Around The Houses:

No Place Like Home: Ancient Near Eastern Houses and Households Laura Battini, Aaron Brody, Sharon R. Steadman, 2022-10-06 This book had its genesis in a series of 6 popular and well attended ASOR conference sessions on Household Archaeology in the Ancient Near East The 18 chapters are organized in three thematic sections Architecture as Archive of Social Space The Active Household and Ritual Space at Home **Adpositions** Dennis Kurzon, Silvia Adler, 2008 This book is a collection of articles which deal with adpositions in a variety of languages and from a number of perspectives Not only does the book cover what is traditionally treated in studies from a European and Semitic orientation prepositions but it presents studies on postpositions too The main languages dealt with in the collection are English French and Hebrew but there are articles devoted to other languages including Korean Turkic languages Armenian Russian and Ukrainian Adpositions are treated by some authors from a semantic perspective by others as syntactic units and a third group of authors distinguishes adpositions from the point of view of their pragmatic function This work is of interest to students and researchers in theoretical and applied linguistics as well as to those who have a special interest in any of the languages treated *Neighbourhoods and Public Health* Uzma Ajmal, Saleha Jamal, 2023-11-06 This book examines the concept of neighbourhood over space and time and understands how neighbourhoods can impact human health and well being It discusses the identification of neighbourhood boundaries features of individual neighbourhoods and the concept of neighbourhood in some major world as well as Indian cities Based on extensive research this study refers to both primary as well as secondary sources of data using various statistical and geo spatial techniques The first section of the book focuses on the concept of neighbourhood concept of neighbourhood unit methods used in the identification of neighbourhood boundaries and theories related to neighbourhood effects on health The subsequent section of the book deals with a case study on neighbourhood effects on health in an Indian city The case study is followed by a comparison of its results with other global studies This book will be useful to the departments of Geography Public Health Sociology and Social Work It will also be of use to professionals and practitioners like city planners architects NGOs Environmentalists and urban policy makers **The Abandonment of Settlements and Regions** Catherine M. Cameron, Steve A. Tomka, 1993-07-08 Groups of people abandoned sites in different ways and for different reasons And what they did when they left a settlement or area had a direct bearing on the kind and quality of cultural remains that entered the archaeological record for example whether buildings were dismantled or left standing or tools buried destroyed or removed from the site Contributors to this unique collection on site abandonment draw on ethnoarchaeological and archaeological data from North and South America Europe Africa and the Near East *Bronze Age Settlements in the Low Countries* Harry Fokkens, 2008-06-04 The Low Countries around the deltas of the river Rhine Meuse and Scheldt have a long tradition in large scale archaeological research This book brings together research from thirteen of the largest Bronze Age settlements described by their original excavators These

contributions are preceded by two introductory chapters written by the editors providing a full overview of the state of Dutch Bronze Age settlement research the key sites and the explanatory models current within it Standards have been developed for the analysis of Bronze Age house plans and settlement sites and new models for the reading of the settled landscape The rich data of the Low Countries also incorporate burial areas and deposition places The findings presented can be seen to reflect the situation over a large area of lands bordering the North Sea **The Annals of Scottish Natural History** ,1896

Steering Sustainability in an Urbanising World Dr Anitra Nelson,2012-11-28 Sustainability has become the key challenge for urban planners housing and infrastructure policy makers Citizens are increasingly encouraged to live more compactly in denser urban developments to use less water and other natural resources and to choose public transport While councils government agencies and private business invest in a broad range of promotions offering discounts on sustainable products and services uptake has been slow and the impacts marginal at a time when environmental stresses suggest that we must act fast This book examines this pressing problem in a holistic way discussing broad scale sustainability policies and programmes for achieving sustainable urban futures It brings together academics and practitioners to analyze the complexity and interdependence of principles models processes and practices of sustainability in a range of integrated sectors as well as the establishment and maintenance of sustainable physical infrastructure in cities *Federal Register* ,1983-10-03 Sir Arthur Newsholme and State Medicine, 1885-1935 John M. Eyler,2002-08-15 The half century between 1885 and 1935 witnessed an unprecedented expansion of preventive and therapeutic services offered by the state through its local authorities Behind the expansion in public services were also profound changes in attitudes toward poverty and dependency and toward the political and cultural significance of health changes in social policy and administration and changes in the understanding of the causes of disease This book examines this time of change through the ideas and experiences of one prominent participant Sir Arthur Newsholme Professor Eyler draws particular attention to Newsholme s role in constructing a highly successful local health programme his tenure as the Medical Officer of the Local Government Board in Whitehall where he launched some of its boldest programmes including national health insurance his post retirement studies of international health systems and his statistical and epidemiological studies and their connection to his policy recommendations Yuendumu Everyday Yasmine Musharbash,2008 This book explores intimacy immediacy and mobility as the core principles underpinning contemporary everyday life in a central Australian Aboriginal settlement It analyses an everyday shaped through the interplay between a not so distant hunter gatherer past and the realities of living in a first world nation state by considering such apparently mundane matters as What is a camp How does that relate to houses Who sleeps where and next to whom Why does this constantly change What and where are the public private boundaries And most importantly How do Indigenous people relate to each other Employing a refreshingly readable writing style Musharbash includes rich vignettes including narrative portraits of five Warlpiri women Musharbash s descriptions and analyses of their

actions and the situations they find themselves in transcend the general and illuminate the personal She invites readers to ponder the questions raised by the book not just at an abstract level but as they relate to people's actual lives In doing so it expands our understandings of Indigenous Australia Integral Methods in Science and Engineering Christian Constanda,1994-12-12 Integral methods are among the most powerful techniques for investigating real life phenomena translated into mathematical models This book contains a number of contributions to the development and application of such techniques in the context of linear and nonlinear problems in elasticity fluid dynamics and mathematical physics The procedures featured in the volume include vortex methods analytic and numerical methods hybrid numerical schemes integral equation approaches and conservation laws The articles were presented by their authors at the Third International Conference on Integral Methods in Science and Engineering IMSE 93 27-29 August 1993 at Tohoku University Sendai Japan
