Frederick Wilhelm and his great sleigh drive against the Swedes to the age of Adolf Hitler and the blitzkrieg to the gates of Moscow Along the way he underscores the role played by the Prussian army in elevating a small vulnerable state to the ranks of the European powers describes how nineteenth century victories over Austria and France made the German army the most respected in Europe and reviews the lessons learned from the trenches of World War I
