Art Autoradiography Insights Into The Genesis Of Paintings By Rembrandt Van Dyck Vermeer:

Art and Autoradiography Maryan W. Ainsworth, 1982 This book reports the most significant results of a scientific study of thirty nine paintings in The Metropolitan Museum of Art The works under investigation are by seventeenth century Dutch and Flemish artists mainly Rembrandt and his school Art and Autoradiography publishes data obtained by the use of a new technique neutron activation autoradiography Through this method it is now possible to study the substructure of paintings their genesis and their condition in far greater detail than had been possible with the conventional techniques of X ray radiography and infrared photography As a result an artist s creative process can now be studied very closely Autoradiography provides significant information for resolving questions about an artist s oeuvre and about workshop variations attribution dating and even doubted authenticity Metropolitan Museum of Art website **Art and**

Autoradiography ,1987 *Art and Autoradiography* Maryan Winn Ainsworth, 1987-09-01 Results of a scientific study of the substructure of thirty nine paintings in the Metropolitan Museum s collections **A Corpus of Rembrandt Paintings IV** Ernst van de Wetering, 2010-07-19 Volume IV of A Corpus of Rembrandt Paintings deals uniquely with the self portraits of Rembrandt In a clearly written explanatory style the head of the Rembrandt Research Project and Editor of this Volume Ernst van de Wetering discusses the full body of work of paintings and etchings portraying Rembrandt He sets the different parameters for accepting or rejecting a Rembrandt self portrait as such whilst also discussing the exact working environment of Rembrandt and his apprentices This workshop setting created a surroundings where apprentices could be involved in working on Rembrandt paintings making it more difficult to determine the hand of the master Van de Wetering who is one of the Rembrandt experts of our day and age goes down to great detail to explain how the different self portraits are made and what techniques Rembrandt uses also giving an overview of which paintings are to be attributed to the Dutch Master and which not In the additional catalogue the self portraits are examined in detail In clear and accessible explanatory text the different paintings are discussed larded with immaculate images of each painting Details are shown where possible as well as the results of modern day technical imaging like X radiography This work of art history and art research should be part of every serious art historical institute university or museum Nowhere in the art history have all Rembrandt s self portraits been discussed in such detailed and comparative manner by an authority such as Ernst van de Wetering This is a standard work for decades to come **An Entrance for the Eyes** Martha Hollander, 2002-03-20 How refreshing how absolutely refreshing

to find a book on Dutch painting that asks readers to begin by simply looking Hollander is faithful to the possibility so common in painting so unusual in scholarship that the paintings are elusive evasive unsystematically ambiguous Doors ajar windows onto the street paintings within paintings half drawn curtains blank mirrors a man s coat hung on a nail those are the engines of interpretation and Hollander tells their history lucidly and entirely persuasively James Elkins author of *The Object Stares Back* Hollander offers fresh and compelling readings of key works by Karel van Mander Gerard Dou Nicolaes

Maes and Pieter de Hooch Very few recent books on Dutch art are as rich as this and few are written in such lucid unpretentious prose What shines forth from every page is a genuine love of the pictures Here is art history well tempered to the objects it interprets Joseph L Koerner author of *The Moment of Self Portraiture in German Renaissance Art* In recent years scholars have explored how space signifies in seventeenth century Dutch art and culture Hollander's fascinating study is the most comprehensive to date It examines space as conceived in the writings of Dutch art theorists constructed in contemporary architecture and disposed and made meaningful in the work of Gerard Dou Nicolaes Maes Pieter de Hooch and Karel van Mander An Entrance for the Eyes lays a firm foundation for research on this intriguing and hitherto understudied aspect of Dutch art Wayne E Franits author of *Paragons of Virtue Women and Domesticity in Seventeenth Century Dutch Art*

A Corpus of Rembrandt Paintings J. Bruyn, B. Haak, S.H. Levie, P.J.J. van Thiel, 2013-05-14 Since the second half of the last century art historians realizing that the image of Rembrandt's work had become blurred with time have attempted to redefine the artist's significance both as a source of inspiration to other artists and as a great artist in his own right In order to carry on the work started by previous generations a group of leading Dutch art historians from the university and museum world joined forces in the late 1960s in order to study afresh the paintings usually ascribed to the artist The researchers came together in the Rembrandt Research Project which was established to provide the art world with a new standard reference work which would serve the community of art historians for the nearby and long future They examined the originals of all works attributed to Rembrandt taking full advantage of today's sophisticated techniques including radiography neutron activation autoradiography dendrochronology and paint sample analysis thereby gaining valuable insight into the genesis and condition of the paintings The result of this meticulous research is laid down chronologically in the following Volumes *A Corpus of Rembrandt Paintings* Volume I which deals with works from Rembrandt's early years in Leiden 1629-1631 published in 1982 THIS VOLUME *A Corpus of Rembrandt Paintings* Volume II covering his first years in Amsterdam 1631-1634 published in 1986 *A Corpus of Rembrandt Paintings* Volume III goes into his later years of reputation 1635-1642 published in 1990 Each Volume consists of a number of Introductory Chapters as well as the full Catalogue of all paintings from the given time period attributed to Rembrandt In this catalogue each painting is discussed and examined in a detailed way comprising a descriptive an interpretative and a documentary section For the authenticity evaluation of the paintings three different categories are used to divide the works in A Paintings by Rembrandt B Paintings of which Rembrandt's authorship cannot be positively either accepted or rejected and C Paintings of which Rembrandt's authorship cannot be accepted This volume Volume II contains 900 pages starting of with five introductory chapters and discussing 101 paintings In clear and accessible explanatory text all different paintings are discussed larded with immaculate images of each painting Details are shown where possible as well as the results of modern day technical imaging *Rembrandt's Enterprise* Svetlana Alpers, 1990 Drawing on and furthering the enterprise of Rembrandt scholars who have been reinterpreting the

