Andrade, 2013-07-25 By engaging with recent developments in the study of empires this book examines how inhabitants of Roman imperial Syria reinvented expressions and experiences of Greek Roman and Syrian identification It demonstrates how the organization of Greek communities and a peer polity network extending citizenship to ethnic Syrians generated new semiotic frameworks for the performance of Greekness and Syrianness Within these Syria s inhabitants reoriented and interwove idioms of diverse cultural origins including those from the Near East to express Greek Roman and Syrian identifications in innovative and complex ways While exploring a vast array of written and material sources the book thus posits that Greekness and Syrianness were constantly shifting and transforming categories and it critiques many assumptions that govern how scholars of antiquity often conceive of Roman imperial Greek identity ethnicity and culture in the Roman Near East and processes of hybridity or similar concepts **Jews in Byzantium** Robert Bonfil, 2011-10-14 Byzantine Jews Dialectics of Minority and Majority Cultures is the collective product of a three year research group convened under the auspices of Scholion Interdisciplinary Research Center in Jewish Studies at the Hebrew University of Jerusalem The volume

From Idols to Icons Robin M. Jensen,2022-09-13 From Idols

to Icons tells the fascinating history of the dramatic shift in Christian attitudes toward sacred images from the third through the early seventh century. From attacks on the cult images of polytheism to the emergence of Christian narrative iconography to the appearance of portrait type representations of holy figures, this book examines the primary theological critiques as well as defenses of holy images in light of the surviving material evidence for early Christian visual art. Against the assumption that fourth and fifth century Christians simply forgot or ignored their predecessors' censure and reverted to more alluring pagan practices, Robin M. Jensen contends that each stage of this profound change was uniquely Christian. Through a careful consideration of the cult of saints, remains, devotional portraits, and pilgrimage to sacred sites, Jensen shows how the Christian devotion to holy images came to be rooted in their evolving conviction that the divinity was accessible in and through visible objects. Even the briefest glance at a museum's holdings or an introductory textbook demonstrates how profoundly influential this belief would be on the course of Western art for the next fifteen hundred years.

Crossing Boundaries in Early Judaism and Christianity Kimberley Stratton, Andrea Lieber, 2016-10-11. This volume celebrates the scholarship of Alan Segal. During his prolific career, Alan published ground-breaking studies that shifted scholarly conversations about Christianity, rabbinic Judaism, Hellenism, and Gnosticism. Like the subjects of his research, Alan crossed many boundaries. He understood that religions do not operate in academically defined silos but in complex societies populated by complicated human beings. Alan's work engaged with a variety of social scientific theories that illuminated ancient sources and enabled him to reveal new angles on familiar material. This interdisciplinary approach enabled Alan to propose often controversial theories about Jewish and Christian origins. A new generation of scholars has been nurtured on this approach, and the fields of early Judaism and Christianity emerge radically redefined as a result.

Art and Architecture of the Synagogue in Byzantine Palaestina Asaf Friedman, 2019-05-24. The Byzantine era was a time of the formation of the Abrahamic religions and a battleground for people's hearts and minds. This book shows that during the time of the Byzantine Empire, the synagogues in Palaestina developed a visual language adhering to traditional literary sources. Until now, scholars believed that Judaism was oblivious to all art forms, regarding them as mere decoration. This book shows that contrary to those beliefs, Jewish art was in fact flourishing in this period. The visual language that emerged is a trope that utilizes literal and figurative readings to arrive at an inquisitive mixture, a probing language that facilitates learning. It is a visual language of becoming, of inward introspection and outward scrutiny. This new analysis goes beyond the limits of compositional rules and requires an analytical as well as emotive thought process to form a cultural interpretation that reveals the hidden language. This means that some parts of Judaism and some parts of Christianity were in agreement despite the commandment of "Thou shalt not make unto thee any graven image" and operated under the assumption that paintings were not necessarily the creation of idols. Thus, we see that the modern movements of art and architecture were not the first to deal with images through themes such as abstraction and denotation. The language developed during the Byzantine period could rival the best of such visual
