Dresden Tuesday February 13 1945:

Dresden Fred Taylor, 2004 At 9 51 pm on the 13th of February 1945 an airstrike on Dresden started that left at least 25 000 people dead and 13 square miles of the centre destroyed In this study of that night Taylor has researched in German American and British archives and talked to those involved on all sides **Dresden** Frederick Taylor, 2011-11-03 The definitive story of the shocking and controversial Allied bombing of Dresden In narrative power and persuasion he has paralleled in Dresden what Antony Beevor achieved in Stalingrad Independent on Sunday Well researched and unpretentious fascinating Taylor skilfully interweaves various personal accounts of the impact of the raids Guardian At 9 51 p m on Tuesday 13 February 1945 Dresden s air raid sirens sounded as they had done many times during the Second World War But this time was different By the next morning more than 4 500 tons of high explosives and incendiary devices had been dropped on the unprotected city At least 25 000 inhabitants died in the terrifying firestorm and thirteen square miles of the city s historic centre including incalculable quantities of treasure and works of art lay in ruins In this portrait of the city its people and its still controversial destruction Frederick Taylor has drawn on archives and sources only accessible since the fall of the East German regime and talked to Allied aircrew and survivors from members of the German armed services and refugees fleeing the Russian advance to ordinary citizens of Dresden **Dresden** Frederick Taylor, 2024-05-21 This historical account re examines the Allied attack on Dresden during World War II revealing the justification behind the controversial aerial bombing Passionately written and deeply affecting A bracing rebuke to the myths and propaganda that have painted over the memory of this tragedy People For decades it has been assumed that the Allied bombing of Dresden was militarily unjustifiable an act of rage and retribution for Germany s ceaseless bombing of London and other parts of England Now Frederick Taylor s groundbreaking research re examines the facts and reveals that Dresden was a highly militarized city actively involved in the production of military armaments and communications concealed beneath the cultural elegance for which the city was famous Incorporating first hand accounts contemporaneous press material and memoirs and never before seen government records Taylor documents unequivocally the very real military threat Dresden posed and thus altering forever our view of that attack The enigmatic past and the patient muse of history are brilliantly served by this blockbuster of a book It is a masterpiece of scholarship and even handed reporting not unlike John Hersey s Hiroshima Dresden is a war classic one that combs the ashes to bring the complicated past to shuddering true life at last Chicago Sun Times Taylor s chronicle makes for compelling reading he puts the assault in its proper context to reveal the inherent moral tangle of total war Atlantic Monthly *Dresden* Frederick Taylor, 2005-01-18 For decades it has been assumed that the Allied bombing of Dresden a cultured city famous for its china chocolate and fine watches was militarily unjustifiable an act of retribution for Germany s ceaseless bombing of London and other parts of England Now Frederick Taylor s groundbreaking research offers a completely new examination of the facts and reveals that Dresden was a highly militarized city actively involved in the

production of military armaments and communications Incorporating first hand accounts contemporaneous press material and memoirs and never before seen government records Taylor proves unequivocally the very real military threat Dresden posed and how a legacy of propaganda shrouded the truth for sixty years **The Bombing of Dresden** Ian Blake,1964

Death of the Wehrmacht Robert Michael Citino,2007 A deft lively and highly readable history of the demise of the German way of war As the allies found an antidote to the shock and awe approach of the Wehrmacht the once mighty German army underwent an epic fall from remarkable operational victories to crushing operational defeats forced to take on a defensive stance in a war it could never win **Bombs Away!** Wilfried Wilms,William Rasch,2006 Prompted by recent challenges to and debates about the relative public silence concerning the effects of the Allied air war over Europe during World War II this collection of essays examines literary visual film and photography and institutional museums representations of the bombing of civilian targets predominantly in Germany The authors examine narrative strategies of both well known and relatively little known works as well as the moral and ideological presuppositions of the varied representations of the depredations of total war The introduction and afterword by the editors invite the readers to expand the contours and historical context of the debates about the German public discourse on the bombing war beyond the narrow confines of perpetrators and victims The volume will be of interest to literary scholars historians and the general reading public interested in warfare and its effects on civilian populations **War, Nation, Memory** Keith A. Crawford,Stuart J. Foster,2007-12-01 The Second World War stands as the most devastating and destructive global conflict in human history More than 60 nations representing 1 7 billion people or three quarters of the world s population were consumed by its horror Not surprisingly therefore World War II stands as a landmark episode in history education throughout the world and its prominent place in school history textbooks is almost guaranteed As this book demonstrates however the stories that nations choose to tell their young about World War II do not represent a universally accepted truth about events during the war Rather wartime narratives contained in school textbooks typically are selected to instil in the young a sense of national pride common identify and shared collective memory To understand this process War Nation Memory describes and evaluates school history textbooks from many nations deeply affected by World War II including China France Germany Japan USA and the United Kingdom It critically examines the very different and complex perspectives offered in many nations and analyses the ways in which textbooks commonly serve as instruments of socialisation and in some cases propaganda Above all War Nation Memory demonstrates that far from containing neutral knowledge history textbooks prove fascinating cultural artefacts consciously shaped and legitimated by powerful ideological cultural and sociopolitical forces dominant in the present **Terror from the Sky** Igor Primoratz,2010 This is an interesting informative and important work Overall the quality of the essays is very high and the focus of the book is on a topic of great importance Stephen Nathanson Northeastern University *War and German Memory* K. Michael Prince,2009-11-05 Germans often claim that we have learned the lessons

