Basin Analysis Global Sedimentary Geology:

Basin Analysis, Global Sedimentary Geology and Sedimentology Baojun Liu, Li Sitian, 1997-05 The 30th International Geological Congress was held in Beijing China in August 1997. Leading scientists convened to present their findings and views to the international geological research community. Volume 8 of 26 focuses on basin analysis, global sedimentary geology and sedimentology. All articles in the proceedings have been refereed and keynote papers have been included in Volume 1. These proceedings aim to present a view of contemporary geology and should be of interest to researchers in the geological sciences. **Proceedings of the 30th International Geological Congress: Basin analysis.**

Global sedimentary geology and sedimentology, 1997 *Principles of Sedimentary Basin Analysis* Andrew D. Miall, 2013-03-09 Review of the second edition. For geologists and geophysicists studying sedimentary fill of basins, this volume is a valuable addition to their shelves. The book is packed with information, includes numerous lists of references and is up to date. As a source volume, this book is second to none. It is clear and well organized. **GEOPHYSICS Proceedings of the 30th International Geological Congress: Basin analysis; Global sedimentary geology; Sedimentology**, 1997

Principles of Sedimentary Basin Analysis Andrew Miall, 2013-04-17 This book is intended as a practical handbook for those engaged in the task of analyzing the paleogeographic evolution of ancient sedimentary basins. The science of stratigraphy and sedimentology is central to such endeavors, but although several excellent textbooks on sedimentology have appeared in recent years, little has been written about modern stratigraphic methods. Sedimentology textbooks tend to take a theoretical approach, building from physical and chemical theory and studies of modern environments. It is commonly difficult to apply this information to practical problems in ancient rocks, and very little guidance is given on methods of observation, mapping and interpretation. In this book, theory is downplayed and the emphasis is on what a geologist can actually see in outcrops, well records and cores, and what can be obtained using geophysical techniques. A new approach is taken to stratigraphy, which attempts to explain the genesis of lithostratigraphic units and to de-emphasize the importance of formal description and naming. There are also sections explaining principles of facies analysis, basin mapping, methods, depositional systems and the study of basin thermal history, so important to the genesis of fuels and minerals. Lastly, an attempt is made to tie everything together by considering basins in the context of plate tectonics and eustatic sea level changes. **Basin Analysis and Sedimentary Geology** George deVries Klein, 1989 *Geosciences and Human Survival*

Environment, Natural Hazards, Global Change Zhang Zonghu, E.F.J. de Mulder, Liu Tungsheng, Zhou Liping, 2023-03-08 The proceedings of the 30th International Geological Congress held in Beijing China in August 1997. These two volumes focus on geosciences and human survival, environment, natural hazards and global changes. They aim to present a view of contemporary geology. **Global Tectonic Zones, Supercontinent Formation and Disposal** Xiao Xuchang, Liu Hefu, 2022-01-26 This book is a collection of papers presented in the 30th International Geological Congress held in Beijing.
