J. Dreyfus,1997-01-22 Dreyfus examines the central ideas of Dharmak rti one of the most important Indian Buddhist philosophers and their reception among Tibetan thinkers During the golden age of ancient Indian civilization Dharmak rti articulated and defended Buddhist philosophical principles He did so more systematically than anyone before his time the seventh century CE and was followed by a rich tradition of profound thinkers in India and Tibet This work presents a detailed picture of this Buddhist tradition and its relevance to the history of human ideas Its perspective is mostly philosophical but it also uses historical considerations as they relate to the evolution of ideas **Selfless Persons** Steven Collins,1982 This book seeks to explain carefully and sympathetically the Buddhist doctrine of anatta not self which denies the existence of any self soul or enduring essence in human beings The author relates this doctrine to its cultural and historical context particularly to its Brahmanical background and shows how the Theravada Buddhist tradition has constructed a philosophical and psychological account of personal identity and continuity on the apparently impossible basis of the denial of self Buddhist Missionaries in the Era of Globalization Linda Learman,2004-11-30 This insightful volume dispels the common notion that Buddhism is not a missionary religion by revealing Asian Buddhists as active agents in the propagation of their faith It presents at the same time a new framework with which to study missionary activity in both Buddhist and other religious traditions Included are case studies of Theravada Chinese and Tibetan Buddhist teachers and congregations as well as the Pure Land Shingon Zen and Soka Gakkai traditions of Japan Contributors examine both foreign and domestic missions and the activities of emigrant communities showing the resources and strategies garnered by late nineteenth and twentieth century Buddhists who worked to uphold and further their respective traditions often under difficult circumstances Based on anthropological fieldwork and historical research the essays break new ground and provide better analytical tools for studying mission activity than previously available They provide instructive comparisons with Anglo American Protestant missionary thinking and offer insights into the internal dynamics of Sri Lankan and Japanese missions as they make their way in Protestant and Catholic societies Also included are nuanced studies of two major missionary figures in

late twentieth century Chinese Buddhism and a fascinating look at the present Dalai Lama's relationships with his devotees and the American government viewed through an exposition of the abiding tradition within Tibetan Buddhism that combines mission activity with the political goals of exiled lamas Contributors Stuart Chandler Peter B Clarke C Julia Huang Steven Kemper Linda Learman Sarah LeVine Richard K Payne Cristina Rocha George J Tanabe Jr Gray Tuttle **Teaching Buddhism** Todd Lewis, Gary Delaney DeAngelis, 2017 Buddhist studies is a rapidly changing field of research constantly transforming and adapting to new scholarship This creates a problem for instructors both in a university setting and in monastic schools as they try to develop a curriculum based on a body of scholarship that continually shifts in focus and expands to new areas Teaching Buddhism establishes a dialogue between the community of instructors of Buddhism and leading scholars in the field who are updating revising and correcting earlier understandings of Buddhist traditions Each chapter presents new ideas within a particular theme of Buddhist studies and explores how courses can be enhanced with these insights Contributors in the first section focus on the typical approaches figures and traditions in undergraduate courses such as the role of philosophy in Buddhism Nagarjuna Yogacara Buddhism tantric traditions and Zen Buddhism They describe the impact of recent developments like new studies in the cognitive sciences on scholarship in those areas Part Two examines how political engagement and ritual practice have shaped the tradition throughout its history Focus then shifts to the issues facing instructors of Buddhism dilemmas for the scholar practitioner in the academic and monastic classroom the tradition's possible roles in teaching feminism and diversity and how to present the tradition in the context of a world religions course In the final section contributors offer stories of their own experiences teaching paying particular attention to the ways in which American culture has impacted them They discuss the development of courses on American Buddhism using course material on the family and children the history and trajectory of a Buddhist Christian dialog and Buddhist bioethics environmentalism economic development and social justice In synthesizing this vast and varied body of research the contributors in this volume have provided an invaluable service to the field The Air Force Law Review ,2015
