Philosophical Foundations of Leadership David Cawthorn, 2017-07-28 The nature of leadership and the human qualities that promote or inhibit it have a long history in Western thought and remain a central concern in modern societies

Crises in leadership may arise from either human failings or social complexities that defeat or reject those most qualified to lead. While most contemporary political or social commentators on such crises tend to focus on external circumstances, David Cawthon examines classical thinkers from Plato to Nietzsche to offer a historical and philosophical perspective on the intrinsic qualities of leadership and how these qualities are coded into the souls of some but not of others.

Anthropocentrism and Its Discontents Gary Steiner, 2005-11-06 *Anthropocentrism and Its Discontents* is the first ever comprehensive examination of views of animals in the history of Western philosophy from Homeric Greece to the twentieth century. In recent decades, increased interest in this area has been accompanied by scholars' willingness to conceive of animal experience in terms of human mental capacities: consciousness, self-awareness, intention, deliberation, and in some instances at least, limited moral agency. This conception has been facilitated by a shift from behavioral to cognitive ethology, the science of animal behavior, and by attempts to affirm the essential similarities between the psychophysical makeup of human beings and animals. Gary Steiner sketches the terms of the current debates about animals and relates these to their historical antecedents, focusing on both the dominant anthropocentric voices and those recurring voices that instead assert a fundamental kinship relation between human beings and animals. He concludes with a discussion of the problem of balancing the need to recognize a human indebtedness to animals and the natural world with the need to preserve a sense of the uniqueness and dignity of the human individual. *Introduction To Saint Thomas Aquinas* Saint Thomas (Aquinas), 1948

Selections from Basic writings of St Thomas Aquinas published in 1945. Bibliography p. 682-690. **The Atheist's Primer**

Malcolm Murray, 2010-04-06 *The Atheist's Primer* is a concise but wide-ranging introduction to a variety of arguments, concepts, and issues pertaining to belief in God. In lucid and engaging prose, Malcolm Murray offers a penetrating yet fair-minded critique of the traditional arguments for the existence of God. He then explores a number of other important issues relevant to religious belief, such as the problem of suffering and the relationship between religion and morality, in each case arguing that atheism is preferable to theism. The book will appeal to both students and professionals in the philosophy of religion, as well as general audiences interested in the topic. **Religious Knowledge**

James Kellenberger, 2022-11-30 This book addresses the place of religious knowledge in religion, particularly within Christianity. The book begins by examining the difference between the general concepts of knowledge and belief, the relation between faith and knowledge, and reasons why belief as faith and not knowledge is central to the Abrahamic religions. The book explores the ambivalence about religious knowledge within Christianity. Some religious thinkers explicitly accepted and sought religious knowledge, as did St. Thomas Aquinas, while others, notably Søren Kierkegaard, cast knowledge and seeking it as incompatible with faith. The book also examines two antithetical religious intuitions about knowledge, both at home in the Christian tradition. For one, faith requires a struggle with doubt; for the other, faith requires a certainty that excludes doubt. For the first, religious knowledge would destroy faith; for the second, religious knowledge is compatible with faith and completes it. Though the book focuses on the

Christian tradition it also considers other traditions including a chapter on the place of religious knowledge in nontheistic religious traditions The final chapter examines how coming to Wisdom as personified in the Jewish and Christian traditions may be distinct from attaining religious knowledge
