Arms Production Dilemma:

The Arms Production Dilemma Randall Forsberg, 1994 The studies show how military strategy planned forces and the age of systems in the current inventory affect the domestic demand for new production how the recent drop in domestic demand affects arms industries and the extent to which governments and firms in the arms producing nations are turning to exports to sustain the industries In the shrinking arms market of the post Cold War era countries with advanced arms industries face difficult choices concerning force size arms production arms export and defense industrial capacity This book explores the links among these issues through a detailed study of the combat aircraft industries in the United States Russia Britain France Germany Italy and Sweden the seven countries that develop produce and export all of the world's technologically advanced weapon systems The studies show how military strategy planned forces and the age of systems in the current inventory affect the domestic demand for new production how the recent drop in domestic demand affects arms industries and the extent to which governments and firms in the arms producing nations are turning to exports to sustain the industries Stunning changes in Russia's combat aircraft forces industry and strategy are detailed here for the first time as are expected future Russian combat aircraft exports to China Newly compiled data also show that in the United States and Russia and globally arms production for export will exceed production for domestic use for the first time in history starting in 1995 Arms production is thus increasingly dominated by commercial rather than security interests Ultimately at issue is whether governments will exploit the opportunity offered by the dramatic post Cold War contraction of the world arms market to reduce their armed forces and constrain international arms trade while shrinking the arms industry or keep pushing arms exports that generate new threats and justify larger armed forces more arms production and bigger arms industries

Ethical Dilemmas in the Global Defense Industry Daniel Schoeni, Tobias Vestner, 2023 The defense industry develops produces and sells weapons that cause great harm It operates at the intersection of the public and private sectors with increased reliance on technology companies This book brings together the diverse perspectives of scholars and practitioners from academia government service the military and the private sector to discuss the moral and legal challenges facing the global defense industry and to introduce solutions that are innovative effective and practical Arms Sales and Regional Stability The International Institute for Strategic Studies (IISS), 2023-04-28 The book considers the main arms exporting countries including China Russia and the US as well as several European states and the policies each employs in deciding advanced weapons sales to key regions of the world It examines whether such sales are inherently stabilising or de stabilising regarding regional security Regions reviewed in detail include the Middle East and the Indo Pacific Combat aircraft sales are a focus for the volume given both their practical and symbolic importance The volume focuses on the behaviour and policies of the main arms exporting nations since the end of the Cold War shifts in their arms export policies and the tensions that can emerge within or between countries over proposed arms sales It also considers the impact of

countries that were previously only recipients of advanced weapons moving to develop their own defence industrial base

Towards a Brave New Arms Industry? Richard Bitzinger, 2014-08-27 In the post Cold War era most countries have been forced to radically reduce their arms industries and abandoned self sufficiency in favour of a subordinate role in an increasingly globalized worldwide defence industry This has significant implications for the future of armaments production for proliferation and for arms control

Global Arms Production Ethan B. Kapstein, 1992 Why do states collaborate in the production of advanced weaponry Under what conditions do such collaborative arrangements succeed What are the implications of armaments collaboration for the international economic and security environments Arms collaboration is not a new phenomenon but there is increasing debate both in the United States and abroad over the associated costs and benefits Critics charge that collaborative projects result in technology give aways the creation of defense industrial competitors and the loss of domestic jobs Supporters argue that the very same projects strengthen alliance relations provide access to new technology and result in arms sales which might otherwise have been lost to foreign competitors In Global Arms Production these issues are addressed by distinguished contributors such as Ethan B Kapstein Jacques S Gansler William Keller Joel L Johnson Jack Nun Robert H Trice C Michael Farr Grant T Hammond and Stanley Sienkiewicz Co published with the Center for International Affairs of Harvard University

Military Industry and Regional Defense Policy Timothy D. Hoyt, 2017-07-05 Military Industry and Regional Defense Policy re examines military industrialization in the developing world focusing on policy making in producer states and the impact of security perceptions on such policy making Timothy D Hoyt reassesses the role of regional state sub systems in international relations and recent historical studies of international technology and arms transfers Looking at Israel Iraq and India the three most powerful regional powers in the Cold War era he presents an expert analysis of the three sided phenomena of the regional hegemony the regional competitor and the small over achiever This new book breaks away from existing literature on military industries in the developing world which has focused on their economic and development costs and benefits These past studies have used primitive methodologies that focus on the production of complete weapons systems a misleading gauge in a world of growing international defense cooperation They have also ignored empirical evidence of the impact of local military industrial production on Cold War regional conflict and of the defence planning and concerns that drove development of indigenous military industries in key regional powers This new text delivers an incisive new perspective

