Paradoxa ,2007 International feminist WACK! Cornelia H. Butler, 2007 Written entries on each artist offer key biographical and descriptive information and accompanying essays by leading critics art historians and scholars offer new perspectives on feminist art practice The topics provide a broad social context for the artworks themselves Cinematic Appeals Ariel Rogers, 2013-10-22 Cinematic Appeals follows the effect of technological innovation on the cinema experience specifically the introduction of widescreen and stereoscopic 3D systems in the 1950s the rise of digital cinema in the 1990s and the transition to digital 3D since 2005 Widescreen films drew the spectator into the world of the screen enabling larger than life close ups of already larger than life actors The technology fostered the illusion of physically entering a film enhancing the semblance of realism Alternatively the digital era was less concerned with manipulating the viewer's physical response and more with generating information flow awe disorientation and the disintegration of spatial boundaries This study ultimately shows how cinematic technology and the human experience shape and respond to each other over time Films discussed include Elia Kazan's East of Eden 1955 Star Wars The Phantom Menace 1999 The Matrix 1999 and Thomas Vinterberg's Theories of Performance: Kélina Gotman, 2022 Theories of Performance Critical and Dogme film The Celebration 1998 Primary Sources offers a comprehensive collection of key writings on a subject which has come to permeate fields as diverse as theatre comparative literature philosophy geography history English science and technology studies in what has been termed the transdisciplinary performative turn The collected essays draw upon writing from these diverse disciplines together illustrating how performance has become an ever more vibrant and plastic discursive practice It includes perspectives from regions and disciplines less well represented in performance theory up to now including from East Asia and the Middle East as well as from material sciences and engineering physics and education theory Selections also include indigenous and otherwise politically marginalized perspectives from within and outside the academic field of Performance Studies Each volume is introduced by the editor and arranged thematically with writings in chronological sequence so that the development of ideas can be traced within a theme The set includes 90 essays covering the following major areas

The methods for preserving and managing them over time ensuring easy access of such materials in systematic archives and collections requires professional attention in its own right Through the process of documenting performance artists acquire a different perspective on their own work audiences can recall specific images and sounds for works they have witnessed in person and others who did not see the original work can trace the memories of particular events or use them to gain an understanding of something that would
