

The book includes an extensive and useful bibliography, which however, is somewhat dated. It includes only two items from 1977 and no later ones. The book also has an index which unfortunately suffers from being somewhat brief.

- 2 *Loc. cit.* It is doubtful that this captures more than the standard Judaeo-Christian-Islamic approaches – and even here it is questionable whether Walton's characterization is correct. St. Thomas Aquinas, for instance, denied sensation after death because it requires the existence of a material body. That is why he suggested that our *post mortem* mode of apprehension would be non-sensible. Cf. *Summa Theologiae* I: LXXX vii:8:r and *Summa Contra Gentiles* II:80–81:12 and II: 96, etc. The medieval Christian mystics, of course, e.g. Meister Eckhart and Ruysbroek were even more radical in their contentions.

This is one of a passel of similar books to appear during the last decade. Their stock-in-trade is an indictment of industrial civilization together with predictions of doom coupled with rather sanguine hopes for an emerging new world of small,

Humanism: In Command or in Crisis? Michael A. Schuler, 2023-08-31 According to bestselling historian Yuval Noah Harari today's average American has their foot in three ideological camps nationalism free market capitalism and humanism The first two might seem obvious but the third It's entirely possible that most who qualify for that label would be hard pressed to explain its meaning much less use it self descriptively This book is designed to serve two important purposes First to provide an accessible resource for anyone curious about the humanist tradition and the arguments advanced by leading contemporary proponents Second to address what the author believes is a critical question for our time the era of the Anthropocene Is humanism's seemingly benign package of values at least partially responsible for some of the world's most pressing problems To answer the last question Schuler draws from an elective collection of commentators including life scientists spiritual writers public intellectuals technologists novelists and even poets In the end this wide ranging survey will help the reader determine whether humanism makes sense for them

On the Origin of Beauty John Griffin, 2011-10-01 In the light of the looming ecological crisis facing the world today much of the stunning beauty of the natural world is being lost forever On the Origin of Beauty seeks to confront this crisis through a philosophical enquiry into our perception of natural beauty Through discussions of numerous fields including the philosophy of science environmental ethics rationalism and Eastern and Western religion Griffin asserts that Beauty itself may be the catalyst needed to save the globe from destruction

The Oxford Handbook of Humanism Anthony B. Pinn, 2021 As a system of thought that values human needs and experiences over supernatural concerns humanism has gained greater attention amid the rapidly shifting demographics of religious communities This outlook has taken on global dimensions with activists artists and thinkers forming a humanistic response not only to religion but to the pressing social and political issues of the 21st century The Oxford Handbook of Humanism aims to explore the subject by analyzing its history its philosophical development and its influence on culture It will also discuss humanism as a global phenomenon an approach that has often been neglected in more Western focused works

Is Man the Measure? Norman L. Geisler, 2005-07-06 An academically respectable description and evaluation of secular humanism is available at last The diversity within humanism receives full recognition in this book as does the fact that not everything about humanism is bad from a Christian point of view Indeed the author continues there are many emphases within humanism that are compatible with Christian beliefs a thesis to which he devotes an entire chapter Part 1 summarizes in turn eight prominent forms of humanism Huxley's evolutionism Skinner's behaviorism

Sartre's existentialism Dewey's pragmatism Marxism Rand's egocentrism Lamont's culturalism and the coalitional form present in the humanist declaration and manifestoes Emerging from these chapters are both the differences between humanists and the consensus that binds them together It is this humanistic consensus writes the author that most radically conflicts with Christian beliefs and that is the number one problem in the United States today After the chapter on the helpful emphases of secular humanism part 2 details this movement's comparative inferiority internal inconsistencies religious inadequacies and philosophical insufficiencies The final chapter demonstrates that while Christianity is consistent with the central principles of science philosophy epistemology and ethics humanism is not There is no rational justification the author concludes for being a humanist

Should God Get Tenure? David W. Gill, 2020-04-14 During the twentieth century theological and religious perspectives have been marginalized if not utterly excluded in many of our colleges and universities The essays in this book argue in different ways for the critical appreciative inclusion of theological and religious perspectives in higher education The contributors believe that even in our secular religiously disestablished era religion and God continue to occupy an important and dynamic role in personal and social life If our colleges and universities are to fulfill their higher aspirations of educating whole persons for the real world in all of its diversity and challenge we need to go bravely against the flow and give God tenure

