Back to Basics Orchid Lee Lopez,2011-02-15 As a registered nurse for the last 28 years my primary clinical expertise has been working in the pre hospital environment as a flight nurse and a paramedic as well as continuing to work in a variety of clinical areas which include the emergency department pediatrics and endoscopy My extensive clinical background has

also given me the opportunity to work as a legal nurse consultant with one of the largest law firms in Arizona As an EMS educator and program director of paramedic training programs for the last 20 years and most recently as the National Clinical Educator for one of the largest air medical transport companies I truly enjoy teaching in a simple manner as to assure that students do have a strong basic understanding in making critical care decisions and that they will be providing the highest quality of patient care beginning from the least to the most invasive management of care for the patients they are transporting My goal as a professional and as an EMS educator has always been and will continue to encourage students to have the desire to learn and grow in their profession as well as contribute to EMS in a way that inspires positive change Tell me and Ill forget Show me and I may remember Involve me and Ill understand [www backtobasicscourse com](http://www.backtobasicscourse.com)

Safer Hospital Care Dev Raheja, 2019-05-29 According to the National Patient Safety Foundation about 440 000 deaths from hospital mistakes are

expected in 2018 These mistakes are preventable but the number of deaths has been increasing for the last two decades instead of decreasing This book describes how to prevent deaths at very low cost and get very high return on investment ROI The unique feature of this book is that it teaches the tools of innovation that anyone can master It teaches healthcare staff how to manage innovation efficiently and quickly because each patient life is critical This second edition points out why the present methods are ineffective and shows how to find elegant solutions that are simple comprehensive and produce high return on investments The second edition contains all updated material with the addition of a new chapter on systems engineering for robust improvements a practice that has been applied in most high risk industries such as aerospace defense and NASA for years It aims at redesigning systems to make sure right things right coordination and right integration happens in healthcare systems

The Just Culture Principles in Aviation Law Francesca Pellegrino,2019-09-09 This book reviews and critically analyzes the current legal framework with regard to a more just culture for the aviation sector This new culture is intended to protect front line operators in particular controllers and pilots from legal action except in the case of willful misconduct or gross negligence by creating suitable laws regulations and standards In this regard it is essential to have an environment in which all incidents are reported moving away from fears of criminalization The approach taken until now has been to seek out human errors and identify the individuals responsible This punitive approach does not solve the problem because frequently the system itself is also at fault Introducing the framework of a just culture could ensure balanced accountability for both individuals and complex organizations responsible for improving safety Both aviation safety and justice administration would benefit from this carefully established equilibrium

Progress in Artificial Intelligence José Maia Neves,Manuel Filipe Santos,José Manuel Machado,2007-11-17 This book constitutes the refereed proceedings of the 13th Portuguese Conference on Artificial Intelligence EPIA 2007 held in Guimar es Portugal in December 2007 as eleven integrated workshops The 58 revised full papers presented were carefully reviewed and selected from a total of 210 submissions In accordance with the eleven constituting workshops the papers are organized in topical sections on a broad range of subjects
