Johnson,2003-10-04 Housing Culture is an inter disciplinary study of old houses It brings together recent ideas in studies of traditional architecture social and cultural history and social theory by looking at the meanings of traditional architecture in western Suffolk England The author employs in an English context many of the ideas of Glassie Deetz and other writers on the American colonies In so doing the book forms an important critique and refinement of those ideas and should prove an indispensable background text for American historical archaeologists in particular The study spans the late medieval and early modern periods looking at the layout and structural details of ordinary houses It argues for a process of closure affecting both technical and social aspects of houses The context of the process of closure is explored and related to wider social and cultural changes including the feudal capitalist transition Housing Culture embodies an innovative and exciting approach to the study of artefacts in an historic period It will interest historians historical geographers and archaeologists of the medieval and early modern periods in both England and America It is also sure to be of interest to students of all areas and periods who seek a theoretically informed approach to the study of traditional architecture and material culture in general This book is intended for archaeologists historians particularly of landscape architecture the medieval period social and cultural historical geographers students and researchers of material culture such groups are found within departments of archeology history and anthropology

**Girl Hidden** Jesse René Gibbs,2021-12-03 Echoing among the Blue Ridge Mountains were the cries of newborn babies that disappeared into the night The screams of children nearly drowned out by the sound of crickets A girl hidden and waiting to be found terrified and confused The fireflies sparkling in the woods bringing light to darkled places The bulk of Jesse s memories were of growing up in the farm country of the Blue Ridge Mountains in North Carolina The farm folks stayed pretty much outside of town except for visits to the feed store causing random tractors to travel down Main Street There were beatings and abuses manipulation and terror carried out in spaces breathtaking in their beauty There were twenty seven Baptist churches three non denominational churches and one Catholic Church There were annual Ku Klux Klan rallies on the street where they would walk right by all the black families who came out to watch and the white folks who came out for moral support whether of the black families or the

white no one knew for sure Black people did not marry white people in a civilized society and so were rarely seen socializing There was a young woman who was pregnant with a black man s baby so her parents disowned her Jesse s family was accused of killing the child and burying it on their property There was the Berkley House Bed and Breakfast toward the end of town with gold plated silverware and hardwood floors rumored to be the local sex worker house There was a mansion up on a hill that overlooked the other humble houses in the town In the local cemetery there was Will B Jolly carved into the graves used by bootleggers back in the twenties Everyone had some form of thick southern drawl though the length of the aw would extend the further south you went There was a tiny baseball field and a tinier fire department There was an old lady in the foothills that let the family raid her garden during the summer And in exchange Jesse s family helped her husband bring in the hay for their animals every year There was a black snake in the attic the door opened inside the closet next to Jesse s bed She would find his shed skins left behind in the summer months measuring close to seven feet in length There was a creek with crawdads and a moss covered bridge There were mulberry and pecan trees that filled her and her siblings aching bellies as the weather turned There were hot summer days and freezing cold winters There were dogs that were best friends cats that kept her warm at night and a cow that committed suicide There was red clay instead of dirt hayfields instead of grass and a favorite swimming hole Lenny s Mill the local grain mill on a glacier fed creek where you could take a dip if you were brave enough to challenge the frigid waters Girl Hidden is the story of an unwanted child born nonetheless and forced into servitude desperate to protect her siblings and find her way out from under the vicious manipulative abuses heaped on her by the one person who was supposed to love her unconditionally her mother

**Diaspora in the Countryside** Royden Loewen, 2006-01-01 From the 1930s to the 1980s the North American countryside faced a profound cultural transformation in which a once unified rural society became fragmented and dispersed Families wishing to remain on the farm were required to accept new levels of automation while others unwilling or unable to make the change migrated to nearby towns or regional cities The cultural reformulation that resulted saw the emergence of a genuine rural diaspora The growing cultural and physical separation was especially true for close knit ethno religious communities Mennonites in particular Forced into regional cities the kaleidoscopic urban culture further fragmented the Mennonites into disparate social entities In *Diaspora in the Countryside* the phenomena of rural fragmentation is examined by comparing and contrasting two closely related but distinctive Dutch Russian Mennonite communities located in different parts of the continent Kansas and Manitoba respectively By systematically comparing these communities two distinctive responses to the mid twentieth century Great Disjunction are made apparent Royden Loewen also contrasts the cultural changes of these farm families to the cultures their kin adopted in nearby towns and cities Loewen charts not only the dispersion of two rural communities but follows their former residents as they reformulate their lives in new settings Water-supply Paper, 1912 *Harmonics of Nature* Dr. Jerome Heath, Degrees of Freedom Uncertainty This

