The Human Intellect Noah Porter, 1872      **Visions, a study of false sight (pseudopia.)** Edward Hammond Clarke, 1878      Legislative Theatre Augusto Boal, 2005-07-28 Augusto Boal's reputation is now moving beyond the realms of theatre and drama therapy bringing him to the attention of a wider public Legislative Theatre is the latest and most remarkable stage in his work Legislative Theatre is an attempt to use Boal's method of Forum Theatre within a political system to create a truer form of democracy It is an extraordinary experiment in the potential of theatre to affect social change At the heart of his method of Forum Theatre is the dual meaning of the verb to act to perform and to take action Forum Theatre invites members of the audience to take the stage and decide the outcome becoming an integral part of the performance As a politician in his native Rio de Janeiro Boal used Forum Theatre to motivate the local populace in generating relevant legislation In Legislative Theatre Boal creates new theatrical and truly revolutionary ways of involving everyone in the democratic process This book includes a full explanation of the genesis and principles of Legislative Theatre a description of the process in operation in Rio Boal's essays speeches and lectures on popular theatre Paulo Freire cultural activism the point of playwrighting and much else besides      The Dream and Human Societies G. E. Von Grunebaum, Roger Caillois, 2023-07-28 The study of dreams and their role in human societies particularly within classical Islam provides a fascinating lens through which to understand both individual and collective psychology In medieval Islamic culture dreams were seen not only as personal experiences but as profound communications from the divine or supernatural This belief system imbued the dream with cognitive power often interpreting dreams as forms of prophecy or divine messages a view that transcended the individual's inner psyche and extended into the realm of objective truth Dreams were considered a bridge to understanding the future the Hereafter and the will of God with scholars like Abdalghani an N bulus developing elaborate systems for interpreting their meanings These interpretations drew heavily from religious texts such as the Koran and Hadith and offered guidance on a variety of matters ranging from personal conduct to political affairs The significance of dreams within classical Islam is also evident in their societal and political implications Dreams were not only seen as personal revelations but also as instruments of prophecy often used to predict the death of rulers the success of military campaigns or the outcomes of political struggles They were deeply intertwined with religious doctrines with the Prophet Muhammad and various saints appearing in dreams to guide or advise key figures in Islamic history These dream visions were viewed as essential tools for navigating both the personal and political spheres reinforcing the belief that the dream world was closely linked with the divine order The widespread acceptance of dreams as a form of truth is a striking contrast to contemporary Western thought where dreams are more commonly seen as reflections of the subconscious mind In this sense the historical and cultural context of classical Islam elevated the dream to a status that intertwined it with both personal and societal identity suggesting a powerful intersection of religion politics and individual experience This title is

part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1966

**God, Belief, and Perplexity** William E. Mann, 2016 This volume presents fourteen of William E Mann's essays on three prominent figures in late Patristic and early medieval philosophy Augustine Anselm and Peter Abelard The essays explore some of the quandaries arguments and theories presented in their writings The essays in this volume complement those to be found in Mann's *God Modality and Morality* OUP 2015 While the essays in *God Modality and Morality* are primarily essays in philosophical theology those found in the present volume are more varied Some still deal with issues in philosophical theology Other essays are aporetic in nature discussing cases of philosophical perplexity sometimes but not always leaving the cases unresolved All the essays display directly or indirectly the philosophical influence that Augustine has had His *Confessions* is a rich source for philosophical puzzlement Individual essays examine his reflections on the alleged innocence of infants which raises questions about cognitive emotional and linguistic development his juvenile theft of pears and its relation to moral motivation and his struggle with and resolution of the problem of evil One essay presents the rudiments of an Augustinian moral theory rooted in his understanding of the Sermon on the Mount Another essay illustrates the theory by discussing his writings on lying Mann argues that Abelard amplified Augustine's moral theory by emphasizing the crucial role that intention plays in wrongdoing Augustine bequeathed to Anselm the notion of faith seeking understanding Mann argues that this methodological slogan shapes Anselm's ontological argument for God's existence and his efforts to explicate the doctrine of the Trinity

**The High Medieval Dream Vision** Kathryn L. Lynch, 1988-06-01 In the High Middle

Ages the dream narrative was an enormously popular and influential form Along with the romance it was perhaps the genre of the age It has come down to us in such classics twelfth to fourteenth century classics as *The Divine Comedy* the *Romance of the Rose* *Piers Plowman* Chaucer's early poetry and the works of Guillaume de Machaut This book redefines the dream vision by attending to its role in philosophical debate of the time a conservative role in defense of the high medieval synthesis of reason and revelation Lynch shows how the epistemological basis of this synthesis and the theories of visions that emerged from it drew on Arabic commentaries of Aristotle These theories informed poetic visions modeled on Boethius's *Consolation of Philosophy* a work she discusses in detail before turning to Alain de Lille Jean de Meun and Dante A final section on John Gower's *Confessio Amantis* shows how fourteenth and fifteenth century writers extended and finally moved beyond the conventional form of the dream vision

**The Chautauquan**, 1898      **The Nature of Experience** W. H. Sparks, 2011-11-23 This study identifies the structures and processes that create consciousness and the conscious experience The expression of perceptions memories dreams and emotions develop and are enhanced in intrafusal muscle spindles These expressions in many cases are common to us all We experience the environment as reality in the form of sensations sight hearing taste smell and touch to use the common and traditional identifications Consciousness is experienced in the intrafusal muscle spindles The fundamental purpose of the spindles is to control the muscular system The process of control is the detection of the energy by a second set of receptors the spindle receptors The second set of receptors is critical to an explanation of the theory and serves to explain what heretofore has been the unknown factor in conscious experience the experience of consciousness The spindle receptor detection is analogous to the detection of the environment by sensory receptors The difference of course is that we are the intrafusal spindles detected by the spindle receptors It is the efferent impulse activity from the congenitally and experientially configured synaptic activity that enhances the energies developed in the spindles as experience This process is necessary for the experience of consciousness and the effective control of behavior For centuries man has reflected upon the conscious nature of the human species The Nature of Experience offers a new perspective on this eternal question