Arms Diffusion Thomas W. Zarzecki, 2018-12-20 Weapons proliferation is one of the most pressing global concerns following the end of the Cold War Despite the absence of an overarching superpower conflict armaments and related technologies have continued to spread throughout the international system This has been particularly true in areas like East Asia and the Middle East where the traditional two party arms races are not readily apparent This text addresses these concerns and shortcomings using data on fourteen specific military technological innovations that diffused throughout the international system from 1960 to 1997

The International Dimensions of Internal Conflict Michael Edward Brown,1996 Internal conflicts threaten many countries and regions globally The first part of this book examines the sources of internal conflicts and the ways these may affect neighbouring states and the international community The second part covers specific problems policy instruments and key actors **Dismantling the Cold War** John M. Shields,William C. Potter,1997 The Nunn Lugar Cooperative Threat Reduction CTR program has since authorized more than 1 5 billion for a wide array of weapons destruction demilitarization nuclear security and nonproliferation activities in the Newly Independent States NIS of the former Soviet Union

Government Policies and Ethnic Relations in Asia and the Pacific Michael E. Brown,Sumit Ganguly,1997-10-20 Efforts to contend with tensions inherent in multiethnic societies case studies of India Pakistan Sri Lanka Burma Thailand Malaysia Singapore Indonesia the Philippines China Australia New Zealand Papua New Guinea Fiji Vanuatu and the Federated States of Micronesia Ethnic conflict one of the most serious and widespread problems in the world today can

undermine efforts to promote political and economic development as well as political economic and social justice. It can also lead to violence and open warfare producing horrifying levels of death and destruction. Although government policies on ethnic issues often have profound effects on a country, the subject has been neglected by most scholars and analysts. This volume analyzes different policies governments have pursued in their efforts to contend with the tensions inherent in multiethnic societies. The book focuses on Asia and the Pacific, the most populous and economically vibrant part of the world. The heart of the book is a set of case studies of government policies in sixteen countries: India, Pakistan, Sri Lanka, Burma, Thailand, Malaysia, Singapore, Indonesia, the Philippines, China, Australia, New Zealand, Papua New Guinea, Fiji, Vanuatu, and the Federated States of Micronesia. The studies consider a wide range of political, economic, educational, linguistic, and cultural policies and how these policies have evolved over time. Using a broad comparative perspective to assess the effectiveness of different governmental approaches, the authors offer policy recommendations that cut across individual countries and regions.

Soviet Strategic Thought, 1917-91 Andrei A. Kokoshin, 1998-01-15. During the Cold War, Westerners were obsessed with the military policies of the Soviet Union. Until the demise of the Soviet Union, however, few details of Moscow's thinking on military matters were available. In this book, Andrei Kokoshin reveals how Soviet military theorists developed and debated the concepts that provided the basis for the Kremlin's defense policies. Drawing on Soviet era archives and unpublished materials, he sheds light on this important chapter in the history of Russia and the world. The book covers three main themes: the relationship between politics and military strategy in the Soviet Union; how the Soviet political and military leadership assessed threats to Soviet security; the nature of future wars and methods of warfare; and the relationship between offense and defense in Soviet military strategy. Kokoshin places the strategic concepts behind Moscow's military policies in the context of internal and international struggles for power and assesses the future role of military power in Russia's national security strategy.

Toward a Theory of Peace Randall Caroline Watson Forsberg, 2019-12-15. Military analyst, peace activist, teacher, and social theorist Randall Caroline Watson Forsberg (1943-2007) founded the Nuclear Freeze campaign and the Institute for Defense and Disarmament Studies. In *Toward a Theory of Peace*, completed in 1997 and published for the first time here, she delves into a vast literature in psychology, anthropology, archeology, sociology, and history to examine the ways in which changing moral beliefs came to stigmatize forms of socially sanctioned violence such as human sacrifice, cannibalism, and slavery, eventually rendering them unacceptable. Could the same process work for war? Edited and with an introduction by political scientists Matthew Evangelista (Cornell University) and Neta C. Crawford (Boston University), both of whom worked with Forsberg.
