

Drug and Alcohol Policy

Document Number 0012-8-191 | Rev 7.0 | 11/05/2016
Owner: General Manager Health, Safety and Environment

Overview

nbn is committed to providing safe and healthy workplaces.

nbn's policy has been designed for the mutual benefit of the **nbn** and its employees and seeks to comply with legislation of Federal and State Governments regarding alcohol, tobacco, drugs and safety generally. The policy has also been designed to support and work with any corresponding policy, and drug and alcohol procedures adopted by contractors to **nbn**.

The **nbn** policy and the supporting procedures operate as a minimum standard for **nbn** employees. Where **nbn** determines contractually that a contractor is operating within an area of high risk they are required to have their own Drug and Alcohol policy and procedures. The contractor must then comply with their policy at all times.

Purpose

nbn is committed to the well-being of its employees, and to enabling its employees to perform their work in a manner which is both productive, and does not jeopardise their own safety or the safety of others. **nbn** aims to foster an attitude among employees that it is unacceptable to come to work under the influence of alcohol or drugs.

As part of these efforts to achieve the highest standards of health and safety, **nbn** will maintain a drug and alcohol cut off level that sets out the requirements for determining whether an employee is under the influence of drugs and alcohol. In office environments employees are expected to have blood alcohol concentration (BAC) levels consistent with community expectations. For work in the field the BAC level is 0.0 g/100ml. For the avoidance of doubt, field work includes any work not in an office environment and also includes work in an office environment that involves construction, installation or building work.

Scope

This Drug and Alcohol policy and the supporting Procedures apply to all **nbn** employees and maximum term employees. It also applies to secondees from other companies, consultants or visitors.

This policy does not automatically apply to contractors, however **nbn** expects its contractors to observe behaviours consistent with this policy and **nbn** may apply drug and alcohol requirements to contractors from time to time depending on the circumstances, typically as a contractual requirement where construction, installation or building works are involved. Each person to whom the Policy applies must make themselves aware of these standards and the conduct required.

Drug Use And Drug Policy:

Drug Use and Drug Policy Marilyn D. McShane, Franklin P. Williams, 1997 The articles in this collection provide an overview of the research and writing on this topic between 1991 and 1995 **Research Handbook on International Drug Policy** David R. Bewley-Taylor, Khalid Tinasti, 2020-09-25 Analysing arguably one of the most controversial areas in public policy this pioneering Research Handbook brings together contributions from expert researchers to provide a global overview of the shifting dynamics of drug policy Emphasising connections between the domestic and the international contributors illustrate the intersections between drug policy human rights obligations and the 2030 Sustainable Development Agenda offering an insightful analysis of the regional dynamics of drug control and the contemporary and emerging problems it is facing Towards More Effective Global Drug Policies Caroline Chatwin, 2018-05-25 This book examines the topical issue of global drug policy and outlines five steps that could be taken to improve its effectiveness A public criminology approach is applied to explore not only what could be done but also why it matters and how it could be achieved It argues that more effective global drug policies require an acknowledgement of the failure of a war on drugs approach and the harms it has caused Instead strategies that reduce drug related harm should be prioritised An innovative and diverse range of approaches should be developed that are underpinned by evaluation and dissemination of results Finally the horizons of the drug policy debate should be broadened In line with the central aims of public criminology this book provides an accessible contribution to global drug policy debates that links theory and practice and which will have appeal to a wide range of audiences **Towards Drug Policy Justice** Damon Barrett, Rick Lines, 2023-12-19 Taking the shifting global drug policy terrain as a starting point this collection moves beyond debates about whether to reform drug policies to a focus on delivering drug policy justice repairing the damage caused by the war on drugs as a component of reform efforts and safeguarding against future harms in legal markets This book brings together some of the leading international thinkers and advocates on harm reduction and drug policy to introduce key questions in contemporary drug policy Across five themes and with contributions from different regions and disciplines it explores ethical legal empirical and historical perspectives on delivering drug policy justice from supply through to use Essays cover a wide range of issues from the effects of COVID on drug policy to securing economic and environmental justice and from human rights in Asian drug policy to questions of race and equity in cannabis reforms providing diverse insights on both prominent and overlooked drug policy challenges Towards Drug Policy Justice is a benchmark text for scholars students advocates and policymakers as the book explores new models of global drug policy reform Drug Policy and the Decline of the American City Sam Staley, 2017-07-05 The drug trade is a growth industry in most major American cities fueling devastated inner city economies with revenues in excess of 100 billion In this timely volume Sam Staley provides a detailed in depth analysis of the consequences of current drug policies focusing on the relationship between public policy and urban economic development and on how the drug economy has become

thoroughly entwined in the urban economy The black market in illegal drugs undermines essential institutions necessary for promoting long term economic growth including respect for civil liberties private property and nonviolent conflict resolution Staley argues that America s cities can be revitalized only through a major restructuring of the urban economy that does not rely on drug trafficking as a primary source of employment and income the inadvertent outcome of current prohibitionist policy Thus comprehensive decriminalization of the major drugs marijuana cocaine and heroin is an important first step toward addressing the economic and social needs of depressed inner cities Staley demonstrates how decriminalization would refocus public policy on the human dimension of drug abuse and addiction acknowledge that the cities face severe development problems that promote underground economic activity and reconstitute drug policy on principles consistent with limited government as embodied in the U S Constitution and Bill of Rights Designed to cross disciplinary boundaries Staley s provocative analysis will be essential reading for urban policymakers sociologists economists criminologists and drug treatment specialists

Drug Policy and Human Nature W.K. Bickel,R.J. DeGrandpre,2013-11-11 The formation of drug policy is a complex phenomena influenced by a multi tude of sources Among others these influences include historical factors contemporary public opinion regarding the nature and magnitude of drug use and abuse the portrayal of illicit drugs and drug use in the media and lobbying efforts by special interest groups e g The Drug Policy Foundation including government agencies e g the Justice Department and law enforcement An additional source of influence are the activities of specialists directly engaged in studying drug use and treating drug dependence This includes individuals involved in drug treatment anthropological and cultural studies policy analy ses basic psychological and pharmacological research research on the epide miology of drug use and dependence and research on prevention This influ ence by specialists might be usefully

distinguished from those influences first mentioned for two reasons First studies of drug use and dependence attempt to uncover empirical generalizations about drugs and second because these findings are empirical there is a hope that they guide at least to some extent the actions of other forces that more directly determine drug policy Psychology as an empirical discipline has long been interested in the use of psychoactive drugs At the level of basic science in psychopharmacology a most important contribution has been the demonstration that drugs of abuse function as reinforcers and thus enter into the same psychological processes as do other appetitive stimuli
