Art Mind:

Art Mind & Brain Howard Gardner, 1982-12-07 In a provocative discussion of the sources of human creativity Gardner explores all aspects of the subject from the young child's ability to learn a new song through Mozart's conceiving a complete symphony to the adult's ability to create a masterpiece of art.

Art and Its Objects Richard Wollheim, 1980-09-30 Aims to convey the author's belief that the nature of art has to be comprehensible from both the artist's and the spectator's point of view. In pursuing this the book considers questions on expression, representation, style, the significance of the artist, and the nature of the work of art.

Brain and Art Idan Segev, Luis M. Martinez, Robert J. Zatorre, 2014-12-18 Could we understand in biological terms the unique and fantastic capabilities of the human brain to both create and enjoy art? In the past decade neuroscience has made a huge leap in developing experimental techniques as well as theoretical frameworks for studying emergent properties following the activity of large neuronal networks. These methods including MEG, fMRI, sophisticated data analysis approaches and behavioral methods are increasingly being used in many labs worldwide with the goal to explore brain mechanisms corresponding to the artistic experience. The 37 articles composing this unique Frontiers Research Topic bring together experimental and theoretical research linking state-of-the-art knowledge about the brain with the phenomena of Art. It covers a broad scope of topics contributed by world-renowned experts in vision, audition, somatosensation, movement, and cinema. Importantly, as we felt that a dialog among artists and scientists is essential and fruitful, we invited a few artists to contribute their insights as well as their art. Joan Miró said that art is the search for the alphabet of the mind. This volume reflects the state-of-the-art search to understand the neurobiological alphabet of the Arts. We hope that the wide range of articles in this volume will be highly attractive to brain researchers, artists, and the community at large.

theological age Tompsett argues that Stevens poetry attempts to play its audience into an ontological ground in an effort to show that his reduction of metaphysics is not dry philosophical imposition but is enacted by our encounter with the poems themselves Through an analysis of the language and form of Stevens poems Tompsett uncovers the mythology his poetry shares with certain pre Socratics and with Greek tragedy This shows how such mythic rhythms are apparent within the work of Friedrich Nietzsche Martin Heidegger and Hans Georg Gadamer and how these rhythms release a poetic understanding of the violence of a reduction of metaphysics
