Field Artillery And Fire Power J.B.A Bailey, 2003-09-02 This definitive overview of the development and use of artillery makes the complex artillery systems of today understandable while at the same time showing how they have evolved and how they are likely to change in the future The author until recently chief of artillery for the British Army is considered one of the world's foremost experts on the subject Unlike other books that either describe the technical aspects of present day firepower or outline its history during specific wars this work provides both a detailed explanation of the modern artillery system and a history of its development over the past six hundred fifty years identifying its enduring principles and changing practices against an ever changing background of technology tactics and strategy When an earlier version of this book was published in 1989 it became known as the best single source on field artillery in the English language This new edition has been fully updated and substantially expanded to cover a wide range of contemporary military debates and the role of firepower and is certain to be regarded as the ultimate work on the subject for years to come J B A Bailey assesses major developments over the past decade analyzing artillery operations in airborne urban littoral desert jungle mountain arctic and nocturnal environments He examines direct fire counterfire the suppression of enemy air defenses and force protection methods He explains field artillery from its primitive beginnings to its dominance as an art in World War II and its potent utility in operations since 1945 and into the future The book will be of particular interest to military historians and those engaged in debating firepower's future Published in cooperation with the Association of the United States Army 15 photographs 8 line drawings Appendixes Notes Bibliography Index 7 x 10 inches

Monty's Men John Buckley, 2013-11-26 Historian John Buckley offers a radical reappraisal of Great Britain's fighting forces during World War Two challenging the common belief that the British Army was no match for the forces of Hitler's Germany Following Britain's military commanders and troops across the battlefields of Europe from D Day to VE Day from the Normandy beaches to Arnhem and the Rhine and ultimately to the Baltic Buckley's provocative history demonstrates that the British Army was more than a match for the vaunted Nazi war machine This fascinating revisionist study of the campaign to liberate Northern Europe in the war's final years features a large cast of colorful unknowns and grand historical personages alike including Field Marshal Sir Bernard Montgomery and the prime minister Sir Winston Churchill By integrating detailed military history with personal accounts it evokes the vivid reality of men at war while putting long held misconceptions finally to rest

The Normandy Campaign 1944 John Buckley, 2006-07-29 With essays from leading names in military history this new book re-examines the crucial issues and debates of the D Day campaign It tackles a range of core topics placing them in their current historiographical context to present new and sometimes revisionist interpretations of key issues such as

the image of the Allied armies compared with the Germans the role of air power and the lessons learned by the military from their operations As the Second World War is increasingly becoming a field of revisionism this book sits squarely within growing debates shedding new light on topics and bringing current thinking from our leading military and strategic historians to a wider audience This book will be of great interest to students of the Second World War and of military and strategic studies in general The Defeat and Attrition of the 12. SS-Panzer-Division "Hitlerjugend" Arthur W.

Ibbotson,2025-07-31 A British tank soldier's memoir detailing his perilous WWII journey, fierce battles, frontline experiences and the liberation of Europe. What was tank warfare like for an ordinary conscripted British soldier in the Second World War? Arthur Ibbotson was a Grenadier Guardsman whose training and battles from Normandy to Northern Germany, 1943-45, help provide an answer. He trained using the 30-ton M4 Sherman tank but after being flown into Normandy he instead joined the crew of a 15-ton M5 Honey reconnaissance tank. Despite its diminutive size and small gun, he drove daily into enemy territory, coming close to death on five occasions. His first combat involved capturing 100 POWs, described here in detail for the first time. This was followed immediately by Operation Market Garden, where his tank periodically led the 50,000 men of 30 Corps. He defended the supply route against repeated German attacks and dealt with friendly fire from the US 101st, neither topic often covered in histories of the battle. Unlike the common portrayal of Market Garden as a disaster, Arthur regarded it as a victory, a perspective discussed in detail. Later, the Battle of the Bulge required a relocation back to Belgium, an often overlooked British action. Before crossing into Germany, he was issued with an ultra-modern M24 reconnaissance tank. While learning the vagaries of this technological wonder, he encountered more near-death situations, including a hit from a Panzerfaust and the death of a close friend that was killed by a mine over which Arthur had just driven. Explaining why he had gone through so much, he liberated a concentration camp days before the war's end and spent his final service returning the country to peace.

fighting vehicles greater than 15 tonnes which were considered tanks There are though exceptions in that the naval 6 pounder guns in First World War British tanks as well as the 75 mm guns in French medium tanks of the same period all turretless are included The treatment of gun systems includes sighting and fire control equipment gun laying equipment mounts and the array of munitions fired as well as the actual gun including its barrel cradle breech firing mechanism sights and recoil system Related to this are issues of gun handling loading and unloading ammunition design and rates of fire Also examined are the maximum impulse and energy generated by firing some of the munitions available that must be absorbed by the gun recoil system Air University Library Index to Military Periodicals ,1961 **Armor** ,2012 *Air University Periodical Index* ,1961 *Hitler's Light Panzers at War* Paul Thomas,2015-02-28 Hitler s Light Panzers at War is a highly illustrated record of the German light tank from its beginnings in the 1930s to the key battles it fought in Poland France North Africa Russia and North Western Europe The book analyses the development of the light Panzer which ranged from the Panzer I II and the Czech build Panzer 35 38t It describes how the Germans carefully utilized the development of these light machines for war and depicts how these tanks were adapted and up gunned to face the ever increasing enemy threat Using 250 rare and unpublished photographs together with detailed captions and accompanying text Hitler s Light Panzers At War provides a unique insight into the many variants that saw action on the battlefield It provides a vivid account of light Panzer operational deployment from the early Blitzkrieg campaigns to the final demise of the Nazi war machine
