Arms Politics Francesco Buscemi, 2025-08-15 In *Arms Politics* Francesco Buscemi tells the story of the ceasefire disarmament and rearmament of the Ta ang movement in Myanmar's Shan State through an analysis of the formation of the Palaung State Liberation Front Ta ang National Liberation Army PSLF TNLA With a focus on the circulation of weapons through the post 1991 ceasefire disarmament and rearmament years Buscemi explores how becoming and being an armed force leads to the becoming and being of a rebel polity Buscemi argues that the governance of arms and weaponry by rebel movements such as the PSLF TNLA shapes historically and spatially complex relationships among leadership rank and file civilians and civil society groups Furthermore he demonstrates that it is through the acquisition of weapons and the governing of armed collectives that rebel movements reproduce and shape the collective identity of their polity and its political geography Against the backdrop of the world's longest ongoing armed conflict *Arms Politics* shows how the processes and practices of governing weapons shape social and spatial relations of rule at the edges of state

authority **The Handbook on the Political Economy of War** Christopher J. Coyne, Rachel L. Mathers, 2011-01-01 The Handbook on the Political Economy of War highlights and explores important research questions and discusses the core elements of the political economy of war **Weapons Proliferation in the 1990s** Brad Roberts, 1995 The proliferation of weapons of mass destruction has emerged as a major topic of international security in the post Cold War world This compendium of articles published in The Washington Quarterly between 1991 and 1995 describes the changing nature of the problem discusses new trends in nonproliferation and counterproliferation policy identifies new arms control challenges at the regional and global levels and concludes by addressing the global politics of proliferation *Small Arms and Security* Denise Garcia, 2006-09-27 This book examines the emergence of new international norms to govern the spread of small arms and the extent to which these norms have been established in the policies and practices of states regions and international organizations It also attempts to establish criteria for assessing norm emergence and to assess the process of norm development by comparing what actually happens at the multilateral level If norm making on small arms and related multilateral negotiations have mostly dealt with illicit arms and most of the norms examined here fall on the arms supplier side of the arms equation the author argues that the creation of international norms and the setting of widely agreed standards amongst states on all aspects of the demand for availability and spread of both legal and illegal small arms and light weapons must become central to the multilateral coordination of policy responses in order to tackle the growing violence associated with small arms availability Small Arms and Security will be of interest to researchers and professionals in the fields of peace and conflict studies global governance international security and disarmament Gods and Arms Kjell-Åke Nordquist, 2013-02-12 This book brings together a variety of perspectives on how religion can be related to violence and war both in a destructive and constructive way Religion can justify and mobilize violence even terrorism or guerilla wars just like political ideology But how is such a link between religion and violent behavior established in the first place How can we go further in understanding this possible connection between religion and war Is religious peace work just the flip side of religious support of war Or can peace work be informed by knowing about how religion promotes violence and war In the search for answers to the puzzle of religion and war it is easy to focus on conflict and war situations but maybe there is as much to learn from peace work as from war studies Therefore this book also analyses religious peace work from different contexts The multifaceted presence of religion in conflict situations whether justifying violence or promoting peace is illustrated in this book using a variety of situations in an enlightening panorama of one of today's most puzzling social connections religion and armed conflict Contributors R Scott Appleby Goran Gunner Mariyah Hoole Mark Juergensmeyer Anne Kubai Kjell Ake Nordquist Jehan Perera Jennifer Schirmer Nari Senanayake and Maria Smaberg **The Prevention and Intervention of Genocide** Samuel Totten, 2008-03-31 This volume is comprised of over 2 300 annotations on a wide array of issues and topics germane to the subject of preventing the atrocities of genocide and managing these conflicts when

they do arise Samuel Totten brings together in one comprehensive collection the research and findings in various fields such as political science sociology history and psychology to enable specialists in genocide studies peace studies and conflict resolution to benefit from the insights of a diverse range of scholars and foster an understanding of how the various components of genocide studies connect Among the topics included are key conventions international treaties and covenants genocide early warning signals and forecasting risk data bases sanctions peacekeeping missions conflict resolution the International Criminal Court realpolitik vis vis the issue of genocide prevention and intervention key non governmental agencies key governmental and UN bodies working on these important issues In addition to the annotations Totten frames the bibliography with a major essay that introduces the reader to the subject of prevention and intervention of genocide raising a host of critical issues regarding the strengths weaknesses and limitations of various approaches germane to issues of managing these conflicts

Guns and Governance in the Rift Valley Kennedy Mkutu, 2008 Recent estimates indicate that more than 640 million small arms and 16 billion rounds of ammunition circulate the globe yearly In North East Africa and the Rift Valley the flow of arms has been particularly heavy and has led to the escalation of banditry cattle rustling raiding and ethnic conflict The impact small arms have on the area according to Kennedy Agade Mkutu is a symptom of the failure of states to govern and of superficial programs that focus simply on disarmament In this hard hitting book Mkutu brings together all the issues affecting the arms trade from the regulation of international arms sales to regional efforts to improve security community involvement and economic development He cites cultural changes to the legacy of pastoral violence in the region as key ingredients in stemming the disastrous spread of small arms