of our history But what precisely are the lessons they have drawn from their Nazi era past What experiences from that time continue to hold significant meaning for Germans today and how have those experiences shaped postwar German cultural identity Though Germans have come to recognize the evils of Nazism for them its primary evil derived from the war it unleashed and the hardships death and destruction that the war wrought on the Germans themselves and less from the losses and suffering it caused others Recent public discussion about the Allied bombing campaign against Germany the expulsion of Germans from Eastern Europe and other German experiences during and following the Second World War have revealed what some see as an emerging tendency among Germans to perceive themselves as much the victims of wartime acts as other peoples Through a survey of postwar literature film and other popular media as well as public commemorations and other means of memorializing and discussing the past K Michael Prince demonstrates that the theme of German suffering has been an abiding and even overriding element of postwar German historical memory and a chief component of German cultural identity While academics have focused their attention on Nazism atrocity and genocide and while Germany's official ceremonies and other acts of public memory have been similarly directed it was the wartime sufferings of average Germans that have remained at the core of German historical consciousness influencing their attitudes toward war in general and shaping Germany's role in world affairs

Beyond Berlin Gavriel D. Rosenfeld, Paul B. Jaskot, 2015-05-01 *Beyond Berlin* breaks new ground in the ongoing effort to understand how memorials buildings and other spaces have figured in the larger German struggle to come to terms with the legacy of Nazism The contributors challenge reigning views of how the task of coming to terms with the Nazi Past Vergangenheitsbewältigung has been pursued at specific urban and architectural sites Focusing on west as well as east German cities whether prominent metropolises like Hamburg dynamic regional centers like Dresden gritty industrial cities like Wolfsburg or idyllic rural towns like Quedlinburg the volume's case studies of individual urban centers provide readers with a more complex sense of the manifold ways in which the confrontation with the Nazi past has directly shaped the evolving form of the German urban landscape since the end of the Second World War In these multidisciplinary discussions of important intersections with historical art historical anthropological and geographical concerns this collection deepens our understanding of the diverse ways in which the memory of National Socialism has profoundly influenced postwar German culture and society Scholars and students interested in National Socialism modern Germany memory studies urban studies and planning geography industrial design and art and architectural history will find the volume compelling *Beyond Berlin* will appeal to general audiences knowledgeable about the Nazi past as well as those interested in historic preservation memorials and the overall dynamics of commemoration

The Collapse of the Conventional Jaimey Fisher, Brad Prager, 2010 Bringing together many of the most important scholars of German film this hugely significant collection offers a fascinating and subtle account of the contours of the political in the post Wall cinematic landscape Paul Cooke professor of German cultural studies in the School of Modern Languages and Cultures University of

Leeds Book Jacket Socialist Laments Martha Sprigge, 2021 The Ruin The Socialists Cemetery The Church Concentration Camp Memorials The Artists Cemetery **Masters of the Air** Donald L. Miller, 2020-05-07 Now a major television event from Apple TV and Steven Spielberg starring Austin Butler Callum Turner and Anthony Boyle and companion to Band of Brothers and The Pacific Seconds after Brady's plane was hit the Hundredth's entire formation was broken up and scattered by swarms of single engine planes and by rockets launched by twin engine planes that flew parallel Meet the Flying Fortresses of the American Eighth Air Force Britain's Lancaster comrades who helped to bring down the Nazis Historian and World War II expert Donald Miller brings us the story of the bomber boys who brought the war to Hitler's doorstep Unlike ground soldiers they slept on clean beds drank beer in local pubs and danced to the swing music of the travelling Air Force bands But they were also an elite group of fighters who put their lives on the line in the most dangerous role of all Miller takes readers from the adrenaline filled battles in the sky to the airbases across England the German prison camps and onto the ground to understand the devastation faced by civilians Drawn from interviews oral histories and American British and German archives Masters of the Air is the authoritative deeply moving and important account of the world's first and only bomber war Encyclopedia of World War II Alan Axelrod, 2007 A reference to the ideological military political biographical and social topics surrounding World War II which is often considered the pivotal event of the twentieth century **Spitting in the Soup** Mark Johnson, 2016-07-01 Doping is as old as organized sports From baseball to horse racing cycling to track and field drugs have been used to enhance performance for 150 years For much of that time doping to do better was expected It was doping to throw a game that stirred outrage Today though athletes are vilified for using performance enhancing drugs Damned as moral deviants who shred the fair play fabric dopers are an affront to the athletes who don't take shortcuts But this tidy view swindles sports fans While we may want the world sorted into villains and victims putting the blame on athletes alone ignores decades of history in which teams coaches governments the media scientists sponsors sports federations and even spectators have played a role The truth about doping in sports is messy and shocking because it holds a mirror to our own reluctance to spit in the soup that is to tell the truth about the spectacle we crave In Spitting in the Soup sports journalist Mark Johnson explores how the deals made behind closed doors keep drugs in sports Johnson unwinds the doping culture from the early days when pills meant progress and uncovers the complex relationships that underlie elite sports culture the essence of which is not to play fair but to push the boundaries of human performance It's easy to assume that drugs in sports have always been frowned upon but that's not true Drugs in sports are old It's banning drugs in sports that is new Spitting in the Soup offers a bitingly honest clear eyed look at why that's so and what it will take to kick pills out of the locker room once and for all **The Myth of the Good War** Jacques R. Pauwels, 2015-03-06 In the spirit of historians Howard Zinn Gwynne Dyer and Noam Chomsky Jacques Pauwels focuses on the big picture Like them he seeks to find the real reasons for the actions of great powers and great leaders Familiar Second World War figures from Adolf Hitler to

