Thomsen, Martin Tamke, 2023-09-02 The book provides new perspectives from leading experts examining the role of architects and urbanists in designing for inclusivity in our built environment. By focusing on themes of gender, race, and ethnicity, ability, neurodiversity, age, poverty, and socio-economy, and the non-human, the book tackles the complex challenges that designers and scholars encounter and need to address in their works. The volume offers a diverse compilation of peer-reviewed papers related to architecture for inclusivity in various different formats, ranging from visual essays, argumentative papers, and scholastic texts. It presents the notion of availability, a concept which works to challenge the othering inherent in notions of inclusion and accessibility. In its introduction, it presents a critical discourse around the challenges and potentials lying in the design for availability, targeted towards a systemic change of our societies. The book is part of a series of six volumes that explore the agency of the built environment in relation to the SDGs through new research conducted by leading researchers. The series is led by editors Mette Ramsgaard Thomsen and Martin Tamke in collaboration with the theme editors Design for Climate Adaptation Billie Faircloth and Maibritt Pedersen Zari; Design for Rethinking Resources Carlo Ratti and Mette Ramsgaard Thomsen; Eds Design for Resilient Communities Anna Rubbo and Juan Du; Eds Design for Health Arif Hasan and Christian Benimana; Eds Design for Inclusivity Magda Mostafa and Ruth Baumeister; Eds Design for Partnerships for Change Sandi Hilal and Merve Bedir.

La construcción de la arquitectura moderna en México Celia Esther Arredondo Zambrano, 2025-02-13 Este libro presenta la construcción de la arquitectura moderna mexicana mediante un enfoque basado en cinco estructuras de poder: la académica, la económica y política, la de estatus social, la de género y la poscolonial. Se incluyen también fragmentos de entrevistas y análisis de obras de trece destacados arquitectos: Luis Barragán, José Villagrán García, Juan O'Gorman, Pedro Ramírez Vázquez, Agustín Hernández, Abraham Zabludovsky, Carlos Mijares, Ricardo Legorreta, Juan José Díaz Infante, Enrique Norten, Alberto Kalach, Javier Sordo Madaleno y Clara de Buen. Todo ello proporciona un testimonio vivo de todo ese proceso. Si bien las cinco estructuras de poder enmarcaron y definieron esa arquitectura, las entrevistas de unos arquitectos que fueron sus protagonistas ayudan a descubrir e identificar sutilezas y matices en lo acontecido en ese periodo. De este modo, sus voces arrojan luz sobre lo que contribuyó a hacer de la arquitectura moderna mexicana algo tan singular a escala mundial. Aunque esos arquitectos no siempre fueron conscientes de la presencia de esas estructuras de poder, sus proyectos participaron en la marginación y la discriminación y el sometimiento que tales estructuras provocaban. En este sentido, el presente estudio también revela hasta qué punto dichas estructuras de poder están todavía presentes en la arquitectura mexicana actual. La singularidad de este libro se centra en describir los extraordinarios edificios modernos que surgieron en México en el contexto de esas cinco estructuras de poder. A su vez, el examen detallado de tales estructuras cuestiona su validez. El estudio expresa así mismo la urgente necesidad actual de generar una

nueva arquitectura que se situe fuera de los límites impuestos por los condicionantes del siglo XX. Por todo ello este libro es una lectura esencial para quienes estudian la arquitectura mexicana y latinoamericana. *El arte español fuera de España* Miguel Cabañas Bravo, 2003 En noviembre del 2002 y bajo el título de *El arte español fuera de España* se celebraron en Madrid las XI Jornadas de Arte primera convocatoria de la nueva centuria y al mismo tiempo undécima de la serie de un congreso que con carácter bienal y diferentes propuestas de análisis y reflexión sobre la Historia del Arte viene organizando el Departamento de Historia del Arte del Instituto de Historia del CSIC desde comienzos de los pasados a os ochenta. El presente volumen colectivo en consecuencia recoge los trabajos que se presentaron en la edición del congreso singularizando dado el propio tema propuesto por la entusiasta participación extranjera.

