LEVEL 4 LESSON 4 -22/04/2020

TOPIC 2: MANAGING THE LEARNING ENVIRONMENT

Why do we need to manage learning environments?

- To keep order in the classroom, even if learners are working as a group or individuals
- To ensure that learners occurs effectively- earners learn easily in a well- managed classroom
- To teach learners necessary principles, values, behaviours and procedures that they'll need in everyday life and work situation
- To influence learners' learning, education and attitudes – teachers classroom management has influence in learners' behaviour, thoughts and feelings

The teacher in order to be able to manage his/her classroom properly, has got FOUR most important **MANAGEMENT TASKS** that s/he need to execute:

- **Planning:** planning for a project or task (what needs to be done, how, when and by who)
- **Organising:** Arranging of work in the most effective way possible (gathering of resources, activities to be done, having responsible people to carry out the task and also indicating how will these tasks be carried out
- **Leadership:** The teacher is a leader – must therefore give direction ensuring that the task is carried out in an effective way and must also give support
Leadership tasks in the classroom therefore refers to being able to:
 - (i) Cope with changing circumstances
 - (ii) Create a vision for the future
 - (iii) Communicate the vision to his/her learners
 - (iv) Motivate and inspire learners to achieve this vision despite challenges along the way
- **Control:** Is the last function of the effective management cycle (tasks of management) –to check whether outcomes have been achieved, so as to make necessary changes when required

Three stages of control:

- (i) Before an activity takes place – make sure that learning progresses in a successful way
- (ii) During the activity –full control needs to be applied because this is the stage determines the success or failure of the task/activity
- (iii) After activity –stage of assessment

How to Explain Absolutely Anything to Absolutely Anyone Andy Tharby,2018-11-13 In How to Explain Absolutely Anything to Absolutely Anyone The art and science of teacher explanation Andy Tharby talks teachers through a set of remarkably simple techniques that will help revolutionise the precision and clarity of their message Explanation is an art form albeit a slightly mysterious one We know a great explanation when we see or hear one yet nevertheless we struggle to pin down the intricacies of the craft Just how exactly is it done In How to Explain Absolutely Anything to Absolutely Anyone Andy Tharby eloquently explores the art and science of this undervalued skill and illustrates how improving the quality of explanation can improve the quality of learning Delving into the wonder of metaphor the brilliance of repetition and the timeless benefits of storytelling Andy sets out an evidence informed approach that will enable teachers to explain tricky concepts so well that their students will not only understand them perfectly but remember them forever too By bringing together evidence and ideas from a wide range of sources including cognitive science educational research and the study of

linguistics the book examines how the most effective writers and speakers manage to transform even the most messy complicated idea into a thing of wondrous crystalline clarity Then by provoking greater thought and contemplation around language choices in the classroom Andy spells out how the practical tools and techniques discussed can be put into practice Andy also puts the important role of learner autonomy in context recognising that there is a time for teachers to talk and a time for pupils to lead their own learning and contends that in most cases teachers should first lay out the premise before opening the space for interrogation Ultimately How to Explain Absolutely Anything to Absolutely Anyone argues that good teaching is not about talking more or less but about talking better Brimming with sensible advice applicable to a range of settings and subjects this book is suitable for teachers and educators of learners aged 7 to 16 *A Handbook for The Art and Science of Teaching* Robert J. Marzano,2011 *The Art & Science of Learning Design* Marcelo Maina,Brock Craft,Yishay Mor,2015 We live in an era defined by a wealth of open and readily available information and the accelerated evolution of social mobile and creative technologies The provision of knowledge once a primary role of educators is now devolved to an immense web of free and readily accessible sources Consequently educators need to redefine their role not just from sage on the stage to guide on the side but as more and more voices insist as designers for learning The call for such a repositioning of educators is heard from leaders in the field of technology enhanced learning TEL and resonates well with the growing culture of design based research in Education However it is still struggling to find a foothold in educational practice We contend that the root causes of this discrepancy are the lack of articulation of design practices and methods along with a shortage of tools and representations to support such practices a lack of a culture of teacher as designer among practitioners and insufficient theoretical development The Art and Science of Learning Design ASDL explores the frameworks methods and tools available for teachers technologists and researchers interested in designing for learning Learning Design theories arising from findings of research are explored drawing upon research and practitioner experiences It then surveys current trends in the practices methods and methodologies of Learning Design Highlighting the translation of theory into practice this book showcases some of the latest tools that support the learning design process itself *The Edutainer* Brad Johnson,Tammy Maxson McElroy,2010-04-16 The teacher s role must be redefined to meet the needs and demands of today s culture and the edutainer is the paradigm shift needed for education to be relevant applicable and effective in the 21st Century The Edutainer describes an educational approach that provides teachers with core operational and interpersonal skills to be an effective educator in the twenty first century These skills include communication organization management planning and building authentic relationships based upon respect and personal responsibility The Edutainer is unique in its perspective that the educator should be fluid and adapting to our current culture while employing sound academic principles The edutainer concept is derived from the principles that we believe make for an effective educator and entertainer First edutainers are visionaries who understand that a change in culture requires a change in

methods and presentation These edutainers make their material relevant to present culture Preparation is also vital to these performers They organize and plan their material long before they get on stage or their performance would fail Finally the effective educator and entertainer have to deliver a stellar performance that is relatable to the audience The Edutainer offers strategies and ideas to build and nurture authentic relationships with students parents and colleagues to build a dynamic educational community Suggestions for developing the 3R s of education which include respect responsibility and authentic relationships Explanations of present day cultural influences upon formal education and learning Strategies for teacher empowerment and leadership abilities Methodologies for classroom management and organization Ideas for connecting education to the real world with relevant and engaging lessons
