Art & language in practice: Simposi crític Michael Baldwin, Charles Harrison, Mel Ramsden, 1999 *Essays on Art and Language* Charles Harrison, 2003-09-12 Critical and theoretical essays by a long time participant in the Art Language movement These essays by art historian and critic Charles Harrison are based on the premise that making art and talking about art are related enterprises They are written from the point of view of Art Language the artistic movement based in England and briefly in the United States with which Harrison has been associated for thirty years Harrison uses the work of Art Language as a central case study to discuss developments in art from the 1950s through the 1980s According to Harrison the strongest motivation for writing about art is that it brings us closer to that which is other than ourselves In seeing how a work is done we learn about its achieved identity we see for example that a drip on a Pollock is integral to its technical character whereas a drip on a Mondrian would not be Throughout the book Harrison uses specific examples to address a range of questions about the history theory and making of modern art questions about the conditions of its making and the nature of its public about the problems and priorities of criticism and about the relations between interpretation and judgment

of theatre and performance including score document embodiment documentation relic remains and the narrative recuperation of ephemeral work While showing how performance has been integral to Conceptual art s critiques of prevailing assumptions about art s form purpose and meaning this volume also considers the reach and influence of Conceptual performance into recent thinking and practice This book will be of interest to scholars and students of theatre performance contemporary art and art history *A Show of Hands* Ileana Parvu,2024-12-13 In contrast to the divide between conception and execution advocated by Anglo American artists in the second half of the 1960s this book reappraises conceptual art by examining it from the perspective of craft The emphasis on craft shifts the focus from the Western art system to its margins where creators were relegated to the status of mere artisans in the colonial context on the pretext that attaining that of artists was beyond their reach From this peripheral point of view the book shows that work carried out with artisanal means can lead to conceptual practice Moreover this shift in perspective provides a new understanding of several positions within conceptualism which ultimately appears as an ongoing reflection on the role of the hands making and craft Look inside