The Rights of Nature Roderick Frazier Nash, 1989-01-17 Charting the history of contemporary philosophical and religious beliefs regarding nature Roderick Nash focuses primarily on changing attitudes toward nature in the United States His work is the first comprehensive history of the concept that nature has rights and that American liberalism has in effect been extended to the nonhuman world A splendid book Roderick Nash has written another classic This exploration of a new dimension in environmental ethics is both illuminating and overdue Stewart Udall His account makes history come alive Sierra So smoothly written that one almost does not notice the breadth of scholarship that went into this original and important work of environmental history Philip Shabecoff New York Times Book Review Clarifying and challenging this is an essential text for deep ecologists and ecophilosophers Stephanie Mills Utne Reader Landscape of the Soul W. Cooper,2007-12-27 Philosophers both western and eastern have long been divided between humanists for whom man is the measure of things and their opponents who claim that there is a way in principle knowable and describable that the world anyway is independent of human perspectives and interests The early chapters of *The Measure of Things* chart the development of humanism from medieval times through the Renaissance Enlightenment and Romantic periods to its most sophisticated twentieth century form existential humanism Cooper does not identify this final position with that of any particular philosopher though it is closely related to those of Heidegger Merleau Ponty and the later Wittgenstein Among the earlier figures discussed are William of Ockham Kant Herder Nietzsche and William James Having rejected attempts by contemporary advocates of modest or non metaphysical realism to dissolve the opposition between humanism and its absolutist rival Cooper moves on to an adjudication of that rivalry Prompted by the pervasive rhetoric of hubris that the rivals direct against one another he argues in an original manner that the rival positions are indeed guilty of lack of humility Absolutists whether defenders of The Given or scientific realists exaggerate our capacity to ascend out of our engaged perspectives to an objective account of the world Humanists conversely exaggerate our capacity to live without a sense of our subjection to a measure independent of our own perspectives The only escape Cooper maintains from the impasse reached when humanism and absolutism are both rejected lies in a doctrine of mystery There is a reality independent of the human contribution but it is necessarily ineffable Drawing in a novel way upon the Buddhist conception of emptiness and Heidegger's later writings the final chapters defend the notion of mystery distinguish the doctrine advanced from that of transcendental idealism and propose that it is only through appreciation of mystery that measure and warrant may be provided for our beliefs and conduct

Byzantine Incursions on the Borders of Philosophy Bruce V. Foltz,2019-08-21 This book represents a series of incursions or philosophical forays between realms of Byzantine and Russian thought and territory long claimed by Western philosophy and theology Beginning with thoughts inevitably rooted in the West it seeks to penetrate as deeply as possible into Byzantine and Russian philosophical and spiritual landscapes and to return with fresh insights These are also incursions that move back and forth between the visible and the invisible realms in the traditions of Plato and his successors as well as the great monastics of Eastern Christianity Foltz argues from various perspectives that the problematic relation between transcendence and immanence finds its answer in the philosophical and theological legacy of Eastern Christian thought which has always sought to bring together strands tenaciously held separate in the West This book transports contemporary readers to an ancient conceptual landscape as it expertly handles both Western and Byzantine ideas with a familiarity unusual to contemporary scholars It is essential reading for all those wishing to engage the heart of Byzantine thought and employ its lessons to address the problems which plague Western philosophy and culture

