with his road from philosophy to sociology not least under the impression of the Great Depression and its aftermath especially the rise of National Socialism in Germany His epistemological studies on the limits of objective knowledge in history and the social sciences in which he moves away from Durkheim s approach and instead adopts Max Weber s sociology of understanding are analysed This acknowledgment of the limits of knowledge laid the foundations for Aron s liberalism and humanism His sociology of industrial society as an economy of economic growth in its market economy and planned economy versions its social stratification his criticism of the Marxist concept of social class the structure of the ruling elites and the pluralistic and one party totalitarian political regimes are presented as is Aron s analysis of the dialectic of modern society between the idea of equality and the authority structures in the state and the economic process This is accompanied by Aron s lifelong criticism of those intellectuals above all in the pluralist and liberal democracies who hope that a messianic ideology will abolish all social contradictions Aron s sociology of international relations in the age of industrial society and globalization which for Aron brought about the dawn of universal history complete the overview of Raymond Aron s sociological work