International Organizations and Ethnic Conflict Milton J. Esman, Shibley Telhami, 2019-06-30 From Rwanda to Somalia to the former Yugoslavia one feature of the post Cold War world has become dreadfully clear Ethnic conflicts are escalating and with them demands for international intervention But legally most ethnic conflicts are internal matters How are international organizations their resources stretched woefully thin to know when intervention is appropriate or possible This volume addresses the changing nature of relations between war torn multiethnic states and international organizations particularly the United Nations and its agencies Are the established norms that limit intervention in ethnic conflicts adequate to contemporary conditions Can international organizations meet the increasing demand If not what are the consequences of the disparities between established norms current capabilities and expanding expectations and how might these disparities be narrowed The contributors explore the desirability and potential effectiveness of international interventions in ethnic conflicts Detailed studies of two specific cases of severe and violent tensions in Lebanon and Yugoslavia complement the general discussion with particular insights into the risks and exigencies of international attempts to manage ethnic civil war A deeply thoughtful overview of one of the most pressing and perplexing issues confronting the world today this volume clarifies the changing role of international organizations in an increasingly fragmented world

United Nations Peacekeeping Operations Ramesh

Chandra Thakur, Albrecht Schnabel, 2001 Includes statistics *Postinternationalism and Small Arms Control* Damien Rogers, 2016-04-08 Even though impacts generated by the widespread availability and ongoing use of small arms and light weapons have not reached a magnitude sufficient to radically reorder contemporary world affairs awareness of the nature and extent of these impacts has compelled some international actors to take decisive action Damien Rogers examines how the international community has responded to the challenge of controlling small arms and light weapons since the early 1990s Using a postinternationalist analytic framework he specifically focuses on the maturing relationships between particular actors of world affairs and the nascent interconnectivity between their strategies for and approaches toward controlling these weapons Furthermore the book identifies ways in which the captains of small arms industry arms brokers and chief users of these weapons are able to mitigate resist or elude the intended effects of those responses *The Palgrave Encyclopedia of Peace and Conflict Studies* Oliver P. Richmond, Gözim Visoka, 2022-06-21 This encyclopaedia provides a comprehensive overview of major theories and approaches to the study of peace and conflict across different humanities and social sciences disciplines Peace and conflict studies PCS is one of the major sub disciplines of international studies including political science and international relations and has emerged from a need to understand war related systems and concepts and how to respond to it afterward As a living reference work easily discoverable and searchable the Palgrave Encyclopedia of Peace and Conflict Studies offers solid material for understanding the foundational historical and contemporary themes concepts theories events organisations and frameworks concerning peace conflict security rights institutions and development The Palgrave Encyclopaedia of Peace and Conflict Studies brings together leading and emerging scholars from different disciplines to provide the most comprehensive and up to date resource on peace and conflict studies ever produced *The Arms Dynamic in World Politics* Barry Buzan, Eric Herring, 1998 Presented as a successor to the Cold War era book *An Introduction to Strategic Studies* this volume explores issues of military security through a framework that links the issues of technology and world politics Arguing that the technological aspect of the global strategic environment is partway through a centuries long process of transformation sped up by the advent of the information age the authors examine such issues as different levels of industrial development on security what they argue is the relative infrequency of the use of force between states the use of military threats such as mass destruction concepts that military means create problems in themselves such as fear of war and insecurity and finally ways in which regulatory schemes such as disarmament can be put to use to solve some of those problems Paper edition unseen 22 50 Annotation copyrighted by Book News Inc Portland OR *Arming Conflict* M. Bourne, 2007-07-12 This book argues that the arming of conflict is complexly structured and highly dynamic It uncovers and describes the construction and interaction of structures and dynamics at global and regional levels which shape the arming patterns of both state and non state actors **War and the Engineers** Keir A. Lieber, 2018-09-05 Do some technologies provoke war Do others promote peace Offense defense theory contends that technological change is an

important cause of conflict leaders will be tempted to launch wars when they believe innovation favors attackers over defenders. Offense defense theory is perhaps best known from the passionate and intricate debates about first strike capability and deterrence stability during the cold war but it has deeper historical roots and remains a staple in international relations theorizing and drives modern arms control policymaking. In *War and the Engineers* the first book systematically to test the logical and empirical validity of offense defense theory, Keir A. Lieber examines the relationships among politics, technology, and the causes of war. Lieber's cases explore the military and political implications of the spread of railroads, the emergence of rifled small arms and artillery, the introduction of battle tanks, and the nuclear revolution. Lieber incorporates the new historiography of World War I which draws on archival materials that only recently became available to challenge many common beliefs about the conflict. The author's central conclusion is that technology is neither a cause of international conflict nor a panacea; instead, power politics remains paramount.

Disarmament Diplomacy and Human Security Denise Garcia, 2011-02-08. This book assesses how progress in disarmament diplomacy in the last decade has improved human security. It examines moral and normative progress in international relations by investigating three cases: the Arms Trade Treaty (ATT), the ban on cluster munitions, and the international regime on small arms and light weapons.

The International Dimensions of Internal Conflict Michael Edward Brown, 1996. Internal conflicts threaten many countries and regions globally. The first part of this book examines the sources of internal conflicts and the ways these may affect neighbouring states and the international community. The second part covers specific problems, policy instruments, and key actors.
