Constructing a Sociology of the Arts Vera L. Zolberg,1990-02-23 At a time when a pile of bricks is displayed in a museum when music is composed for performance underwater and the boundaries between popular and fine art are fluid conventional understandings of art are strained in describing what art is what it includes or excludes whether and how it should be evaluated and what importance should be assigned the arts in society In this book Vera Zolberg examines diverse theoretical approaches to the study of the arts Ranging over humanistic and social scientific views representing a variety of scholarly traditions American and European she then develops a sociological approach that evaluates the institutional economic and political influences on the creation of art while also affirming the importance of the question of artistic quality The author examines the arts in the social contexts in which they are created and appreciated focusing on the ways in which people become artists the institutions in which their careers develop the supports and pressures they face the publics they need to please and the political forces with which they must contend Particular subjects covered include the process by which works are created and re created at different times with changed meanings and for new social uses the role of the audience in the realization of artistic experiences the social consequences of taste preferences the reasons for change in artistic styles and for the coexistence of many art forms and styles

Hall, Mary Jo Neitz, 2004-06-02 Culture has become a touchstone of interdisciplinary conversation For readers interested in sociology the social sciences and the humanities this book maps major classical and contemporary analyses and cultural controversies in relation to social processes everyday life and axes of ordering and difference such as race class and gender Hall Neitz and Battani discuss self and identity stratification the Other the cultural histories of modernity and postmodernity production of culture the problem of the audience action social movements and change The authors advocate cultivating the sociological imagination by engaging myriad languages and perspectives of the social sciences and humanities while cultivating cultural studies by developing the sociological imagination Paying little respect to boundaries and incorporating fascinating examples this book draws on diverse intellectual perspectives and a variety of topics from various historical periods and regions of the world *Art and Sovereignty in Global Politics* Douglas Howland, Elizabeth Lillehoj, Maximilian Mayer, 2016-12-01 This volume aims to question challenge supplement and revise current understandings of the relationship between aesthetic and political

operations The authors transcend disciplinary boundaries and nurture a wide ranging sensibility about art and sovereignty two highly complex and interwoven dimensions of human experience that have rarely been explored by scholars in one conceptual space Several chapters consider the intertwining of modern philosophical currents and modernist artistic forms in particular those revealing formal abstraction stylistic experimentation self conscious expression and resistance to traditional definitions of Art Other chapters deal with currents that emerged as facets of art became increasingly commercialized merging with industrial design and popular entertainment industries Some contributors address Post Modernist art and theory highlighting power relations and providing sceptical critical commentary on repercussions of colonialism and notions of universal truths rooted in Western ideals By interfering with established dichotomies and unsettling stable debates related to art and sovereignty all contributors frame new perspectives on the co constitution of artworks and practices of sovereignty

Symbols and Social Theory Hugh Dalziel Duncan,1969 *Kitsch and Art* Thomas Kulka,2011-09-30 What is kitsch What is behind its appeal More important what is wrong with kitsch Though central to our modern and postmodern culture kitsch has not been seriously and comprehensively analyzed its aesthetic worthlessness has been generally assumed but seldom explained *Kitsch and Art* seeks to give this phenomenon its due by exploring the basis of artistic evaluation and aesthetic value judgments Tomas Kulka examines kitsch in the visual arts literature music and architecture To distinguish kitsch from art Kulka proposes that kitsch depicts instantly identifiable emotionally charged objects or themes but that it does not substantially enrich our associations relating to the depicted objects or themes He then addresses the deceptive nature of kitsch by examining the makeup of its artistic and aesthetic worthlessness Ultimately Kulka argues that the mass appeal of kitsch cannot be regarded as aesthetic appeal but that its analysis can illuminate the nature of art appreciation *The Philistine Controversy* Dave Beech,John Roberts,2002-06-17 Dave Beech and John Roberts develop what they call a counter intuitive notion of the philistine with insights on cultural division and exclusion **Resources in Education** ,1992

Institutions, Interaction and Social Theory Will Gibson,Dirk vom Lehn,2016-01-01 From hospitals and prisons to schools and corporations no matter how large or seemingly abstract all institutions are ultimately the result of the actions and interactions of people In this original and innovative text Gibson and Vom Lehn show the different ways in which studying people s own meaning making practices can help us understand the role of institutions in contemporary society *Institutions Interaction and Social Theory* takes the reader through the core conceptual foundations of Symbolic Interactionism Ethnomethodology and Conversation Analysis Engaging with a rich tradition in sociological thought it suggests that interactionist perspectives have remained largely absent in the study of institutions and how they contrast with and contribute to the broader field of research in institutional contexts With chapters on healthcare education markets and art and culture this text will be of interest to those studying institutions organisations and work in sociology and in business schools It will also be valuable for students of social theory interested in interactionism and in the challenges and
