Velthuis, 2007-08-19 How do dealers price contemporary art in a world where objective criteria seem absent Talking Prices is the first book to examine this question from a sociological perspective On the basis of a wide range of qualitative and quantitative data including interviews with art dealers in New York and Amsterdam Olav Velthuis shows how contemporary art galleries juggle the contradictory logics of art and economics In doing so they rely on a highly ritualized business repertoire For instance a sharp distinction between a gallery s museumlike front space and its businesslike back space safeguards the separation of art from commerce Velthuis shows that prices far from being abstract numbers convey rich meanings to trading partners that extend well beyond the works of art A high price may indicate not only the quality of a work but also the identity of collectors who bought it before the artist s reputation was established Such meanings are far from unequivocal For some a high price may be a symbol of status for others it is a symbol of fraud Whereas sociological thought has long viewed prices as reducing qualities to quantities this pathbreaking and engagingly written book reveals the rich world behind these numerical values Art dealers distinguish different types of prices and attach moral significance to them Thus the price mechanism constitutes a symbolic system akin to language The Social World of Galleries Alain

Quemin, 2024-10-17 This book presents the first detailed study of the place of contemporary art galleries and gallerists especially within the art markets of Europe and the United States Based on the author s field research carried out for over a decade and combining ethnographic material with quantitative data the book reveals the major role galleries play in the creation of art value Despite being pillars of the art market there has been very little in depth research on galleries especially

when compared with the analysis of artists critics and dealers Written by a sociologist who has spent a decade as an art critic the book builds on work conducted by art historian and sociologist Raymonde Moulin from the 1960s to the 1990s Drawing on ethnographic observations and interviews with those working in the field today it provides a thorough and up to date analysis of what contemporary art galleries really are the spaces they occupy both physically and online their position within gallery districts their relation to art fairs and biennials and how friendship with clients is built and trends within the business in turn illuminating the hierarchized structure of the sector The book concludes by addressing a significant gap in data on the art market by providing a sociological ranking of international contemporary art galleries Offering a detailed analysis to a topic that has never been fully studied The Social World of Galleries is essential reading for scholars and students of art sociology art history and art business as well as gallerists collectors or art lovers and artists themselves **Reign of**
