infertility and extremely low rainfall which have been exacerbated by climate change Many Tonga people were displaced by the construction of the Kariba Dam in the 1950s and their access to the region s natural resources has been restricted by successive governments Showcasing the research of Zimbabwean scholars in particular this book not only reflects on the vulnerabilities faced by the Tonga but it also looks beyond these to the livelihood practices that are thriving despite these challenges and the ways in which livelihoods intertwine with Tonga culture and society more broadly Overall this book highlights the resilience of the Tonga people in the face of years of politico economic crisis and will be an important contribution to research on livelihoods ethnic minorities and rural development in Africa
