Image and Territory Jennifer Burwell, Monique Tschofen, 2007 In a culture that often understands formal experimentation or theoretical argument to be antithetical to pleasure Atom Egoyan has nevertheless consistently appealed

to wide audiences around the world If films like *The Adjuster* *Calendar Exotica* and *The Sweet Hereafter* have ensured him international cult status as one of the most revered of all contemporary directors Egoyan's forays into installation art and opera have provided evidence of his versatility and confirmed his talents Throughout his career Atom Egoyan has shown himself to possess the rarest kind of singularity As Jonathan Romney puts it Egoyan's preoccupations and tropes have been so consistent that he's practically created his own genre³ 1995 8 Hrag Vartanian adds 2Egoyanesque has become a word to film aficionados commonly understood to mean a cinematic moment that examines sexuality technology and alienation in the modern world³ 2004 For this singularity Egoyan is widely hailed as a true auteur someone carrying on the legacy of the European art house traditions of Bergman Godard and Truffaut Certainly his work bears a most recognizable signature there is no confusing an Egoyan work with anyone else's Like his art house predecessors Egoyan clearly intends that his work be as Dudley Andrew puts it 2read rather than consumed 3 that is viewed meditatively reflected upon and discussed 2000 24 And indeed in this world in which filmmaking has become commonplace where as Egoyan has said 2what used to be a rarified activity is now available to anyone with a digital camera and a computer³ 2001b 18 he intends through much of his work to recall an earlier image culture in which artists had an ability to produce something that gained its power precisely through its rarity

Congress. House. Committee on Education, 1970 **The Projective Use Of Mother-And- Child Drawings: A Manual** Jacquelyn Gillespie, 2013-08-21 A unique and powerful new projective technique is now available to mental health professionals Based on the most primary of human relationships that between mother and child this technique is able to foster projections and identify perceptions of self and others that carry an unusually strong component of unconscious material Strikingly clear and accessible *The Projective Use of Mother and Child Drawings* is one of the few books on projective techniques to provide a consistent theoretical outlook and to address the very significant issues of transference and countertransference as they relate to this technique While firmly grounded in a psychodynamic view of personality development the volume also conveys a clinical outlook with applications suitable to a variety of theoretical paradigms The author comprehensively considers the theoretical and practical aspects of mother and child drawings and how to both use and assess them to gain insight into the most fundamental reaches of the self She consistently cautions against overly simplified interpretations of the drawings and stresses the importance of using conclusions drawn from them only as indications for further assessment confirmation or rejection The book is replete with examples of mother and child drawings from all age groups in both average populations and those with both mental and physical pathologies The volume opens with a careful discussion of the theoretical

considerations behind mother and child drawings as well as the development and validation of projective drawing techniques in general The next section on research issues discourages diagnostic labeling in favor of making optimum use of the highly personal and idiosyncratic nature of these drawings This chapter features an interesting attempt to classify mother and child drawings in relation to size of the figures A particularly fascinating chapter on the impact of art on the therapist focuses on artwork done by professional artists who have addressed the mother and child theme The author explores and analyzes several thematic works of art from varying time periods and cultures It is her intent to help mental health professionals to explore their responses to pictorial art as individuals and thereby gain new understandings of related transference and countertransference issues with clients Chapter four provides clear instructions for administering mother and child drawings as a projective technique and guidelines for their interpretation This section provides samples and analyses of age typical drawings from the general population They vary greatly in style and artistic proficiency and are included to provide an idea of the usual developmental sequence of drawing characteristics from early childhood through the adult years Drawings of groups with demonstrated psychological pathologies or physical and developmental abnormalities comprise the final chapter This section approaches the interpretation of drawings by asking questions about how they communicate basic self and object relations issues This commanding volume of interest to students and professionals alike will provide art therapists school psychologists and mental health practitioners of all stripes with a powerful new projective technique to add to their professional armamentarium
