Hypothetical Spacecraft and Interstellar Travel Ezekiel Nygren, 2015-02-28 Hypothetical Spacecraft and Interstellar Travel collects information about the latest and greatest hypothetical spacecraft **Space Elevator** Fouad Sabry, 2022-10-25 What Is Space Elevator One concept for a transportation system that would link planets to space is called a space elevator A cable that is attached to the surface and extends into space would be the primary component of this system Without the need for huge rockets the architecture of the system would enable vehicles to ascend the cable from the surface of a planetary body such as the surface of the Earth and enter orbit directly Because of the enormous weight a space elevator based on Earth could not simply be a tall tower supported from below Instead it would consist of a cable with one end attached to the surface near the equator and the other end attached to a counterweight in space beyond geostationary orbit This would allow the elevator to move between the surface and the counterweight The opposing forces of gravity which is stronger at the lower end and the upward centrifugal force which is stronger at the upper end would result in the cable being held up under tension and stationary over a single position on Earth Gravity is stronger at the lower end while the upward centrifugal force is stronger at the upper end After the tether has been deployed climbers will be able to use mechanical methods to repeatedly ascend and descend the tether in order to release their payload into and out of orbit How You Will Benefit I Insights and validations about the following topics Chapter 1 Space elevator Chapter 2 Interplanetary spaceflight