Franklin D Roosevelt and Joseph Stalin are portrayed in a new light in this book The decisions of Hitler and his Nazi government to go to war were not those of madmen Britain and the US were not allies fighting shoulder to shoulder with no motive except ridding the world of the evils of Nazism In Pauwels account the actions of the United States during the war years were heavily influenced by American corporations IBM GM Ford ITT and Standard Oil of New Jersey now called Exxon who were having a very profitable war selling oil armaments and equipment to both sides with money gushing everywhere Rather than analyzing Pearl Harbor as an unprovoked attack Pauwels notes that US generals boasted of their success in goading Japan into a war the Americans badly wanted One chilling account describes why President Truman insisted on using nuclear bombs against Japan when there was no military need to do so Another reveals that Churchill instructed his bombers to flatten Dresden and kill thousands when the war was already won to demonstrate British American strength to Stalin Leaders usually cast in a heroic mould in other books about this war look quite different here Nations that claimed a higher purpose in going to war are shown to have had far less idealistic motives The Second World War as Jacques Pauwels tells it was a good war only in myth The reality is far messier and far more revealing of the evils that come from conflicts between great powers and great leaders seeking to enrich their countries and dominate the world *Strategic Terror* Beau Grosscup,2008-02-29 Presenting a global history of aerial bombardment this book shows how certain European powers initiated aerial bombardment of civilians after World War I and how it was an instrument of choice in World War II Beau Grosscup shows that such methods used initially as a means of terrorizing native populations in Africa and the Middle East have become the primary form of terrorism in more recent decades While such strategic terror is not classed as terrorism in the West this reflects an unwillingness to confront the human costs and immorality of aerial bombardment Grosscup argues that if terrorism is to be diminished the role of aerial bombing in sustaining global violence must be recognized

Postcards from the Trenches Irene Guenther,2018-11 German art student Otto Schubert was 22 years old when he was drafted into the Great War As the conflict unfolded he painted a series of postcards that he sent to his sweetheart Irma During the battles of Ypres and Verdun Schubert filled dozens of military issued 4 x 6 cards with vivid images depicting the daily realities and tragedies of war Beautifully illustrated with full color reproductions of his exquisite postcards as well as his wartime sketches woodcuts and two lithograph portfolios Postcards from the Trenches is Schubert s war diary love journal and life story His powerful artworks illuminate and document in a visual language the truths of war Postcards from the Trenches offers the first full account of Otto Schubert soldier artist of the Great War rising art star in the 1920s prolific graphic artist and book illustrator one of the degenerate artists defamed by the Nazis and a man shattered by the Second World War and the Cold War Created in the midst of enormous devastation Schubert s haunting visual missives are as powerful and relevant today as they were a century ago His postcards are both a young man s token of love and longing and a soldier s testimony of the Great War *Social Science Methods for Psychodynamic Inquiry* William R Meyers,2016-02-06

This book explains with case examples a variety of social science research methods suitable for studying the unconscious components of irrational social and political actions in world affairs which can be defined as those that are intensely destructive self destructive or extremely bizarre The book argues that they are driven in part by feelings and fantasies that are outside of conscious awareness Meyers explores the role of empathy in clinical understanding as well as the value of exposing assertions to empirical disconfirmation With a variety of research methods such as survey research content analysis and narrative analysis and case examples such as studies of irrational statements by authoritarian leaders fabricated newspaper articles and climate change denial this book sheds light on how to conduct research on psychodynamic matters in a scientifically valid and credible way
