Whyte saw business culture as stultifying and historian Richard Hofstadter wrote Once great men created fortunes today a great system creates fortunate men How did changes in the nature of business affect popular views Walter A. American Business and Political Power Mark A. Smith, 2010-01-26 Most people believe that large corporations wield enormous political power when they lobby for policies as a cohesive bloc With this controversial book Mark A Smith sets conventional wisdom on its head In a systematic analysis of postwar lawmaking Smith reveals that business loses in legislative battles unless it has public backing This surprising conclusion holds because the types of issues that lead businesses to band together such as tax rates air pollution and product liability also receive the most media attention The ensuing debates give citizens the information they need to hold their representatives accountable and make elections a choice between contrasting policy programs Rather than succumbing to corporate America Smith argues representatives paradoxically become more responsive to their constituents when facing a united corporate front Corporations gain the most influence over legislation when they work with organizations such as think tanks to shape Americans beliefs about what government should and should not do

The Woolen Industry of the Midwest Norman L. Crockett, 2014-07-15 Through the study of a regional industry the book illustrates the impact of an expanding national market on a previously isolated market offering new insights into a pioneer industry in the West and into the business methods and procedures of the time The book discusses the growth of a myriad of small processing and manufacturing plants which drew raw materials from and geared production and sales to that local economy enjoying as they did protection from eastern competitors who were saddled with high freight rates The book demonstrates that once urbanization occurred in the region bringing it into the national market the local industries declined rapidly disappearing in less than a generation Perceptive challenging the book opens new possibilities for the study of manufacturing on the regional level
