[You and Your Arrhythmia: A Guide to Heart Rhythm Problems for Patients and Their Families](#) John A. Kastor, 2006-03-29

The Pacemaker Clinic of the 90's N.M. van Hemel, F.H. Wittkamp, Hugo Ector, 2012-12-06 Since the first pacemaker implantation in October 1958 by Senning and Elmqvist in Sweden cardiac pacing for bradycardia has become a well established therapy The impressive growth of clinical experience and the rapid development of pacemaker devices have greatly contributed to this situation The electrical therapy appears to be so easy that insertion of the lead and its connection to the pacemaker generator requires little effort skill or insight

However after implantation a patient's condition seldom remains stable which requires a flexible pacing program to cover all new cardiac events and broad insight from clinician and technical colleagues The Pacemaker Clinic of the 90's teaches anatomical and electrophysiological aspects of pacing supports the prevention of complications and points to new developments in the field Apart from classical indications for cardiac pacing the book discusses the validity of the latest indications supporting the cardiologist and the associated professional in selecting the appropriate pacing mode and pacemaker follow up in individual patients The Pacemaker Clinic of the 90's will be a helpful companion for years to come

Cardiac Pacing and Electrophysiology André Aubert, Hugo Ector, 2012-12-06 In 1992 clinical cardiac electrophysiology became a recognized sub speciality of the American Board of Internal Medicine The formal recognition of this highly specialized and technical field of medicine represents the culmination of thirty years of remarkable scientific and intellectual discovery Beginning in the 1950s cardiologists realized that cardiac arrhythmias were the cause of significant morbidity and the sudden death of at least 350 000 patients every year in the United States alone At that time the only tools available for analyzing abnormal heart rhythms were the standard EKG machine and careful deductive reasoning During the early 1960s cardiac pacemakers reflected the first foray in the electrical therapy of cardiac arrhythmias Pacemakers were first implanted in order to control syncopal episodes related to bradycardic heart rhythms Although crude

and bulky devices their utility was immediately obvious to physicians and patients alike The recognition that electrical signals could be recorded from inside the heart and that the heart's rhythm could be controlled by the application of electrical energy began the era of clinical cardiac electrophysiology which was to follow In the late 1960s and early 1970s and at the peak of the Vietnam conflict a group of cardiologists with special training in cardiac electrophysiology were sequestered at the US Public Health Service Hospital at Staten Island
