rendering the story ends on a note of hope for contemporary times The story came to me in a dream It was told to me by Falling Star She answered a myriad of questions I asked She showed me the locations of where the events in the story took place She showed me her People who wore exotic clothes made of finely woven textiles decorated with pearls copper and other artistic ornaments She showed me strongly built homes their villages and their expansive farms I saw their social organization was powerful yet simple a few shaman elders and no real leaders She intrigued me with their immense earthworks which demonstrate accurate astronomical alignments to the Sun Moon stars and galaxies The organization of labor engineering skills mathematical and astronomical knowledge required to build these phenomenal earthworks amazes modern researchers I asked Falling Star why she showed me all of this She said her People wanted their story told and asked me if I would tell it Of course I said and then I asked her why She said her People were so deeply spiritual so in tune and in touch with the Creator that they actively lived the principles of Oneness Their ways demonstrated what being one and at one with the One looked like in real life She said the people of my time need to know these principles and to learn to live them because humankind is struggling to regain balance in a troubled world

the relationship and struggle of the human body and its inner being Completely paralyzed by Lou Gehrig's disease Magali is imprisoned in her own body able to communicate only by blinking her eyes Feeling mentally free but physically trapped she reflects on her past and regards her present physical existence as a prison A relationship formed between Magali and her doctor gives one of them the hope to live and the other the grace to die

100 Love Sonnets Pablo Neruda, 2007
Celebrating the works of a great Chilean poet this collection offers a vibrant translation of Neruda's sensual and erotic poetry Famous for his politically engaged lyrics the Nobel Laureate also wrote bold and sexual sonnets and this compilation captures the spirit and verbal dexterity of the lesser known genre These sonnets from one of the most influential and beloved 20th century poets accompany questions for discussion and lists of recommended readings and related websites

The German Prisoner James Hanley, 2006 Brilliant in its stark depiction of trench warfare in World War I this lost classic was privately printed in a limited edition in 1930 British censors initially suppressed the short novel because of its tough antiwar views and sympathetic portrayals of German soldiers and even today's readers may be unprepared for its scenes of horrific battlefield carnage and men driven to madness by relentless psychological stress Providing a new view of an underappreciated Canadian author the book also stands as a fascinating addition to the comparatively small shelf of literature by writers who fought in the Great War

Garwin's Tale John H. Saylor, 2023-10-27 Garwin is a man confronted by one trying situation after another As one of his world's top scientists he grapples with his planet's impending destruction That terrible burden is made even more difficult by his need to explain the problem to top policy makers and by the failing health of his wife Slayva Garwin deals with this long list challenges as a man of great character might be expected to but he does not emerge unscathed The challenges only seem to subside when Garwin ventures to Earth There he and a friend named Denck along with a small team of researchers determine that our world might be a good fit for some small portion of their planet's refugees To that end the team must consider a great deal about Earth's people their political and economic systems and the history of their thought In the end however the people of Earth prove to be the biggest challenge of all Many of the challenges encountered along the way arise from the relationship between science and politics Garwin and Denck who happens to be a professor of the history and philosophy of science encounter problems relating to such relationships on both worlds though it's made clear that their civilization sees the issues with much greater clarity than the people of Earth do Indeed Garwin Denck and their comrades struggle to understand the people of Earth and the lagging nature of their social and political systems These systems just aren't what they should be given Earth's scientific development In time the people of Earth prove incapable of managing the influence that political forces have on research in the natural sciences Science or at least specific research projects is arbitrated less in the peer reviewed journal or the lab than in the public square The purpose is clear controlling perceptions of scientific thought is part of a broader program that's designed to control thought more generally Science has been appropriated to serve the collective rather than some truth that transcends mere politics

Garwin and his friends are heartbroken to discover that Earth will not be suitable for their project. Many of them had hoped to make a home here and believed that with assistance from their kind, the people of Earth might be shown the right path, but another culture, one greatly more advanced than Garwin's, intervenes and makes that impossible. As fate would have it, even this latest challenge was beyond Garwin's control. The Academy, 1895
