Mann, C. Lutwak-Mann, 2012-12-06 To present a coherent and meaningful survey of scientific research endeavour in an area that has expanded as fast as physiology and biochemistry of reproduction in the male is no mean task these days No less prodigious than the growth of knowledge of male reproductive function has been the rate at which the outpouring of publications on this subject has continued since the appearance of *The Biochemistry of Semen and of the Male Reproductive Tract* in 1964 Since cyclopaedic treatment of this vast literature did not appeal to us we have made no attempt either to rehash the material contained in that book or to enlarge the bibliography beyond the nearly 3500 references included in the present treatise At the same time whilst writing we felt strongly that to advance it is necessary to understand the past and for this reason we have not hesitated to refer especially in the introductory chapter to a number of those fundamental early discoveries in which today's knowledge is deeply and firmly rooted *Handbook of Toxicology of Chemical Warfare Agents* Ramesh C Gupta, 2009-04-02 This groundbreaking book covers every aspect of deadly toxic chemicals used as weapons of mass destruction and employed in conflicts warfare and terrorism Including findings from experimental as well as clinical studies this one of a kind handbook is prepared in a very user friendly format that can easily be followed by students teachers and researchers as well as lay

people Stand alone chapters on individual chemicals and major topics allow the reader to easily access required information without searching through the entire book This is the first book that offers in depth coverage of individual toxicants target organ toxicity major incidents toxic effects in humans animals and wildlife biosensors biomarkers on site and laboratory analytical methods decontamination and detoxification procedures prophylactic therapeutic and countermeasures and the role of homeland security Presents a comprehensive look at all aspects of chemical warfare toxicology in one reference work This saves researchers time in quickly accessing the very latest definitive details on toxicity of specific agents used in chemical warfare as opposed to searching through thousands of journal articles Will include the most agent specific information on the market Includes detailed coverage of the most exhaustive list of agents possibly used as chemical warfare agents in one source Section 4 Agents That Can Be Used as Weapons of Mass Destruction 25 chapters long Other books on the market only include a sample selection of specific agents Offering all possible agents detailed under one cover makes this appealing to a wider audience and saves researchers time The Forward will be written by Dr Tetsuo Satoh Chiba University Japan He is one of the most respected recognizable authorities on chemical warfare agents which will set the authoritative tone for the book Covers risk to humans animals and the environment equally Researchers involved in assessing the risks involved with a possible chemical warfare attack and those who are developing response plans to such attacks must look at not only the risks to human health but to our wildlife and environment as well The holistic approach taken in this book ensures that the researchers have ready access to the details no matter which aspect of the effects of CWA s they might be concerned with
