The paper studies global developments and world politics in the late 20<sup>th</sup> – early 21<sup>st</sup> centuries that contributed to the post-Cold War transformations of international system. It argues that the international system has undergone significant transformations for a short historical period, and has shifted from a bipolar to unipolar and then to multipolar world order. The contemporary multipolar world order is more unstable and unpredictable than its two previous forms. A further direction of the international system development will be greatly determined by the global community's response on Russia and ISIS' challenges.

**Key words:** international system, world politics, post-Cold War period, the U.S. global leadership, regional integration, Ukraine crisis

For the last 25 years, the international system has undergone fundamental transformations. The most evident of them include the end of the bipolar world order and shaping the new one, a shift in the U.S. role in the global affairs, emerging of new centers of power, diffuse of power among different state and non-state actors, regional integration processes, a growing role of leading developing nations in the global economy and politics, a return to ideological confrontation and a struggle between different developmental models, a rise of nationalism and untraditional security threats, including terrorism and militant extremism. The speed of the transformations is unprecedented, largely because of globalization process and dynamic technological changes that are distinctive features of the present époque.

In modern and contemporary history, fundamental transformations of international system proceeded from the results of great wars. Thus, the establishment of the Westphalia international system was the result of the 1618-1648 Thirty years war, the 19<sup>th</sup> century Vienna system proceeded from the allies victory over Napoleon, the Versailles-Washington system fixed the results of the World War I as well as Yalta system played the same part for the post-World War II international relations.

Contemporary transformations do not fit the scheme. They started in the late 1980s together with M. Gorbachov's reforms and the "new thinking" policy. These developments stopped

Harkavy, Stephanie G. Neuman, 1994 The contributions presented here will we hope provide a panoramic perspective on most of the important aspects of arms transfers Some such as those on supplier markets or on arms control represent the latest thinking and information on subjects that have long been the focus of attention in the arms trade literature Others such as the contributions on financing and intelligence represent initial attempts at opening up new areas of inquiry Preface **Global and Regional Approaches to Arms Control in the Middle East** Gamal M.
