study's geographically, temporally, and architecturally inclusive approach framed by the concept of multiple modernities questions the application of conventional theories of modernity or post colonialism to the Chinese situation. By challenging conventional modernist historiography that has marginalised the experiences of the west's other for much of the last century, this book proposes different ways of grappling with and comprehending the distinction and complexity of China's experiences and its encounter with architectural modernity.

*The Arts of China* Hugo Munsterberg, 1972 *Art and Architecture of China* Sheila Hollihan-Elliott, 2011-09 *The Condition of Chinese Architecture* Pier Alessio Rizzardi, Zhang Hankun, 2018. In China, 1% of the world's architects have to design 50% of all the buildings and must do so for 15% of the profit. This extreme situation in which architects have to operate, design and build, creates the theoretical basis for *The Condition of Chinese Architecture*. In addition to interviewing the critical voices of contemporary Chinese architecture, the authors report the nowadays reality of the country, the architectural evolution since the first contacts with the West in 1582, and the issues affecting its contemporary practice. The result is a groundbreaking cumulative reckoning teased out through layers of personal accounts and cross disciplinary research drawing on architecture, aesthetics, philosophy, politics, and society. 2018 TCA Think Tank.