Ecoaesthetics and Ecosophy in China Cheng Xiangzhan,2023-10-09 Chinese ecoaesthetics which originated in 1994 has developed theoretically over the last 30 years This branch of aesthetics which is based on ecology and to transform aesthetically

towards the era of ecological civilization uses ecological realism as its philosophical foundation and ecohumanism as its guiding principles Its central aesthetic paradigm is known as the body mind environment model Its main research object is ecological aesthetic appreciation an exploration of how to appreciate aesthetics and ecology through ecological beauty Additionally ecohumanism can be further improved by referring to principles of ecology and examining the aesthetic synergies between humans and the earth s ecosystem Ultimately ecohumanism is not only a method to aid in survival in an ecological crisis but to elevate the human condition through assuming ecological responsibilities and promoting ecological civilization leading to a more valuable and meaningful life The theme of this book Ecosophy C can be summarized as Moving toward the Aesthetics of Eternal Engendering Its key phrase Creating life corresponds to shengsheng in Chinese literally implying a continuous cycle of reproduction Philosophically this concept translates to eternal engendering In essence ecoaesthetics is the pursuit of the endless cycling of bio engendering which is the main goal of ecoaesthetics Cheng Xiangzhan is outstanding among Chinese environmental aestheticians in joining classical and contemporary Western environmental aesthetics with his original contributions to the more recent work by Chinese scholars Cheng s creative and integrative accomplishments are supported by a remarkable facility in English and reflected in his original and systematic consideration of the outstanding issues While much can be debated there is substantial material here and this book makes a signal contribution to carrying the discussion forward Arnold Berleant distinguished environmental aesthetician His latest book The Social Aesthetics of Human Environments will appear in September 2023

Rational Landscapes and Humanistic Geography Edward Relph, 2015-07-30 This book first published in 1981 explores why it is that the modern built environment while successfully providing material comfort and technical efficiency none the less breeds despair and depression rather than inspires hope and commitment The source of this paradox where material benefits

appear to have been gained only at the expense of intangible values and qualities is found in humanism the persistent and powerful belief that all problems can be solved through the use of human reason But humanism has become increasingly confused rationalistic callously devoted to efficiency and authoritarian These confusions and contradictions together with the anti nature stance of humanism and its failure to teach humane behaviour lead the author to conclude that humanism is best rejected Such rejection does not advocate the inhuman and anti human but requires instead a return to the humility that lies at the origin of humanism a respect for objects creatures environments and people This environmental humility is explored in the context of individuality of settings ways of seeing landscapes appropriation and ways of building places This title will be of interest to students of human geography

Textures of Place Paul C. Adams, Steven D. Hoelscher, Karen E. Till, 2001 A fresh and far ranging interpretation of the concept of place this volume begins with a fundamental tension of our day as communications technologies help create a truly global economy the very political economic processes that would seem to homogenize place actually increase the importance of individual localities which are exposed to global flows of investment population goods and pollution Place no less today than in the past is fundamental to how the world works The contributors to this volume distinguished scholars from geography art history philosophy anthropology and American and English literature investigate the ways in which place is embedded in everyday experience its crucial role in the formation of group and individual identity and its ability to reflect and reinforce power relations Their essays draw from a wide array of methodologies and perspectives including feminism ethnography poststructuralism ecocriticism and landscape ichnography to examine themes as diverse as morality and imagination attention and absence personal and group identity social structure home nature and cosmos

Environment and Social Theory John Barry, 2007-01-24 This thematic rather than theorist centred approach is an essential guide to the way in which the environment and social theory relate to one another including examinations of the works of the key theorists including Marx Mill Habermas and Adorno

Gospel of the Open Road Robert C. Gordon, PhD, 2001-01-28 Gospel of the Open Road reclaims Ralph Waldo Emerson Walt Whitman and Henry David Thoreau as Americas spiritual birthright It rescues them from literary history and reveals them in their true light as democracys prophets of the soul Emerson Whitman and Thoreau were religious seers who developed a new form of spirituality and Gospel of the Open Road explains in scholarly yet passionate fashion the deep wisdom that is their enduring legacy It presents them as a viable spiritual path for those who do not belong and do not want to belong to any organized religion But this book does more It draws fascinating parallels between the new spirituality taught by Emerson Whitman Thoreau and ancient spiritual wisdom as found in shamanism Goddess worship Tantra Taoism Confucianism Vajrayana and Zen Buddhism and Hinduism This book is an evocative synthesis of humanitys most venerable spiritual wisdom and the most modern of philosophical social psychological political scientific and Humanistic concepts It traces the New Age spiritual revolution to its source in Emerson Whitman and Thoreau and explains how to apply their spiritual teachings to our everyday