artist and his work over the past 25 years Alpers presents new considerations about Rembrandt's handling of paint his theatrical approach to his models his use of his studio as an environment under his control and his relationship to those who bought his work Her study is timely in light of recent research showing that well known works attributed to Rembrandt are by followers instead Alpers developed her text from a lecture series and the prose gains readability by retaining some of the flavor of a talk Still this will find its audience chiefly among scholars and specialists in the field Kathryn W Finkelstein M Ln Cincinnati Copyright 1988 Reed Business Information Inc From Library Journal Conservation of Easel Paintings Joyce Hill Stoner, Rebecca Rushfield, 2013-02-15 Conservation of Easel Paintings is the first comprehensive text on the history philosophy and methods of treatment of easel paintings that combines both theory with practice With contributions from an international group of experts and interviews with important artists this volume provides an all encompassing guide to necessary background knowledge in technical art history artists materials scientific methods of examination and documentation with sections that present varying approaches and methods for treatment including consolidation lining cleaning retouching and varnishing The book concludes with a section featuring issues of preventive conservation storage shipping exhibition lighting safety issues and public outreach Conservation of Easel Paintings is a crucial resource in the training of conservation students and will provide generations of practicing paintings conservators and interested art historians curators directors collectors dealers artists and students of art and art history with invaluable information and guidance *The Hidden Language of Symbols* Matthew Wilson, 2022-11-03 Why do we reach for the red rose on Valentines day Where did the owl gain its reputation for wisdom Why should you never trust a fox In this visual tour through art history Matthew Wilson pieces together a global visual language enshrined in art the language of symbols Symbols exert a strong hold in the image saturated 21st century and have done so for thousands of years From national emblems to corporate logos and emojis our day to day lives abound with icons with roots in the distant past Expert art historian Matthew Wilson traces the often surprising trajectories that symbols have taken through history from their original purposes to their modern meanings identifying the common themes and ideas that link seemingly disparate cultures Thus we meet the falcon as a symbol of authority from the ancient Egyptian pharaohs to the medieval aristocracy the dog as stalwart companion from the classical era to the Renaissance and the mythical phoenix as a symbol of female power connecting a queen in England with a goddess in China We also see moments of radical reinterpretation and change the transformation of the swastika from an auspicious symbol of hope to one of hate From Palaeolithic cave paintings to contemporary installations Wilson deftly guides us through this world of symbols showcasing their enduring ability to express power hope fear and faith and to create and communicate identities uniting or dividing the people that made them Scientific Methods and Cultural Heritage Gilberto Artioli, 2010-07-08 Scientific techniques developed in materials science offer invaluable information to archaeology art history and conservation A rapidly growing number of innovative methods as well as many established techniques are

constantly being improved and optimised for the analysis of cultural heritage materials The result is that on the one hand more complex problems and questions can be confronted but on the other hand the required level of technical competence is widening the existing cultural gap between scientists and end users such as archaeologists museum curators art historians and many managers of cultural heritage who have a purely humanistic background The book is intended as an entry level introduction to the methods and rationales of scientific investigation of cultural heritage materials with emphasis placed on the analytical strategies modes of operation and resulting information rather than on technicalities The extensive and updated reference list should be a useful starting point for further reading Students and researchers from the humanities approaching scientific investigations should find it useful as well as scientists applying familiar techniques and methods to unfamiliar problems related to cultural heritage

The Creation of Art Berys Gaut,Paisley Livingston,2003-03-17 Although creativity from Plato onwards has been recognized as a topic in philosophy it has been overshadowed by investigations of the meanings and values of works of art In this collection of essays a distinguished roster of philosophers of art redress this trend The subjects discussed include the nature of creativity and the process of artistic creation the role that creative making should play in our understanding and evaluation of art relations between concepts of creation and creativity and ideas of tradition metaphor genius imagination and genre This is an important collection that will be eagerly sought by philosophers of art as well as theorists in art history cinema studies and literary criticism
