Arms Of Time:

Manual of Gymnastic Exercises, for the Use of Schools and at Home Gustav Techow,1866 *Collective Rationality* Paul Weirich,2009-12-01 Groups of people perform acts that are subject to standards of rationality A committee may sensibly award fellowships or may irrationally award them in violation of its own policies A theory of collective rationality defines collective acts that are evaluable for rationality and formulates principles for their evaluation This book argues that a group s act is evaluable for rationality if it is the products of acts its members fully control It also argues that such an act is collectively rational if the acts of the group s members are rational Efficiency is a goal of collective rationality but not a requirement except in cases where conditions are ideal for joint action and agents have rationally prepared for joint action The people engaged in a game of strategy form a group and the combination of their acts yields a collective act If their collective act is rational it constitutes a solution to their game A theory of collective rationality yields principles concerning solutions to games One principle requires that a solution constitute an equilibrium among the incentives of the agents in the game In a cooperative game some agents are coalitions of individuals and it may be impossible for all agents to pursue all incentives Because rationality is attainable the appropriate equilibrium standard for cooperative games requires that agents pursue only incentives that provide sufficient reasons to act The book s theory of collective rationality supports an attainable equilibrium standard for solutions to cooperative games and shows that its realization follows from individuals rational acts By extending the theory of rationality to groups this book reveals the characteristics that make an act evaluable for rationality and the way rationality s evaluation of an act responds to the type of control its agent exercises over the act The book s theory of collective rationality contributes to philosophical projects such as contractarian ethics and to practical projects such as the design of social institutions **Annual Report of Small Arms Target Practice** ,1908 Handbook of Reinforcement Learning and Control Kyriakos G.
