Drug Prohibition And The Conscience Of Nations:

Drug War Politics Eva Bertram, Morris Blachman, Kenneth Sharpe, Peter Andreas, 1996-07-15 Why have our drug wars failed and how might we turn things around Ask the authors of this hardhitting exposé of U S efforts to fight drug trafficking and abuse In a bold analysis of a century's worth of policy failure *Drug War Politics* turns on its head many familiar bromides about drug politics It demonstrates how instead of learning from our failures we duplicate and reinforce them in the same flawed policies The authors examine the politics of denial that has led to this catastrophic predicament and propose a basis for a realistic and desperately needed solution Domestic and foreign drug wars have consistently fallen short because they are based on a flawed model of force and punishment the authors show The failure of these misguided solutions has led to harsher get tough policies debilitating cycles of more force and punishment and a drug problem that continues to escalate On the foreign policy front billions of dollars have been wasted corruption has mushroomed and human rights undermined in Latin America and across the globe Yet cheap drugs still flow abundantly across our borders At home more money than ever is spent on law enforcement and an unprecedented number of people disproportionately minorities are incarcerated But drug abuse and addiction persist The authors outline the political struggles that help create and sustain the current punitive approach They probe the workings of Washington politics demonstrating how presidential and congressional out-toughing tactics create a logic of escalation while the criticisms and alternatives of reformers are sidelined or silenced Critical of both the punitive model and the legalization approach *Drug War Politics* calls for a bold new public health approach one that frames the drug problem as a public health not a criminal concern The authors argue that only by situating drug issues in the context of our fundamental institutions the family neighborhoods and schools can we hope to provide viable treatment prevention and law enforcement In its comprehensive investigation of our long futile battle with drugs and its original argument for fundamental change this book is essential for every concerned citizen **United States and International**

Drug Control, 1909-1997 David R. Bewley-Taylor, 2002-04-22 *The United States and International Drug Control 1909-1997* charts the US quest to internationalize the doctrine of drug prohibition The study reveals the origins motivation and methodologies as well as the recurring contradictions and inconsistencies present within the US overseas fight against the production manufacture trafficking and use of certain psychoactive substances Drawing on extensive historical materials David Bewley Taylor uses the international career of America's first Drug Czar Harry J. Anslinger to explore how the US successfully exploited hegemonic superiority in 1945 to influence the philosophy of the multilateral drug control system operated by the United Nations More than a purely historical study the book employs an interdisciplinary approach to understanding the development perpetuation and consequences of a US driven multilateral drug control system Examining the contemporary UN drug control framework the author argues that international legislation is largely ineffective This provocative book is the first study to provide a picture of US involvement in drug control from its inception to the present day

Its wide ranging scope makes it of interest not only to scholars of diplomatic history US foreign Policy and international relations but also to anyone concerned by the universal growth of the illicit drug problem **Drugs** Arthur

Benavie,2012-08-06 Using the best scientific evidence **Drugs** America's Holy War explores the impact and cost of America's War on Drugs both in tax spending and in human terms Is it possible that US drug policies are helping to proliferate not prevent a multitude of social ills including homicide property crime the spread of AIDS the contamination of drugs the erosion of civil liberties the punishment of thousands of non violent people the corruption of public officials and the spending of billions of tax dollars in an attempt to prevent certain drugs from entering the country In this controversial new book award winning economist Arthur Benavie analyzes the research findings and argues that an end to the war on drugs much as we ended alcohol prohibition would yield enormous international benefits destroy dangerous and illegal drug cartels and allow the American government to refocus its attention on public well being **Fatal Distraction** Arnold S.

Trebach,2006-12 From the author of *The Great Drug War* Macmillan 1987 Unlimited Publishing LLC 2005 and *The Heroin Solution* Yale University Press 1982 Unlimited Publishing LLC 2006 comes another controversial study Details how current U S drug policies sap vital resources from more pressing areas of national security Includes extensive footnotes citations and bibliography **Fundamentals of Sentencing Theory** Andrew Ashworth,Martin Wasik,1998 The Oxford Monographs On

Criminal Law And Justice series aims to cover all aspects of criminal law and procedure including criminal evidence the scope of the series is wide encompassing both practical and theoretical works Series Editor Professor Andrew Ashworth Vinerian Professor of English Law All Souls College Oxford This volume is a thematic collection of essays on sentencing theory by leading writers The essays fall into three groups Part I considers the underlying justifications for the imposition of punishment by the State and examines the relationship between victims offenders and the State Part II addresses a number of areas of sentencing policy that have given rise to particular difficulty such as the sentencing of drug offenders the rationale for discounting sentences for multiple offenders the existence of special sentencing for young offenders and cases where the injury done to the victim is of a different magnitude from what might have been expected Part III raises various questions about the unequal impact on offenders of different sentencing measures and examines the extent to which sentences should be adjusted to take account of these different impacts and of broader social inequalities This volume is dedicated to Professor Andrew von Hirsch whose continuing work on sentencing theory provided the stimulus for the collection **Comprehensive Handbook of Psychopathology** Henry E. approaches to drugs tend to be determined by medical and criminal visions that emerged over a century ago the concepts of addiction on the one hand and drug control on the other having imposed themselves as the unquestionable central notions surrounding drug issues and discourses Pathologization and criminalization are the dominant perspectives on psychoactive drugs and it is difficult to describe drug consumption in any terms other than those of medicine or to conceive of regulation except in terms of control and eradication Drugs and Culture presents other voices and understandings of drug issues highlighting the socio cultural features of drug use and regulation in modern societies It examines the cultural dimensions of drugs and their regulation with special attention to questions of how consumption of specific psychoactive substances becomes associated with particular social groups the social dynamics involved in our coming to think of these phenomena as we do and the factors that determine the political and policy responses to drug use Adopting approaches from anthropology sociology history political science and geopolitics to challenge the prevailing pathologization and criminalization of drug use this book provides international and comparative perspectives on drug research based on the latest research in Europe the USA the Middle East and Hong Kong