University of Texas at Austin. Library. Latin American Collection, 1969 **Architecture as Revolution** Luis E. Carranza, 2010-06-15 The period following the Mexican Revolution was characterized by unprecedented artistic experimentation. Seeking to express the revolution's heterogeneous social and political aims which were in a continuous state of redefinition architects, artists, writers, and intellectuals created distinctive sometimes idiosyncratic theories and works. Luis E. Carranza examines the interdependence of modern architecture in Mexico and the pressing sociopolitical and ideological issues of this period as well as the interchanges between postrevolutionary architects and the literary, philosophical, and artistic avant gardes. Organizing his book around chronological case studies that show how architectural theory and production reflected various understandings of the revolution's significance, Carranza focuses on architecture and its relationship to the philosophical and pedagogic requirements of the muralist movement, the development of the avant garde in Mexico and its notions of the Mexican city, the use of pre-Hispanic architectural forms to address indigenous peoples, the development of a socially oriented architectural functionalism, and the monumentalization of the revolution itself. In addition, the book also covers important architects and artists who have been marginally discussed within architectural and art historiography. Richly illustrated, *Architecture as Revolution* is one of the first books in English to present a social and cultural history of early twentieth-century Mexican architecture. **Image and Memory** Wendy Watriss, Lois Parkinson Zamora, 1998 FotoFest 1992 a major festival of international photography brought Latin American photography into focus for a wide audience. Offering a diverse selection of photographers, countries, artistic movements, and subject matter, the show revealed a photographic tradition rich in history and creativity. Drawing from the more than 1,000 images exhibited by FotoFest, this book documents the work of fifty-two photographers from ten countries. The photographs range from the opening of the Brazilian frontier in the 1880s to a secret archive of documentary images from El Salvador's recent civil war to works of specifically aesthetic intent. Many of the photographs appear here in print for the first time. Watriss's opening essay provides the curatorial overview for the book. Lois Parkinson Zamora examines the roots of visual image making in Latin American cultures. Boris Kossoy addresses the history of Latin American photography through the nineteenth century while Fernando

Castro covers the contemporary scene With its compelling images and English Spanish text this book will serve as a benchmark for future studies of photography in Latin America **La cultura indígena en la fotografía mexicana de los 90s** Laura M. CORKOVIC,2012-08-01 Desde sus inicios la fotografía en México ha sido un género artístico dominado por no indígenas y la cultura indígena una constante temática dentro de la misma. No fue hasta los 1990s cuando surgieron los primeros grupos de fotógrafos indígenas profesionales que además de tener gran éxito en México lograron atención y reconocimiento a nivel internacional. Con sus trabajos enriquecen la visión de los fotógrafos no indígenas conocida hasta entonces y dan nuevo rumbo a la presencia del mundo indígena en la fotografía mexicana. En esta tesis doctoral decidí poner en directa comparación ambos grupos de artistas para así subrayar las similitudes y disparidades en sus trabajos. Para este propósito seleccioné un grupo lo suficientemente representativo dentro de la abundante producción fotográfica no indígena y en el caso de los indígenas escogí a los fotógrafos más conocidos del país. Como parte esencial del proceso de investigación conduje más de cincuenta entrevistas tanto a fotógrafos indígenas como no indígenas y a diversos personajes del medio cultural mexicano. En ello descubrí cuáles son los grupos étnicos más fotografiados a finales del siglo XX y llegó a algunas observaciones respecto al futuro de la fotografía indígena en México. *Pinceladas de cine mexicano 1. Las investigadoras del SNI. Retos y propuestas**, 2015-02-05

Este libro plantea una pregunta cuya respuesta implica ejercitarse el pensamiento para la comprensión de lo que sucede en el ámbito de la investigación hecha por mujeres en México. La pregunta legitimidad o reconocimiento sugiere la necesidad de construir espacios de oportunidad legítimos que promuevan la participación de las mujeres en el desarrollo de la ciencia y la innovación tecnológica mexicanas. Es la legitimidad de la actividad investigadora de las mujeres en el marco del Sistema Nacional de Investigadores una batalla cultural que aún no concluye. Falta abrir ventanas de visibilidad e inclusión para las propuestas de generación y aplicación del conocimiento diseñadas por las investigadoras. Tal parece que el carácter legítimo del quehacer investigador de las académicas y científicas nacionales exige una mayor equidad y el cambio cultural que propicie la inclusión de las mujeres investigadoras que rompa los muros de contención derribe los techos de cristal y trascienda los pisos lodosos que impiden el desarrollo armónico de las mujeres.
