Dreams and Suicides Suzanne Macalister,2013-01-11 This study discusses the Greek novel through the ages from the genre s flowering in late Antiquity to its learned revival in twelfth century Byzantium Its unique feature is its full coverage of the Byzantine novels demonstrating that they both depend upon and react against the ancient novel and can only be understood against the cultural backdrop of ancient Greek literature Dreams and Suicides analyses the cultural symptoms and attitudes portrayed or implied in the novels thus rooting them in a social rather than merely a literary context For all students of ancient culture this book provides important and original insights into the genre of ancient literature

Suicide and Contemporary Science Fiction Carl Gutiérrez-Jones,2015-03-16 Suicide and Contemporary Science Fiction examines the fascination with suicidal crises evident in a range of science fiction Specifically this study explores a seemingly counterintuitive proposition in moments of dramatic scientific and technological change the authors of these works frequently cast self destructive episodes as catalysts for beneficial change Carlos Gutierrez Jones argues that this creative self destruction mechanism is invoked by H G Wells as a means of negotiating Victorian anxieties regarding evolutionary theory by Stanislaw Lem as he wrestles with the prospect of nuclear self destruction at the dawn of the space age by William Gibson as he considers the development of artificial intelligence by Christopher Nolan as he explores the cybernetic colonization of the unconscious by Rian Johnson as he links aspects of video gaming to the neoliberal militarization of institutions and by Margaret Atwood as she considers impending ecological disaster and the rise of bioterrorism These authors often depict such scientific and technological changes in a fashion that requires the central characters to transform themselves in hopes of remaining relevant in a radically altered environment

Amy Billone, 2016-06-10 This book investigates the reappearance of the 19th century dream child from the Golden Age of Children's Literature both in the Harry Potter series and in other works that have reached unprecedented levels of popular success today. Discussing Harry Potter as a reincarnation of Lewis Carroll's Alice and J. M. Barrie's Peter Pan, Billone goes on to examine the recent resurrection of Alice in Tim Burton's *Alice* and of Peter Pan in Michael Jackson and in James Bond. Visiting trends that have emerged since the Harry Potter series ended, the book studies revisions of the dream child in texts and films that have inspired mass fandom in the twenty-first century: Stephenie Meyer's *Twilight*, E. L. James's *50 Shades of Grey*, and Suzanne Collins's *The Hunger Games*. The volume argues that the 21st-century desire to achieve dream states in relationship to eternal youth results from the way that dreams provide a means of realizing the fantastic yet alarming possibility of escaping from time. This current identification with the dream child stems from the threat of political unrest and economic and environmental collapse as well as from the simultaneous technophilia and technophobia of a culture immersed in the breathless revolution of the digital age. This book not only explores how the dream child from the past has returned to reflect misgivings about imagined dystopian futures but also reveals how the rebirth of the dream child opens up possibilities for new narratives where happy endings remain viable against all odds. It will appeal to scholars in a wide variety of fields including Childhood Studies, Children's YA Literature, Cinema Studies, Cultural Studies, Cyberculture, Gender Studies, Queer Studies, Gothic Studies, New Media, and Popular Culture.
