Learning** Lawrence Perez, Instructor, Sherri Messersmith, Robert S. Feldman, 2013-01-15 Sherri Messersmith's successful hardcover franchise is expanded with the new softcover P O W E R series The conversational writing style practical applications innovative student resources and student friendly walk through of examples that users of the hard cover books noted and appreciated are also found in the pages of the P O W E R series The P O W E R Framework What makes P O W E R a unique tool for the classroom A major challenge in developmental courses is that students at this level struggle with basic study skills and habits Maybe this is one of their first college courses or perhaps they are adults returning to school after a long absence Either way many

of the individuals taking this course don't know how to be good students. Instructors often don't have the time, the resources, or the expertise to teach success skills AND the math concepts. The new team of Messersmith, Perez, and Feldman offer a scientifically based approach to meet this challenge. The P O W E R Learning Framework was developed by successful author, psychologist, student success instructor, and researcher Bob Feldman. It is a method of accomplishing any task using five simple and consistent steps: Prepare, Organize, Work, Evaluate, Rethink. This framework is integrated at every level of the text to help students successfully learn math concepts while at the same time developing habits that will serve them well throughout their college careers and in their daily lives. The Math Mastering Concepts, With the textbook and Connect Math, hosted by ALEKS, students can practice and master their understanding of algebraic concepts. Messersmith is rigorous enough to prepare students for the next level yet easy to read and understand. The exposition is written as if a professor is teaching in a lecture to be more accessible to students. The language is mathematically sound yet easy enough for students to understand.

The College Blue Book Huber, William Hurt, Harriet-Jeanne Hurt, 1979 **Journal of the Air Pollution Control Association**, 1979 Basic College Mathematics K. Elayn Martin-Gay, 2011. Basic College Mathematics Fourth Edition was written to help readers effectively make the transition from arithmetic to algebra. The new edition offers new resources like the Student Organizer and now includes Student Resources in the back of the book to help students on their quest for success.
