Medical Law in France Anne-Marie Duguet, 2018-05-15

Derived from the renowned multi volume International Encyclopaedia of Laws this convenient volume provides comprehensive analysis of the law affecting the physician patient relationship in France Cutting across the traditional compartments with which lawyers are familiar medical law is concerned with issues arising from this relationship and not with the many wider juridical relations involved in the broader field of health care law After a general introduction the book systematically describes law related to the medical profession proceeding from training licensing and other aspects of access to the profession through disciplinary and professional liability and medical ethics considerations and quality assurance to such aspects of the physician patient relationship as rights and duties of physicians and patients consent privacy and access to medical records Also covered are specific issues such as organ transplants human medical research abortion and euthanasia as well as matters dealing with the physician in relation to other health care providers health care insurance and the health care system Succinct and practical this book will prove to be of great value to professional organizations of physicians nurses hospitals and relevant government agencies Lawyers representing parties with interests in France will

welcome this very useful guide and academics and researchers will appreciate its comparative value as a contribution to the study of medical law in the international context *Global Health Law* Michel Bélanger, 2011 **Medical**

Decision-Making on Behalf of Young Children Imogen Goold, Cressida Auckland, Jonathan Herring, 2020-09-17 In the wake of the Charlie Gard and Alfie Evans cases a wide ranging international conversation was started regarding alternative thresholds for intervention and the different balances that can be made in weighing up the rights and interests of the child the parent's rights and responsibilities and the role of medical professionals and the courts This collection provides a comparative perspective on these issues by bringing together analysis from a range of jurisdictions across Europe North and South America Africa and Asia Contextualising the differences and similarities and drawing out the cultural and social values that inform the approach in different countries this volume is highly valuable to scholars across jurisdictions not only to inform their own local debate on how best to navigate such cases but also to foster inter jurisdictional debate on the issues The book brings together commentators from the fields of law medical ethics and clinical medicine across the world actively drawing on the view from the clinic as well as philosophical legal and sociological perspectives on the crucial question of who should decide about the fate of a child suffering from a serious illness In doing so the collection offers comprehensive treatment of the key questions around whether the current best interests approach is still appropriate and if not what the alternatives are It engages head on with the concerns seen in both the academic and popular literature that there is a need to reconsider the orthodoxy in this area **New Serial Titles**, 1993 A union list of serials commencing publication after Dec 31 1949 **The Development of Medical Liability** E. H. Hondius, 2010 This six volume set contains the results of the first stage of an AHRC funded project which aims to examine the nature of legal development in Western Europe since 1850 focusing on liability for fault By bringing together experts with different disciplinary backgrounds comparative lawyers and legal historians all with an understanding of modern tort law in their own systems and getting them to work collaboratively the books produce a more nuanced comparative legal history and one which is theoretically better informed
