Arrow Of Time And Reality In Search Of A Conciliation:

Arrow Of Time And Reality: In Search Of A Conciliation Anne Magnon, 1997-12-04 What is Reality What is the role of human consciousness in the shaping of such a concept These questions are as old as mankind and gave rise to the MIND MATTER dualism which preoccupied so many physicists Schrödinger Wigner etc This book considers the problem within the realm of contemporary physics and shows that it could be related to that of ultimate entities The author develops the viewpoint according to which human thinking activities are fruit of the Cosmos and of its combinatorial activity Ultimate entities the bricks out of which our universe is made could be hidden as a primordial alphabet in the foundations of the pyramid of increasing complexity which seems to unfold as a language and to culminate in the emergence of organized and thinking structures This is analyzed in the context of cosmological screening and horizons an expression of our lack of access to totality where macroscopic and microscopic can mingle where a unification of interactions and a matching of available arrows of time can take place This context is also that of quantum evaporation of particle antiparticle like entities which triggers entropy increase and of the overlap between General Relativity and Quantum Mechanics The problem of an global origin of the cruising and evanescent Now is considered A creative principle reminiscent of the biological mitosis is also presented which is the generator of the event through breaking of temporal symmetry In this perspective time flow is an emergent concept Creation of the World is declined priority on the concept of coming into existence Participant to the origin of the World all possibly virtual processes are able to culminate into the phenomenon of consciousness and Self Awareness

Identification Of Dark Matter, The - Proceedings Of The Fifth International Workshop Neil J C Spooner, Vitaly Kudryavtsev, 2005-05-12 The prestigious Identification of Dark Matter workshop series was initiated to assess the status of work that attempts to identify the constitution of dark matter In particular it aims to review the success of current methods that are used in the search for dark matter as well as the new techniques that are likely to improve prospects for detecting possible dark matter candidates in the future In the 5th International Workshop special emphasis was placed on the recent results obtained in experiments searching for baryonic and non baryonic dark matter This volume comprises the high quality review articles and papers contributed by leaders and promising young physicists who attended the conference It provides the most recent updates on dark matter searches from both experimental and theoretical points of view The proceedings have been selected for coverage in Index to Scientific Technical Proceedings ISTE ISI Proceedings Index to Scientific Technical Proceedings ISTE CDROM version ISI Proceedings CC Proceedings Engineering Physical Sciences [Symmetries in Physics](#) François Gieres, 1997 **Language, Space, and Social Relationships** Giovanni Bennardo, 2009 This book discusses the relationship between language and the mental organisation of knowledge and is based on the results of a fieldwork project carried out in the Kingdom of Tonga It challenges some existing assumptions and proposes a new foundational cultural model radiality to show how space time and social relationships are expressed both linguistically and
