Driving Forces In History:

Driving Forces in History Halvdan Koht, 1971 Recent Themes in World History and the History of the West Donald A. Yerxa, 2009 New insights on global histories and Western civilization from leading scholars in the field Described as the New York Review of Books for history Historically Speaking has emerged as one of the most distinctive historical publications in recent years actively seeking out contributions from a pantheon of leading voices in historical discourse from both inside and outside academia Recent Themes in World History and the History of the West represents some of the best writing on Western civilization and world history in the past five years This collection of essays and interviews from Historically Speaking gives leading historians approaches to the continually evolving field of world history with a specific emphasis on the relationship of Western civilization to the history of the world The book also discusses the effect of empire on global history and the many ways empire continues to manifest in the contemporary world The contributors discuss world history as an intricate story of the connections within the global community rather than a tidy static narrative that attempts to summarize everything in our global past In this volume the study of world history is presented as a constantly comparative endeavor concerned with the major themes that link and divide humanity Fundamentals of Historical Materialism Doug Lorimer, 1999 **The Development Trajectory of Eastern Societies and the Theories and Practices of Socialism** Zhao Jiaxiang, 2022-07-30 In the four volumes of The Development Trajectory of Eastern societies and the Theories and Practices of Socialism the author re examines Marx and Engels theories on the development trajectory of Eastern societies by integrating theoretical analysis of Marxist theories and an historical investigation of socialist revolution and socialist construction around the world The collection challenges some predominant interpretations of Marx and Engels historical materialism by focusing on that materialism explaining the general laws of historical development and its particular trajectory in Eastern societies discussing the attempts of the Russian Commune to avoid the torments of the capitalist system and tracing the victories and failures of the 100 year trajectory of socialism The significance of Marx and Engels socialist theories for contemporary social development in the Eastern societies is henceforth laid bare The book will be a key reference for readers studying Marxism Marxist philosophy and the history of philosophy **Constructive Sociological Theory** Thomas G. Masaryk, 2021-10-29 Thomas G Masaryk was founding and first president of the State of Czechoslovakia He was also a dissident charter member of the theoretical vanguard that established modern sociology in the nineteenth century Many social scientists are aware of Masaryk s political role but do not know about his significant contributions to sociology With the publication of this book Imber and Woolfolk hope to restore Masaryk to his rightful place in history as a founding sociological theorist This compilation of some of Masaryk s major writings reveals the intertwining of politics and social theory that is characteristic of his thinking Chapters in Constructive Sociological Theory include The Development of the Modern Suicide Tendency Essence and Method of Sociology The Epistemological Problem of Russian Philosophy The

Religious Question and Modern Philosophy The Class Structure of Society Central Problems of Marxist Policy and Democracy versus Theocracy Constructive Sociological Theory also presents these writings together in English for the first time Alan Woolfolk's substantial introduction extensively discusses Masaryk's biographical background academic life political career religious views and interpretations of Marx and Comte among other subjects This landmark volume will be an essential addition to the libraries of political theorists sociologists philosophers and theologians **Web History** Niels Brügger,2010 This is the first edited volume to put the emerging field of web history on the agenda of internet research Sixteen original chapters investigate how the use of the web has developed in the realm of web culture at large as well as how the organization of web industries and old media institutions on the web have changed A number of fundamental theoretical and methodological questions related to doing web history are also examined The collection aims to explore some of the possible ways of approaching the web of the past based on the assumption that the past is not only important for historical purposes but because it must be taken into consideration in order to fully understand the web of the present and the web of the future The book includes a foreword by Charles Ess and contributions from Kirsten Foot Steven Schneider Alexander Halavais Ken Hillis and more **Theory and History in International Relations** Donald James Puchala,2003 This innovative work frames a plea to scholars of global politics to turn away from the manufacture of data and to return to a systematic study of history as a basis for theory On Religion Karl Marx,Friedrich Engels,2012-03-13 In these letters and essays the founders of Marxism discuss the origins and essence of religion and offer a thought provoking introduction to the theoretical basis of proletarian atheism *The New Spirituality* Rudolf Steiner,1988 The time is now ripe for the awakening of new forces of spiritual perception with which humanity will perceive the working of Christ in the etheric world **The Laws of History** Graeme Snooks,2002-09-26 In this unorthodox and trail blazing work Graeme Snooks argues that it is possible to construct a scientific theory of human history but only if we adopt a radically materialist theory of human nature **A Study of Marx's View of History** Xianda Chen,2025-09-30 This book summarizes the process of Marx's foundation of the view of history into two turning points namely from alienation to alienated labor and then from alienated labor to the materialistic view of history Meanwhile this book makes an in depth analysis of the ideas about the materialistic view of history in recent years which is conducive to further clarifying the ideas of Marxist learners and researchers Besides this book on the basis of the human exploration of historical laws analyzes how Marx broke through the limitations of previous historical views and went deep into history that is the process of discovering the laws of history itself thus profoundly revealing the important reference value of Marx's view of history in the transformation of human historical views It is also conducive to building a bridge of communication between Chinese and Western philosophy promoting international exchanges and cooperation and enriching the ideological connotation of contemporary Marxism **Organizational Power and Ethical Subjectivity** Youzheng Li,2019-03-18 This collection of articles discusses the basic epistemological issues facing the global theoretical humanities in