is the degrees of freedom uncertainty rule which actually allows us freedom We can never be sure which individual went this way and which went the other way that is what entropy and Carnot's jinks on Maxwell's demons is all about This is a statistical population there are enough members to apply the statistical rule the rule of large numbers That is the same rule just inverted as the degrees of freedom uncertainty principle which says that you cannot specify Newtonian activity on

populations that provide excellent statistical results because of the same theory of large numbers You can't have your cake and eat it too precisely what Carnoy meant Also the difficulties with this rule could be resolved easily by applying the viewpoint of harmonics So under the degrees of freedom uncertainty when that applies strongly enough you have harmonics This is the fact that systems under the rule of degrees of freedom uncertainty and that are constrained in certain natural or harmonics ways can form natural patterns Harmonics the name refers to the patterns since they form in harmonic kind a set of eigenfunctions The pattern does not specify where any part molecule is at or how fast it is going The pattern is an envelope of probability distribution for the randomly distributed contents This does not allow Maxwell's Demons to sneak some particles into a special place to violate equilibrium rules Harmonics Regular Newtonian Only differential equations cannot measure or determine anything that is caught up in the degrees of freedom uncertainty perhaps refer to it as the Rule of Large Numbers only the flip side of the coin The equation itself is dealing with specifying or measuring the position and velocity of a particle whose position or velocity cannot be specified or measured because of the degrees of freedom uncertainty rule You see that some things are happening as you watch wave action closely like surfers do but it is hard to understand the action from our phenomenistic understanding of the universe We have been taught to recognize Newton Only but these phenomena are strange It just doesn't look right to me but beautifully threatening Once the swell that are controlling the waves hits the shoreline bottoms the wave equation collapses The problem is that momentum is then loosed in the waters and their molecules This causes a set of harmonic eddies harmonics and eddies sort of are the same thing but two different perspectives so saying it twice is a reminder to see it both ways to occur in a fairly standard path The photographer above is doing well at showing the pipelines with each set of waves since those are the eddies that makes surfing fun But here in this set of waves the eddies are too unstable to dare get inside of And when the wave is throwing you down it is unto the sand of the beach ouch That shore breaker effect is due to the fast drop in the undersea bottom just off Waimea Beach yes part of the equation The Etiology of Natural Patterns Symmetry although it is always some kind of natural symmetry is pervasive in living things Nature provides a number of different patterns spirals ripples patterns on birds feathers and spots and stripes on animals In high speed photography we can see the crown shaped splash pattern formed when a drop falls into a pond We see five fold symmetry is found in such creatures as starfish sea urchins and sea lilies Snowflakes have striking six fold symmetry Dunes may form crescents very long straight lines stars domes parabolas and longitudinal or sword shapes There are also symmetries like trees spirals meanders waves foams cracks spots and stripes But natural means straight lines are never straight curves are never perfectly curved From the common understanding of entropy we expect most things in this world to be random instead of ordered and these random distributions should show dissipation and not order It takes energy to create order Ramsey Theory says that order is the inevitable result of a large amount of random trials Hungarian biologist Aristid Lindenmayer and French American mathematician Beno t Mandelbrot showed how the mathematics of

fractals could create patterns that appear to be natural in computer printouts These are just the beginnings of understanding the harmonics of nature This book looks into the patterns in nature Instead of just listing the interesting patterns I am concerned about demonstrating a general etiology the cause or reason for something to happen of those patterns This is a new way of looking at the physical universe itself to understand not only the etiology of harmonics but the general physics of those patterns Thus we can see a set of characteristics that allows us to understand predict and use the processes of these patterns Dr Jerome Heath     A Lady's Life and Travels in Zululand and the Transvaal During Cetewayo's Reign Mrs. Wilkinson,1882     **Armor** ,1959     **A Narrative of the Boer War** Thomas Fortescue Carter,1883
