## **Arming The Two Koreas State Capital And Military Power:**

Arming the Two Koreas Taik-Young Hamm, 2012-10-12 North Korea has traditionally been seen as militarily superior to South Korea in the long feud between the two nations This brilliantly argued book taps into a great deal of news interest in North Korea at the moment in the wake of recent hostility against Japan Hamm controversially shows that the received idea of Korea's military strength is partly a myth created by South Korea to justify a huge programme of rearmament *The Routledge Handbook of Civil-military Relations* Thomas C. Bruneau, Florina Cristiana Matei, 2013 The Routledge Handbook of Civil Military Relations not only fills this important lacuna but offers an up to date comparative analysis which identifies three essential components in civil military relations 1 democratic civilian control 2 operational effectiveness and 3 the efficiency of the security institutions This Handbook will be essential reading for students and practitioners in the fields of civil military relations *Singapore Politics Under the People's Action Party* Diane K. Mauzy, Robert Stephen Milne, 2002 The party has coped successfully with the needs of a multiethnic population claims for more extensive human rights the nascent development of a civil society and the problems of defending a small country in a turbulent region *Cornerstone of the Nation* Peter Banseok Kwon, 2024-09-01 Cornerstone of the Nation is the first historical account of the complex alliance of military and civilian forces that catapulted South Korea's conjoined militarization and industrialization under Park Chung Hee 1961-1979 Kwon reveals how Park's secret program to build an independent defense industry spurred a total mobilization of business science labor and citizenry all of which converged in military civilian forces that propelled an unprecedented model of modernization in Korea Drawing on largely untapped declassified materials from Korea and personal interviews with contemporaneous participants in the nascent defense industry as well as declassified US documents and other external sources Kwon weaves together oral histories and documentary evidence in an empirically rich narrative that details how militarization shaped the nation's rapid economic technological political and social transformation Cornerstone of the Nation makes the case that South Korea's arms development under Park may be the most durable and yet least acknowledged factor behind the country's rise to economic prominence in the late twentieth century Through an analysis that simultaneously engages some of the most contested issues in Korean historiography development literature contemporary politics and military affairs this book traces Korea's distinct pathway to becoming a global economic force Asian States Richard Boyd, Tak-Wing Ngo, 2005-01-26 A team of international leading experts provide a much needed re-examination of the theoretical claims and the empirical foundation of developmental state theory Asian States argues that regardless of the merits of the developmental state as an explanation of economic growth it falls far short of being an adequate theory of the state in Asia The contributors critically review claims about agency state society and state market relations that shape developmental projects It broadens the analysis of state involvement in developmental projects and considers the variety of political and social bases for state projects across East and Southeast Asia in a theoretically sensitive

thematic and empirically rich way      North Korea's Military-Diplomatic Campaigns, 1966-2008 Narushige Michishita, 2009-10-16 This book examines North Korea's nuclear diplomacy over a long time period from the early 1960s setting its dangerous brinkmanship in the wider context of North Korea's military and diplomatic campaigns to achieve its political goals. It argues that the last four decades of military adventurism demonstrates Pyongyang's consistent calculated use of military tools to advance strategic objectives vis-à-vis its adversaries. It shows how recent behavior of the North Korean government is entirely consistent with its behavior over this longer period: the North Korean government's conduct rather than being haphazard or reactive is rational in the Clausewitzian sense of being ready to use force as an extension of diplomacy by other means. The book goes on to demonstrate that North Korea's calculated adventurism has come full circle: what we are seeing now is a modified repetition of earlier events such as the Pueblo incident of 1968 and the nuclear and missile diplomacy of the 1990s. Using extensive interviews in the United States and South Korea including those with defected North Korean government officials alongside newly declassified first-hand material from U.S., South Korean and former Communist bloc archives, the book argues that whilst North Korea's military-diplomatic campaigns have intensified, its policy objectives have become more conservative and are aimed at regime survival, normalization of relations with the United States and Japan and obtaining economic aid.

Reforming Civil-Military Relations in New Democracies Aurel Croissant, David Kuehn, 2017-03-20 This book addresses the challenge of reforming defense and military policy making in newly democratized nations. By tracing the development of civil-military relations in various new democracies from a comparative perspective, it links two bodies of scholarship that thus far have remained largely separate: the study of emerging or failed civilian control over armed forces on the one hand and work on the roots and causes of military effectiveness to guarantee the protection and security of citizens on the other. The empirical and theoretical findings presented here will appeal to scholars of civil-military relations, democratization and security issues as well as to defense policy makers.