terms of cross cultural points of view The topics discussed especially concern theoretical semiotics institutional restrictions of current humanities scholarship and comparative historical semiotics as well as the more applicable and empirical rational directed humanist ethics The text is characterized by its hermeneutic dialogue between contemporary western theories and traditional Chinese intellectual history that will be instructive and informative for scholars and theoretical readers of all branches in both the western and non western humanities It emphasizes the great significance of the theoretical humanities in our times and their urgent task should lie in collectively reconstructing a more rationalized humanist scientific foundation for a new type of human sciences through critically reorganizing all intellectual sources of mankind *Marxism, Socialism and Religion* Karl Marx,2001 This work brings together new translations of Marx s most important texts in political philosophy written after 1848 Marx challenged political theory to its very fundamentals as his works do not follow traditional models for exploring politics theoretically In his introduction Terrell Carver situates Marx in a politics of democratic constitutionalism and revolutionary communism The works are presented here complete according to the first editions or the earliest manuscript state and include the Manifesto of the Communist Party the preface of 1859 to A Contribution to the Critique of Political Economy The Civil War in France and the little known Notes on Adolph Wagner More than most political theorists Marx made contemporary politics the focus for his theoretical work He created a distinctive kind of political theory and this volume aims to make it accessible today *Political Culture, Political Science, and Identity Politics* Howard J. Wiarda,2016-04-08 Political Culture defined as the values beliefs and behavioral patterns underlying the political system has long had an uneasy relationship with political science Identity politics is the latest incarnation of this conflict Everyone agrees that culture and identity are important specifically political culture is important in understanding other countries and global regions but no one agrees how much or how precisely to measure it In this important book well known Comparativist Howard J Wiarda traces the long and controversial history of culture studies and the relations of political culture and identity politics to political science Under attack from structuralists institutionalists Marxists and dependency writers Wiarda examines and assesses the reasons for these attacks and why political culture went into decline only to have a new and transcendent renaissance and revival in the writings of Inglehart Fukuyama Putnam Huntington and many others Today political culture now updated to include identity politics stands as one of these great explanatory paradigms in political science the others being structuralism and institutionalism Rather than seeing them as diametrically exposed Howard Wiarda shows how they may be made complementary and woven together in more complex multicausal explanations This book is brief highly readable provocative and certain to stimulate discussion It will be of interest to general readers and as a text in courses in international relations comparative politics foreign policy and Third World studies **Globalizations** Heikki Patomäki,2025-02-05 What can we say about the shape of things to come in world politics the probability of different possibilities and the reflexivity of our anticipations Building on post Keynesian economic theory and classical theories of

imperialism the book discusses anticipations that neoliberalism will push the world into a new era of insecurity confrontations armaments and wars Part I of this volume delves into the acute geopolitical landscape especially the war in Ukraine Through the analysis of the lessons from the OSCE process the focus moves to political economy Part II Political Economy focuses on the dynamics of the world political economy and concludes with discussions on connections between economic and normative theory Part III concerns global political theory ending with a cosmopolitan vision of the university's future The volume also investigates partial failures of and limits to anticipating the future in open systems Normative assessments and priorities have also changed in some respects with the world historical context The comprehensive introduction addresses the question what can we learn from all this and how do these lessons help us anticipate the future better This book will be of great interest to students scholars and researchers of International Relations International Political Economy Economic History Development Studies and Futures Studies The chapters in this book except for chapters 3 and 6 were originally published in Globalizations This volume comes with a new introduction

The Oxford History of Historical Writing Daniel R. Woolf, Andrew Feldherr, Grant Hardy, 2011-05-05 A chronological scholarly survey of the history of historical writing in five volumes Each volume covers a particular period of time from the beginning of writing to the present day and from all over the world

History and Future David J. Staley, 2010-01-01 The book reexamines this long held belief and argues that the historical method is an excellent way to think about and represent the future At the same time the book asserts that futurists should not view the future as a scientist might aiming for predictions and certainties but rather should view the future in the same way that an historian views the past

Reader in Marxist Philosophy Howard Selsam, Harry Martel, 1963 The basic philosophical thought of Marx Engels and Lenin gathered together in the categories customary to Western philosophy

A Defence of History and Class Consciousness Georg Lukacs, György Lukács, Slavoj Žižek, John Rees, 2002-08-17 This work is commonly held to be the foundational text for Western Marxism As Stalinism took over in Russia Lukacs was subjected to attacks for deviation In the 1920s he wrote this response

Historical Geography in Czechia: Themes and Concepts Eva Semotanová, Pavel Chromý, Zdeněk Kučera, 2023 Although the content of historical geography may be viewed from different perspectives there is no doubt that historical geography has interdisciplinary character The publication represents an outcome of cooperation among geographers and historians within the Historical Geography Research Centre that continues more than forty years old tradition of common researches in Czechia Beside discussing the disciplinary origins the most vital research topics of present Czech historical geography are reflected in its contents transformations of landscapes historical towns and of regions
