The king of Prussia from 1740 to 1786 Frederick the Great ranks among eighteenth century Europe's most enlightened rulers. In addition to abolishing serfdom in his domains and promoting religious tolerance, he was an ardent patron of the arts and an accomplished musician. Diplomacy without arms, he observed, is like music without instruments. Frederick's expertise at military matters is reflected in his successful defense of his territory during the Seven Years War, in which he fought all the great powers of Europe. His brilliant theories on strategy, tactics, and discipline are all explained in this vital text. War is not an affair of chance, Frederick asserted, adding that a great deal of knowledge, study, and meditation is necessary to conduct it well. In this book, he presents the fundamentals of warfare, discussing such timeless considerations as leadership qualities, the value of surprise, and ways to conquer an enemy who possesses superior forces. The soundness of his advice was endorsed by Napoleon himself, who once advised: Read and re-read the campaigns of Alexander, Hannibal, Caesar, and Frederick. This is the only way to become a great captain and to master the secrets of the art of war.

Disobedience and Conspiracy in the German Army, 1918-1945 Robert B. Kane, 2008-04-24 This work examines among other topics the personal oath of loyalty that the officers of the German army swore to Adolf Hitler on August 2, 1934. It discusses how the majority of officers, those who did not become conspirators against him, complied with Hitler's orders until May 1945, despite his cruel treatment of soldiers, militarily unsound strategy and tactics, and the widespread destruction and crimes he and his forces committed. The oath taken by the officers had a strong psychological effect among a proud corps with a long history of obedience and honor. They followed Hitler to the end, even though they knew they were fighting a losing battle. The author also examines why and how only a few officers, the conspirators, began to break away, lose trust in Hitler, oppose him, and finally stage an assassination attempt. This history traces the development within the German army from 1918 of the philosophies of loyalty and disloyalty, obedience and disobedience, as challenged by the Hitlerian oath of loyalty.

Frederick the Great Charles Booth Brackenbury, 1890 **Studies in Battle Command**, 1995 This study consists of a series of essays analyzing various combat engagements and military leaders throughout history. The unifying theme of these essays was provided by the direct or indirect application to each case of the five Battle Command competencies. The battles, operations, and leaders discussed in the chapters that follow range over the historical landscape from Gustavus Adolphus in the seventeenth century to Hamburger Hill in Vietnam. They include examples of brilliant success and dismal failure. Most of all, they offer today's military professional perspective and insight into the essence of their calling: command and leadership.
